

**SACKVILLE CURLING CLUB**  
**2018/2019**  
**MAINTENANCE REPORT**

This has been another fairly quiet year as far as maintenance goes.

I have kept Bob Partridge busy again, changing light bulbs and unplugging toilets and sinks.

The dishwasher has not been working properly but because of its age, we cannot find replacement parts for it. We were also having an issue of dishes not washing or drying properly at one point, but after fixing hoses in the solution bottles, it seemed to help a bit.

This year, we had a fan put in the men's downstairs washroom and a door closure put on the main bathroom door. In the near future, an automatic light switch will be installed in this washroom, so the lights will not remain on all the time.

New fire extinguishers were ordered for the compressor room and banquet room as per the Fire Marshall's request.

The boiler for the Club finally reached its "boiling" point and had to be replaced. Glowing Embers (Kevin & Jonathan Read) looked after replacing the boiler and making sure that it worked properly. Carlos was very happy to have heat in his room again!!

Respectfully submitted,

Kathy Best  
Maintenance Director
