

POLYMER IN JUTE INDUSTRY

Plastic is everywhere, Polymer finds its ways to help in the Jute Industry:

ANULON®

APPLICATIONS

Anulon 115 Pinions & Gears

Anulon 115 Pinions & Gears are used in the jute industry as these pinions are lighter and cheaper than metals and also provide better life. The pinions/gears are self lubricant and therefor are suitable to use in this industry.

Anulon Jute Mill Machinery Parts

Anulon machine parts are used in various parts of the machines to conduct smooth flow and reduce maintenance time:

Anulon 94 UHMWPE / Anulon 94H HMHDPE / Anulon 115 Cast Polyamide materials are used for these purposes.

- Picking Cones
- Small pulleys
- CHAIN LINKS
- ROLLERS
- GEARS
- and many more

More polymer applications

- **Polycarbonate Roofing**
Sheets for day light saving
- **Anulon 98** Geomembrane

ANUFLEX CURTAINS

Anuflex transparent strip curtains are used on the gates and windows of conveyors as these curtains allow smooth flow of materials between different rooms and at the same time maintaining the temperature and of both the rooms and does not allow dusts to pass through.
