

I found a kitten! NOW WHAT?

When you come across a kitten or litter of kittens alone outdoors, you may feel the need to scoop them up and take them inside — but that might not be the best thing for them (or for you!). Read on to learn how you can best help kittens found outdoors.

Are they over 2 months?

NO!

YES!

Once the kittens are over eight weeks old, you can have them safely spayed or neutered at a veterinary clinic. Then, you can...Foster and adopt the kittens. If you have the time and resources, you can foster the kittens for adoption, or adopt them yourself, once they have been spayed or neutered. Otherwise, find a local rescue organization or another caregiver to foster and adopt the kittens.

Has mom not returned after several hours? Step in and help the kittens yourself. We are here to help!

BECOME A FOSTER!

Foster just this litter or begin a lifelong journey! By committing to foster, you help us care for more kittens by opening your heart and home for just a few months to kittens in need!

We provide you all the tools you need to succeed - training, supplies, vetting, and mentorship so you never feel like you are alone.

When the kittens are eight weeks old, or weigh two pounds, they will get their 1st shots, microchips, and discuss when they can be spayed/ neutered.

Once they are spayed/ neutered, they enter into our adoption program. Since we are a foster based organization, we ask you to continue to foster until we have an approved application and a successful meet and greet.

Fosters get a 50% adoption discount!
