

RLM Practitioner Training: *Building Cognitive & Behavioral Fluency*

Official Curriculum Overview

The Restorative Learning Model (RLM) is an intensive, evidence-based Educational-Behavioral Framework designed to equip professionals with the tools to transform high-stakes conflict into high-yield instructional opportunities. By moving beyond traditional discipline, practitioners master the "Art of the Pause," teaching students to interrupt impulsive behavior, rationalize internal drivers, and articulate intent. This framework builds the critical compensatory skills necessary for lasting reentry readiness, behavioral self-regulation, and academic achievement. Upon successful completion of this training and the formal certification exam, practitioners will be empowered to implement the RLM with clinical precision and educational intentionality.
