History

Al Ali Holding is a multinational conglomerate with a global presence, boasting over 70 years of expertise across a diverse range of services, operational domains, and industrial sectors. The journey commenced in the 1950s with the operation of aging marine transportation vessels, facilitating the movement of goods and people. Originating from Dubai, our maritime routes linked Gulf countries to India in the Asia-Pacific region and extended to Zengebar in the east of Africa. Beyond logistics and trade in goods and pearls, we pioneered bunkering business in our region.

Following the discovery of oil and the formation of the United Arab Emirates, the family business experienced substantial growth in the 1980s. Initially involved in manufacturing small ships, our operations expanded to encompass fueling, marine products, and spare part trading. Over the past decade, our enterprise has undergone transformative diversification, branching into the aviation industry, advanced technology, renewable energies, agro-tech, commodities trading, and real estate. We have also made strategic investments in various industries, both locally and internationally, solidifying our position as a dynamic player in the global business landscape.

About

Al Ali Holding reflect and deliver the business culture and lifestyle requirements of each community we serve, we mix U.A.E lifestyle and business facilities to work together with international association that best serve the investors. Aviation

A new business era is emerging in the airline industry resulting of the increasing competition, rapidly evolution of technology, environmental uncertainties, air transport liberalization and globalization. We observe the industry forecasts for Middle East region in the coming years, and we see an exponential growth in the number of aircraft for Middle East in general and UAE in particular, not reflected in the development of new MROs or enough maintenance lines for aircraft, with which there will be a great demand of the airlines to ensure the slots that they will require for the maintenance of their fleets.

Al Ali Holding create a diversified portfolio investment in aviation industry with our state of art MRO business, all kind of Aircraft & Private Jets operation, Management services and Trading, Jet Fuel Supply services, Aircraft spare parts and components trading, Aircraft Dismantling, Education and labour supply services. We aims to provide comprehensive and high-quality maintenance services for commercial and private aircraft. With a focus on efficiency, safety, and customer satisfaction, our MRO aviation company aims to capture a significant share of the growing aviation maintenance market.

We want be unique in aviation industry and one of the few private company enabled to perform major maintenance of large aircraft such as Boeing 737 & 757 series and Airbus A-320 series, supporting and satisfying our clients from Central Asia, Middle East and Africa. We believe that we can make a difference where we do business, investing in innovation, fostering economic progress and professional development.

Real Estate

Exploring the optimal real estate investments amid the flourishing UAE real estate market has become a priority for investors. As they navigate through various property types, the question arises: which sectors and properties promise the most lucrative returns today? Our mission is to guide clients in discovering the most suitable real estate investment for their unique needs.

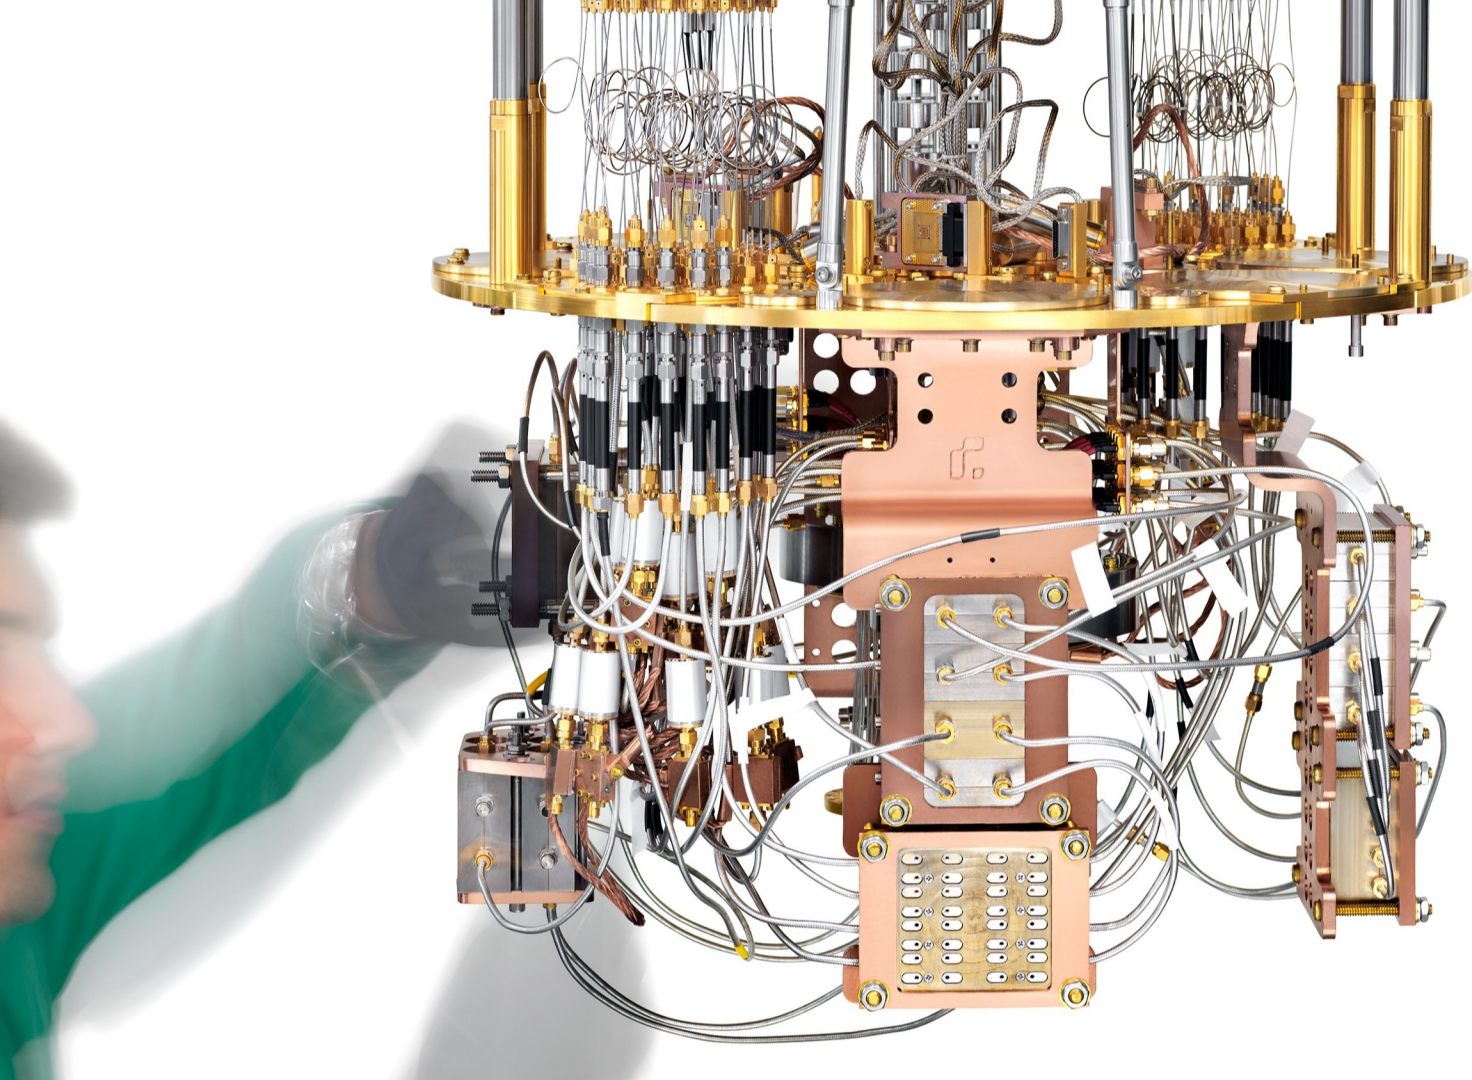

To navigate the diverse landscape of real estate, investors should acquaint themselves with various types: commercial, residential, raw land, new construction, and crowdfunding platforms. Each of these categories presents distinct advantages and disadvantages that prudent investors must carefully assess. Our offerings encompass the following choices:

1. Residential Real Estate
2. Commercial Real Estate
3. Land & New Construction
4. Operational Properties (Hotels, Restaurants, Factories, etc.)

Our experts are poised to provide tailored advice based on your individual circumstances, goals, market area, and preferred investing strategy. While the desire for a straightforward answer is common among investors, determining the best investment property type remains a subjective process. Choosing the most suitable property involves a thoughtful consideration of each option's pros and cons, with key factors such as personal goals and market dynamics playing a pivotal role in the decision-making process

Mobility

The mobility of the future is based on the digitalization of all transport systems: Big Data, 5G, artificial intelligence and comprehensive networking increase safety, improve efficiency and reduce environmental pollution. The future of mobility being fueled by three key technology-driven disruptive trends: electrification of vehicles, connected & autonomous vehicles, and Mobility-as-a-Service. Al Ali Holding providing the world's smartest zero emission fly & drive mobility solution besides beaming. Real multimodal mobility solution within one vehicle means: door to door in one seat, drive & fly, safe, fast, and discrete. We are manufacturing the world's first full stack sustainable driven mobility project based on UAE.

Advance Technologies

We are devoted to empowering small and midsize companies across the region through innovative digital solutions. Since 2010, we have been committed to leading the development of the future economy using innovation and technologies and advanced implementation services.

We bring some products and technology closer to our customers and clients by planning and linking their infrastructure, industry, and development projects with their local universities and their state development visions, growth plans and consequently helping to achieve their wider national development and investment goals.

We do not limit our activities to the industries and areas of AI, E-commerce, Robotic, Blockchain, IOT, Big Data but we go beyond that to Quantum Computing and Space technologies. The philosophy of Al Ali Holdings is to work with suppliers, customers and clients to successfully deliver projects anywhere in the World to bring knowledge, prosperity and profits to all involved.

Healthcare

The future of healthcare is shaping up in front of our very eyes with advances in digital healthcare technologies, such as artificial intelligence, VR/AR, 3D-printing, robotics or nanotechnology. We have to familiarize with the latest developments in order to be able to control technology and not the other way around. The future of healthcare lies in working hand-in-hand with technology and healthcare workers have to embrace emerging healthcare technologies in order to stay relevant in the coming years. Our mission is to spread the knowledge and developments in healthcare that will usher the real era of the art of medicine.

Energy

We established in 2015 to focus on developing and investing in clean energy business. We focus toward large scale projects in both development and rural areas. We design, develop, build, operate and maintain clean energy projects, mainly in urban areas. We limit the uses of non-renewable energy by addressing the global issue of climate change and by promoting renewable energy which is environmentally friendly, reliable, and convenient energy solutions.

We are integrated bespoke energy company offering in house production of our products and specialized in project development, EPC contract, with a clear goal to alleviate energy in the world. We assist energy consumers throughout the lifecycle of power plant. Starting with the feasibility and design to operations and maintenance, walking you through every step of the project process. Our clientele includes Commercial & Industrial lighting and Power Consumers, Independent Power Producers & Project Investors. We focus on present loads shedding crises and promotion of green energy in the country. Most of the countries use most of the electrical energy, and it is not enough. Our renewable energy solution presents the market with reliable and convenient solar energy solutions.

A clean energy revolution taking place across UAE, underscored by the steady expansion of the UAE renewable energy sector. The clean energy industry generates hundreds of billions in economic activity, and is expected to continue to grow rapidly in the coming years. There is tremendous economic opportunity for the countries that invent, manufacture and export clean energy technologies. Responsible development of all of sectors will help ensure UAE continued leadership in clean energy. Moving forward, the Energy Division will continue to drive strategic investments in the transition to a cleaner, domestic and more secure energy future.

Oil and Gas

We deliver crude and refined products to various markets around the globe, with state-of-the-art logistical capabilities. Our multi-national, highly skilled professionals, most of whom are entrepreneurs, former government officials and industry leaders, provide a credible and seamless business chain to complete any transaction.

We work primarily with refineries owned by national oil companies, oil majors, independent oil refineries, airline companies, power generation plants, shipping companies and other business end users. We focus on all members of the supply chain from the refineries to the end users, such as using best in class logistics whether it's a ship, barge, pipeline or truck to move oil efficiently and effectively.

We trade most types of Petrochemical products: Crude Oil. Gasoline. Fuel Oil. Gas Oil. Naphtha. Methanol. LPG

Commodities Trading

Over 50 years of keeping true to its values of conducting business with professionalism, integrity and supporting the community. It was formed to answer demand from the market to connect businesses through U.A.E and specifically from "Dubai" the commercial capital of U.A.E and main hub of the city of trading Dubai.

A black and white photograph of sand dunes. A vertical white line runs down the center of the image, dividing it into two halves. The dunes are illuminated from the left, creating strong shadows and highlights that emphasize their undulating shapes and the fine texture of the sand.
