info@sporturf.co.za

Sporturf is a specialist sports surface company providing design, construction, installation and maintenance of professional sports facilities for stadiums, schools, clubs and sports complexes.

Our team delivers high-performance playing surfaces built for durability, safety and long-term use. From new field construction to specialist turf management, Sporturf provides complete sports facility solutions, ensuring that sports surfaces perform consistently under heavy use.

We work across multiple sporting disciplines and provide both construction services and long-term maintenance programmes to keep sports facilities operating at professional standards.

SPORTS SURFACE

Construction & Installation

Natural Turf Sports Fields

- Field construction and resurfacing
- Precision laser levelling and grading
- Drainage installation and correction
- Irrigation system installation
- Turf establishment and grow-in programs
- Sports field renovations and upgrades

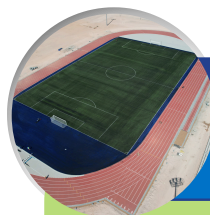

Hybrid Turf Systems

- Increased wear tolerance
- Improved root stability
- Enhanced drainage performance
- Suitable for high-traffic stadium environments

Artificial Turf Sports Fields

- Rugby fields
- Soccer pitches
- Hockey surfaces
- Multi-sport school facilities
- Consistent playing conditions
- Reduced maintenance requirements
- High durability under heavy usage
- Year-round playability

Athletics Running Tracks

- Shock-absorbing running surfaces
- Track resurfacing and repairs
- Base preparation and drainage
- Professional athletics track markings
- These systems provide safe, durable and high-performance running surfaces.

Sports Facility Infrastructure

- Perimeter fencing for sports fields
- Ball-stop netting for rugby, soccer and hockey fields
- High safety netting systems
- Training area protection netting
- These systems help protect surrounding areas while enhancing the overall sports facility environment.

Cricket Facilities

- Indoor cricket training nets
- Outdoor cricket practice lanes
- Fully enclosed net systems
- Steel frame net structures
- Safety netting installations
- Synthetic turf batting surfaces
- Rubber impact surfaces
- Shock-absorbing base layers

Natural Bulli Cricket Pitches

Sporturf installs traditional natural bulli cricket pitches using compacted clay-based bulli soil. Installation typically includes:

- * Bulli soil supply and placement
- * Pitch shaping and compaction
- * Surface rolling and finishing
- * Integration into the outfield

These pitches provide excellent bounce, durability and authentic cricket playing conditions.

Multi-Sport Court Conversions

Sporturf also upgrades and repurposes existing sports facilities. Examples include converting old tennis courts into modern multi-sport facilities suitable for:

- * Hockey
- * Netball
- * Tennis
- * Multi-sport school use

This allows schools and clubs to maximise the use of existing infrastructure.

Turf Maintenance & Agronomy Services

Sporturf provides ongoing maintenance programmes for both natural and artificial sports surfaces. Natural turf maintenance includes:

- * Scheduled mowing programmes
 - * Irrigation management
 - * Surface repairs and levelling
- * Drainage inspection and improvements
 - * Seasonal renovation programs

Artificial turf maintenance includes:

- * Surface brushing and grooming
 - * Infill redistribution
 - * Deep cleaning
- * Seam inspection and repairs

Sports Field Maintenance

Sporturf provides ongoing maintenance programmes for both natural and artificial sports surfaces.

Seasonal Field Renovation (Spring Treatment)

Typical spring renovation includes:

- * Scarification to remove thatch build-up
- * Aeration to relieve soil compaction
- * Verti-draining for deep soil aeration
- * Coring to remove compacted surface layers
- * Top dressing with sand or rootzone materials
- * Surface levelling and laser grading
- * Fertilisation to stimulate turf recovery

These treatments restore playability, surface uniformity and turf health.

Turf Agronomy & Spraying Services (Specialist Turf Management Division)

Sporturf provides professional turf treatment and agronomic services to maintain healthy sports surfaces. These standards address critical factors such as:

- * Field dimensions and layout
- * Surface performance and safety
- * Drainage systems
- * Base construction stability
- * Shock absorption and durability

Fertiliser Applications

Professional fertiliser programmes designed to improve:

- * Turf density
- * Root development
- * Colour and vigour

Pesticide Spraying

Targeted turf protection treatments including:

- * Fungicides for turf disease control
- * Herbicides for weed management

All treatments are applied using professional turf spraying equipment and industry best practices.

INDI Africa Line Machine

All Sporturf installations are carried out in accordance with recognised international sports federation standards, ensuring professional performance and player safety. Our work aligns with the guidelines of major governing bodies including:

World Athletics | FIH - International Hockey Federation | FIFA / World Soccer standards | World Rugby.

Sporturf provides end-to-end sports facility services.

- * Natural turf sport fields
- * Hybrid turf stadium systems
- * Artificial sport surfaces
- * Athletics tracks
- * Multi-sport courts
- * Cricket nets and training facilities
- * Natural bulli cricket pitches
- * Sports fencing and netting
- * Turf maintenance and agronomic programmes
