

March 10, 2022

Dear GPIWA Water Customer,

The Tropical Homesites neighborhood water main improvement project for Phase 2 will begin the week of March 14, 2022 including the following streets:

- Mango St
- Tangelo St
- Gasparilla St
- Tangerine St
- Sabal Ave between Mango and Tangerine

Cabana Construction completed Phase 1, 39 days ahead of schedule.

This project consists of replacing 2-inch and 3-inch water mains with 8-inch for fire protection. There will be 14 new hydrants installed where there was previously no fire protection.

Of course, there will be disruption over this period but in the end the entire neighborhood will have a new water distribution infrastructure and fire protection. Part of the contract includes a video of the entire neighborhood before construction starts to document existing conditions and ensure that the sites are properly restored. Please understand that items in the right of way are subject to different conditions. We encourage you to remove any items in the right of way that can be easily moved prior to the project start.
