## Green Promo Marketing

Green promotional products help reduce a company's carbon footprint by decreasing resource consumption, lowering emissions in production, promoting sustainable behaviors, and potentially influencing market trends. While these actions are beneficial for sustainability, earning carbon credits requires thorough verification of the associated emissions reductions

Let's look at some of the key benefits:

### Reduced Resource Consumption

- **Sustainable Materials:** Using products made from recycled or sustainable materials (e.g., recycled plastic, bamboo, organic cotton) reduces the demand for virgin resources, which often require more energy and produce more emissions to extract and process.
- **Less Waste:** Eco-friendly products are often designed to be reusable, reducing the waste generated by single-use items.

### Lower Emissions in Production

- **Energy-Efficient Manufacturing:** Some green products are produced using energy-efficient processes that lower greenhouse gas emissions.
- **Renewable Energy:** Manufacturing facilities powered by renewable energy sources (e.g., solar, wind) can further reduce the carbon footprint of the products they create.

### Sustainable Packaging

- **Minimal and Recyclable Packaging:** Using minimal and recyclable packaging materials reduces waste and emissions associated with packaging production and disposal.
- **Biodegradable Options:** Biodegradable packaging can reduce landfill waste and the associated methane emissions, a potent greenhouse gas.

### Promoting Eco-Friendly Behavior

- **Awareness and Education:** Green promotional products can serve as a platform to raise awareness about environmental issues and encourage sustainable behaviors among recipients (e.g., reusable shopping bags, water bottles, or solar-powered gadgets).
- **Behavioral Change:** By providing alternatives to disposable products, companies can encourage consumers to adopt more sustainable habits.

### Indirect Emissions Reductions

- **Product Use:** Some green promotional products directly reduce emissions through their use. For example, a solar-powered charger reduces the need for electricity from fossil fuels.
- **Lifecycle Impact:** Products that are durable and designed for long-term use can reduce replacement frequency, leading to lower overall emissions over time.

### Corporate Sustainability Image

- **Brand Loyalty:** Companies that demonstrate a commitment to sustainability can build stronger relationships with environmentally conscious consumers, potentially leading to increased support for other green initiatives.
- **Market Influence:** By choosing green promotional products, companies can influence suppliers and competitors to adopt more sustainable practices.

Biodegradable Single Hand Sanitizer Push Wipes and Make-Up Removers

These single wet wipes are ideally suited to guest room amenities, dining facilities, and wellness centers. Push Wipes is the new standard for freshness, cleanliness, and care. Each unit contains a biodegradable all-natural compact cloth that is kept dry in a self-contained sealed recyclable package until they are used. The towelettes are activated by pressing down in the middle of the container which in return mixes the liquid and the compressed towelette. Once activated, the Push Wipes towelette decompresses and becomes ready for use. Whether in your handbag or suitcase, for on-the-go or at home, Push Wipes are always there where you need them.
