

Small footprint, **HUGE** results

SIMCube, from Total Test Tech, enables a full digital twin in an ultra-small form factor for system testing, training and simulation!

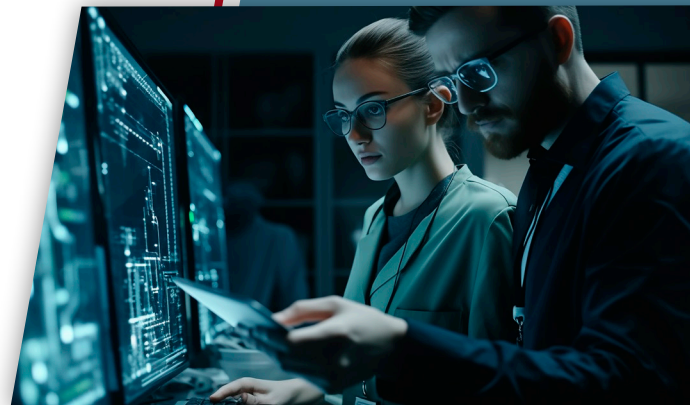

10" CUBED

Over 80 I/O expandable to over 1000 points, works on ANY brand of PLC /HMI and/or DCS, UL Listed 508A

Save your project time and cost with the patented SIMCube process from Total Test Tech.

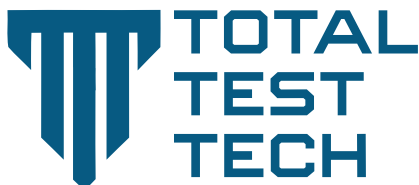

1. Critical processes need to be fully tested
2. Insufficient testing leads to operational problems
3. Bugs in the field cost time, money, and can cause equipment or worker harm
4. SIMCube is the solution

The SIMCube process has been shown to reduce overall testing time by an order of magnitude (10X)

We don't live in a simulated world, we live in a **REAL** world.

Keep that testing real!
