

GUILD ELEMENTARY

SEL/PBIS Team

The Guild SEL/PBIS team focuses on core instruction provided to all students. This year, the team used BIMAS data to reflect on their **core instruction** around **social emotional learning**. The team coordinated professional development for all school staff around effective **teaching practices** to utilize during morning meetings to support the development of students' social skills. Between the fall and the spring, the school noticed a increase in students' **copng strategies**.

Next year, to continue this growth, the team will support the implementation of a universal **social emotional learning curriculum**. This curriculum will be implemented during the existing structure of **morning meetings** to help build coherence across classrooms. The team will continue to monitor student behavior to inform instruction for all students.

When school teams use student **data** to plan **core instruction**, student outcomes improve.

Measurable Results!
