DOUBLE HUNG WINDOW

Double Hung Window

Screen

The metal-framed screen effectively prevents mosquitoes from entering when the window sash is opened. Springs are used on both sides for easy removal and cleaning.

Drainage System

The interior is designed with drainage ribs and special equipment to create drainage holes, ensuring a stable and efficient drainage system.

Design

The appearance has beautiful lines, clear edges and corners, noble and elegant appearance, and can be designed with various complex window shapes, providing owners and designers with a wider range of design space.

Glass Configuration

3. 2+19A+3.2(mm)
3. 2+13A+3.2(mm)

Size Range

Width≤ 1400mm
Height≤ 2300mm

ACTION WINDOWS PLUS DOORS

SINGLE HUNG WINDOW

Single Hung Window

Product Features

- Classic design offers a traditional and timeless aesthetic that suits a wide range of home architectural styles.
- The sashes slide up and down within the frame, requiring no extra interior or exterior space to open.
- More affordable than double-hung windows and other more complex window styles, offering a budget-friendly option for homeowners and builders.
- The straightforward design, lacking complex mechanical parts, makes them less prone to mechanical failure, contributing to long-lasting performance and lower maintenance needs.

SLIDING WINDOW

Product Ftures

- Offers a sleek, contemporary look with large glass panes that provide unblocked views.
- The sliding mechanism is easy to operate and generally has fewer mechanical parts than more complex windows, leading to reliable performance.
- The panels do not swing open, they do not require any extra interior or exterior space to operate, making them ideal near patios, walkways, or furniture.

Width≤ 800mm
Height≤ 1600mm

Crank Opening Window

Screen
The screens are located on the interior, keeping them from interfering with the operation of the window and protecting them from the elements to help them stay clean longer.

Operation
Crank window offers excellent energy efficiency, creates a very tight seal when closed, preventing drafts and reducing energy costs.

Brush Seal
Brush seals are used for sealing on the outdoor side to prevent the problem of excessive resistance caused by the rubber strips and improve the opening and closing feel.
