

To: Florida citizens, and all concerned with the treatment, not limited to Veterans, and their children behind FDOC wire, but humanity in general.

There is a dire need for citizens to print out copies of the pages on this site and mail to the Fla governor, FDOC Secretary, and especially to your district senator's, urging them to take immediate action to reform this system, with emergency action concerning COVID-19?

Science has discovered that COVID-19 kills more Black and Brown people; 75% of COVID-19 deaths in Houston, Tex were Black. For this reason, I would encourage readers to send these pages with personal letter requesting attorney Benjamin L. Crump (240 N. Magnolia Dr. Tallahassee, Fla 32301-2638 PH (850) 224-6400) Take a stand on this issue. Crump is the number one attorney for wrongful deaths of Blacks in police shootings.

The Sept, 5, 2020 Citrus Chronicle reported 107 FDOC prisoner deaths from COVID-19, a number that doubled in only a couple of months!! Some of the 107 dead were veterans, and children of veterans, who survived war's defending our U.S. Constitution, only to die like wild animals, where humanity is not protected under the U.S. Constitution they and the families they left behind sacrificed all to preserve!!!

The lack of citizens action in working through district senators, in policing FDOC, as law and money provided were intended, is causing a snowball affect on communities, as explained on page one.

Print and mail the pages here in concerning COVID-19, before anymore lives are lost simply due to dereliction of duty? Humanity and especially veterans and their families deserve better!!!

I welcome all inquiries to write: Tony DuPre #120528
