

Frozen Drink Machine Instructions:

How to Operate

Caution: The operating temperature range for the machine is 32 to 95 deg F. The machine **can not** freeze the contents of the machine in temperatures outside of this range. The machine must not be placed in direct sun as well.

Do not use fresh fruit or anything with pulp.

Fill the mix storage hopper with the following mix using the mixing jug provided:

In a 5 gallon jug, mix ½ gallon of margarita mix with 3 gallons of water

Add 2.75 liters of tequila and ½ liter of Triple Sec

Turn power switch to "ON" position.

Allow product to freeze in barrel. Compressor will turn off when product reaches pre-set consistency.

To dispense product pull down valve handle and release when done.

Refill mix storage hopper when "mix out" light is ON

Clean-up

Drain all of the drink from the machine.

Rinse any residual by placing one to two gallons of fresh water in the top hopper and draining out the spout.

Wipe up any residual drink in the dolly.

If there are any questions or issues with operating, please call us at 830.798.2000.
