

# EVERY PUPPY IS BORN WITH AN IMMATURE IMMUNE SYSTEM

*UNDER 6 WEEKS*

a puppy is protected by the colostrum it had right after birth for antibodies that boost the immune system

*8 WEEKS*

Once these antibodies wear off & the puppy is weaned, its immune system is vulnerable and challenged by stress of new home, and through exposure to possible harmful bacteria and pathogens.

Starting the Wellness Supplement now ensures the puppy to grow into a healthy adult.

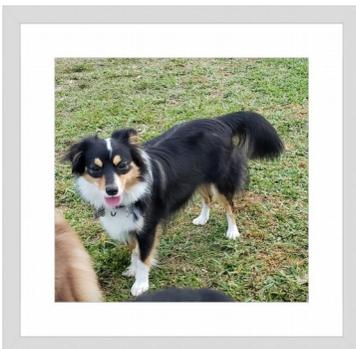

*14 WEEKS... ..to 22 WEEKS*

*“The more we learn about the way bodies function, the more amazing they seem to us. There is a growing amount of anecdotal evidence that suggests a mammal’s body has a highly complex, natural intelligence. As a holistic veterinarian, I review such evidence, interpreting it within the context of established scientific knowledge. Based upon these observations, it seems that a dog’s body “prefers” nutrients as they exist in real foods, in their more natural state. On a cellular level, their bodies are familiar with the nutrient components and therefore the body knows to absorb and assimilate exactly what it needs. That is why I believe that small amounts of nutrients in real foods can have a profound affect on a dog’s body. In light of this information, I formulated a new approach to add to the overall nutrient intake, creating Life’s Abundance Wellness Food Supplement for Dogs.”*

*-Dr. Jane Bicks, DVM*

*Life's Abundance Product Formulator*

Supplementing your dog's diet can play a crucial role in maintaining overall health. We know that some dogs require additional nutritional intake to help them maintain a healthy body, due to age, breed, environment and other factors. Based on this premise, our holistic veterinarian has formulated the perfect complement to your dog's daily diet. Life's Abundance Wellness Food Supplement for Dogs is formulated with a broad array of naturally nutritious ingredients from real food to help maintain overall health. The nutrients contained in this superior supplement are sourced from foods, chicken liver, cranberries, carrots, eggs, pineapples and many others.

### **Pets face a lifetime of exposure to free radicals and threats to their health:**

1. **In the Backyard, Dog Park or anywhere you walk it:**  
Pesticides, Fertilizers, Bacteria and Pathogens can weaken your pet's immune system.
2. **In the Air:**  
Pollutants in the air may cause skin sensitivities in pets. Even common Household Toxins such as Bug Killers, Air Fresheners, Cleaners affect your pet's health.
3. **In Food:**  
Many Pet Foods are made with hormones, preservatives, traces of pesticides and many more harmful ingredients. Corn and grain are common fillers and can cause sensitivities for many pets.

Life's Abundance Wellness Tabs help maintain overall health

- Naturally nutritious ingredients from whole foods
- The perfect complement to our premium foods
- Made in USA
