

It is Nature's way

It is natural to put it right,
To bring back order and balance,
For our Planet Earth to survive.
Where we all depend on one another
And there is a future for our children.
Where there is a flow-on effect
And change constantly happens.
A system that is Nature's natural order
Where Nature will give us a warning,
And demand a fair share for all.
So, if we blatantly ignore the signs
And think we humans are the rulers,
Nature has ways of taking away from us,
What we think we have a right to.
Animals have their ways to keep balance,
But we are ignoring the natural order
So, we all have to face the consequences.
Heat up the planet, then the ice will melt.
There is a lack of love in the world.
Need to slow down population growth.
Stop poisoning the atmosphere.
Polluting waterways or damming rivers.
And stop dumping our waste into the ocean.
We need to halt cutting into the earth.
Fix or replace what's been damaged or taken.
There is enough for all to share, Planet
Earth is made that way,
Needing order and balance,
A cycle of dependency for all
Or everyone pays the price.
This is Nature's way.
