ELECTRONIC PRESS KIT

Destroy the Planet is a new hard rock trio from Minneapolis that create engaging anthems with hints of metal and punk fused with pop sensibilities. Their ferocious guitar work and insane drumming harken the over-the-top 80s approach while the vocal melodies are more of a modern radio rock flavor.

Their album Episode 1: Hungry for the Science was mixed and mastered by acclaimed producer Todd Fitzgerald at Winterland studios. The album also features voice narration by former NFL player and current analyst Pete Bercich on the opening track "Twisted".

Destroy the Planet's music has received a ton of positive reviews on various music and radio sites and was Tuneloud's Artist of the Month in April 2022. Their music can be heard on several US radio stations as well as in the UK, Canada, Mexico, and India.

Destroy the Planet is even more exciting when performing live. The band brings unmatched energy and passion when they hit the stage and will skillfully deliver the ultimate rock show!

"If you're a fan of rock, there is more than enough to enjoy in "Episode 1," in fact, I can't think of a single negative thing to say - CurrentMusicThoughts

"Hitting with a wonderfully original sound that will echo for the next few years, 'Episode 1: Hungry for the Science' is a bold debut, one that earmarks the band as a fresh new sound that is destined to go far" - Broken 8 Records

"The overall impressive impact of this kickass album comes from that indefinable oomph that only the best rock and roll power trios seem able to muster" - TunedLoud Magazine
