Design through us or work with a local design company. We partner with designers and contractors to bring your vision to reality.

FROM HENRY SCHEIN BC

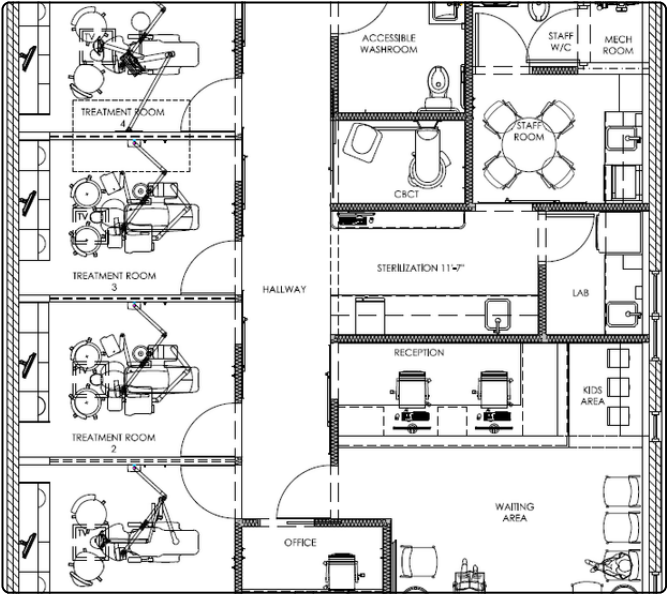

DESIGN FOR YOU

Our internal dental design department allows us to partner with you, your local designer and contractor to bring your vision to reality, while reducing your overall build costs.

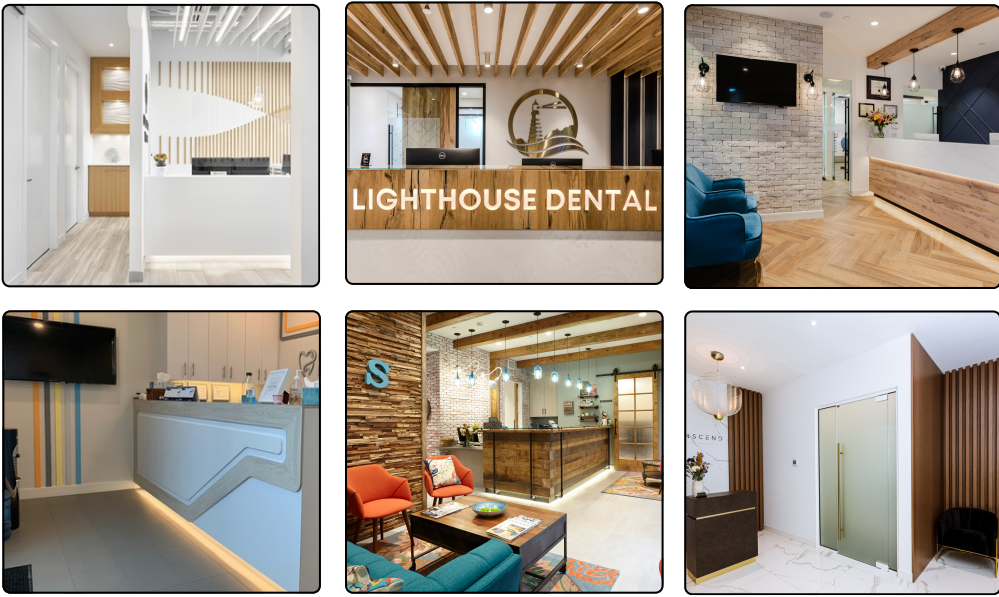

HOW TO BEGIN?

It starts with a conversation... to discuss process, site selection, timelines, your overall vision, preferences, where you want to open a clinic, demographics, and much more. Whether you have a space chosen or are just starting to consider your own office, we can help and connect you to the right professionals.
