

Humaneyes

Effective Leadership • Organizational Effectiveness • Executive Coaching • Safety Leadership

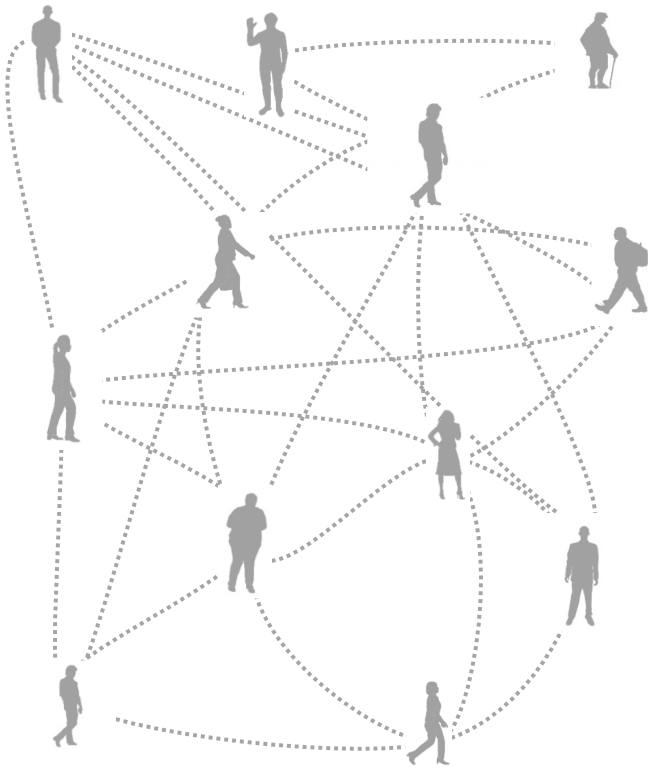

*"It is only by paying attention to people
- and not to performance -
real transformation becomes possible"*

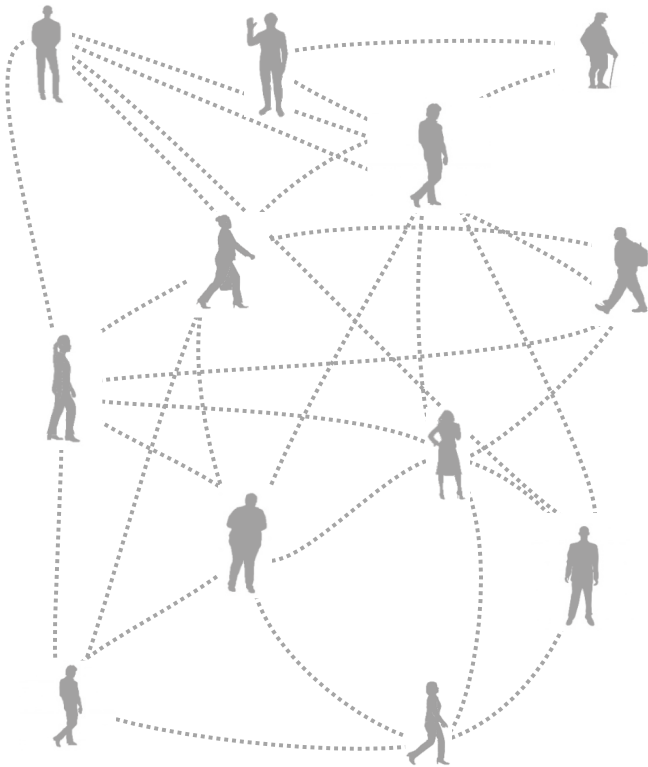

Leadership and Organizational Effectiveness

Humaneyes is a leadership and organizational effectiveness consultancy. We utilize empathy based engagement as means to achieve effective leadership on both individual and organizational levels. We provide leadership development workshops, organizational effectiveness interventions, executive coaching and safety leadership programs.

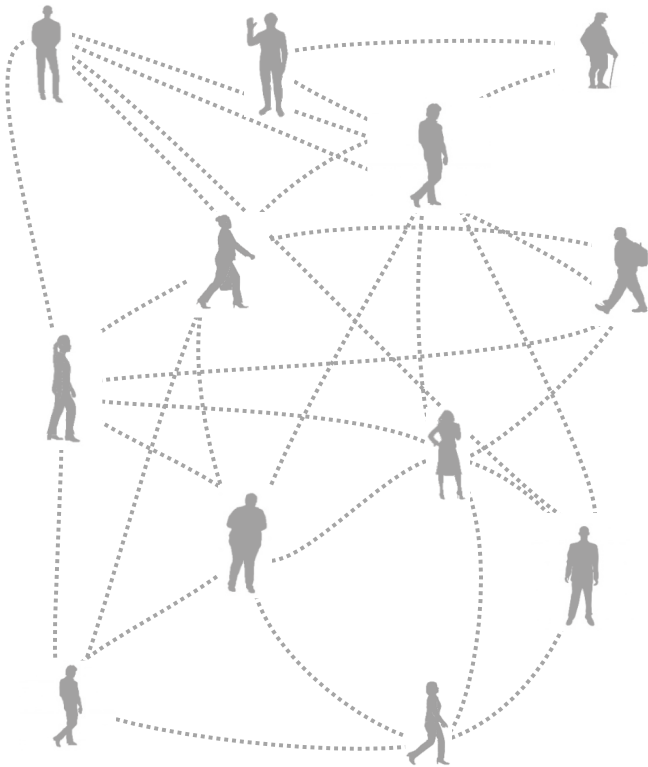

Effective Leadership

Humaneyes Effective Leadership Workshop provides participants with leadership tools essential to effectively communicate and engage, achieve clarity and mutual understanding, generate alignment and creative thinking, constructively resolve conflicts, and enhance their capacity to inspire and motivate.

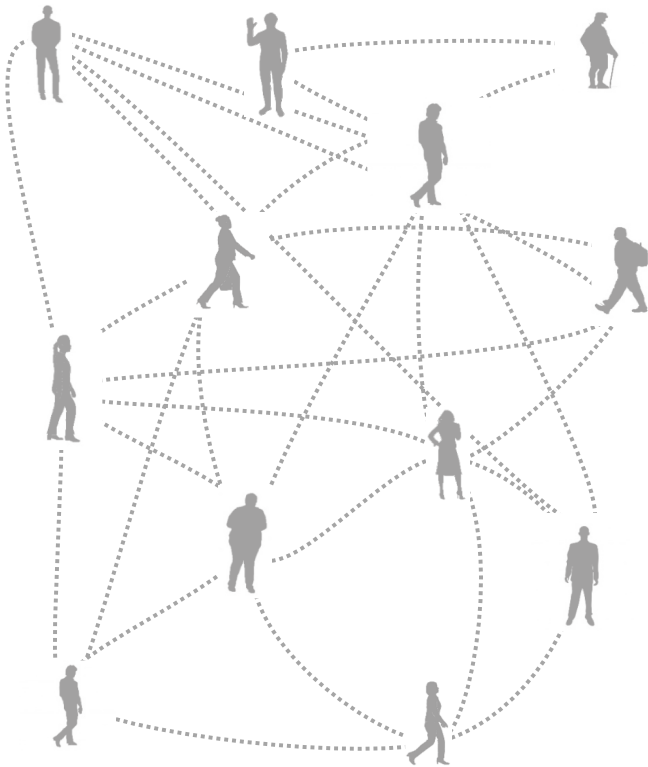

Organizational Effectiveness

Organizational Effectiveness is largely determined by the prevailing business culture within an organization. Humaneyes elevates organizational effectiveness by instilling empathy based engagement as core business culture value along with specifically designed interventions to meet organizational needs.

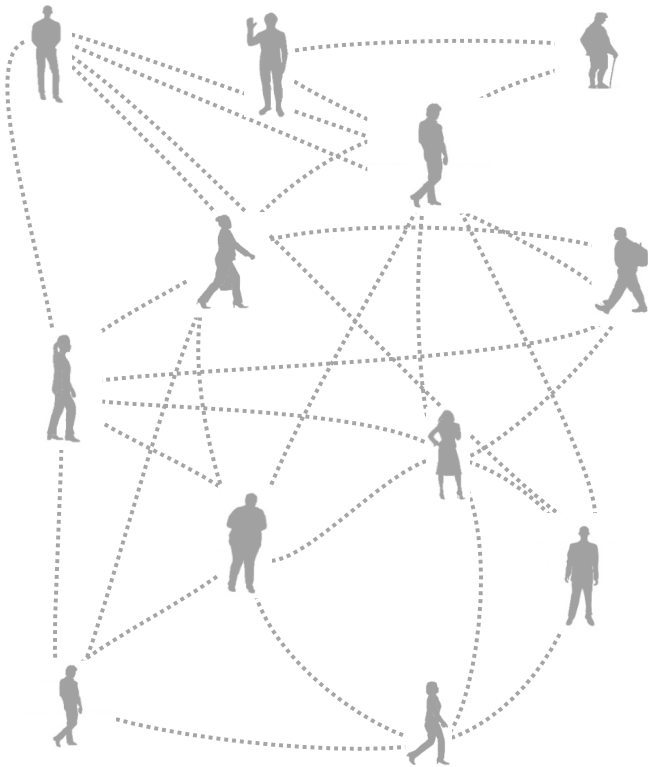

Executive Coaching

Humaneyes individual and group coaching is based on trust and deep appreciation for the uniqueness and individuality of each person. It provides participants with an opportunity to self-reflect, inquire and explore their best strategies as effective leaders.

Safety Leadership

Humaneyes Safety Leadership sets an organization on track for continuous improvement in safety performance. By introducing an innovative formula for safety performance, an organization is transformed into a proactive community that anticipates and addresses safety signals before they evolve into real safety problems.
