

## **GPS One Announces Strategic Partnership with Green Village Services, New Jersey's First Licensed Cannabis Transporter**

Neptune, New Jersey – July 21, 2025

GPS One, a leading transportation management software provider for the cannabis industry, is proud to announce a new partnership with Green Village Services, the first licensed cannabis transporter in the state of New Jersey. This collaboration will bring cutting-edge technology to Green Village Services' operations, enhancing efficiency, transparency, and compliance in cannabis transportation across the state. GPS One is now live and operational in three states, continuing to expand its footprint in regulated cannabis markets.

Through this partnership, Green Village Services will leverage GPS One's advanced software platform to streamline delivery scheduling, optimize routing, and provide real-time tracking for licensed operators. The system's automated manifesting and digital reporting tools are designed to reduce administrative workload and improve operational visibility for both transporters and their customers.

"Green Village Services has set the standard for licensed cannabis transportation in New Jersey, and we're excited to support their mission with technology built specifically for this industry," said Joel Dickerson, CEO of GPS One. "Our platform is designed to help transporters operate more efficiently while providing their customers with the transparency and reliability they need."

Green Village Services, known for its professionalism and strict adherence to regulatory standards, sees this partnership as a key step in expanding its services.

"Working with GPS One allows us to bring best-in-class logistics technology to New Jersey's cannabis market," said Olivia Bakunas, CEO and Founder of Green Village Services. "This partnership ensures our customers receive a modern, seamless delivery experience, which is critical as the industry continues to grow."

### **What This Means for New Jersey Operators**

For licensed cultivators, manufacturers, and retailers, this partnership means:

- **Faster, More Reliable Deliveries** – Optimized routing and scheduling reduce delays and improve on-time performance.
- **Greater Transparency** – Real-time delivery tracking and automated updates provide clear visibility from pickup to drop-off.
- **Improved Compliance** – Digital manifests and automated reporting help operators maintain state-required documentation effortlessly.

- **Less Administrative Work** – Automated workflows mean operators spend less time managing transportation and more time focusing on their business.

As New Jersey's cannabis market expands, this collaboration delivers a much-needed technology solution for operators seeking secure, efficient, and fully compliant transportation services.

### **About GPS One**

GPS One provides transportation management software designed specifically for licensed cannabis transporters, manufacturers, and retailers. With a focus on automation, compliance, and real-time visibility, GPS One helps operators streamline logistics, reduce costs, and deliver a superior customer experience.

### **About Green Village Services**

Green Village Services is the first licensed cannabis transportation company in New Jersey, dedicated to providing secure, compliant, and professional delivery solutions for licensed cannabis operators.
