

BBQ & Fire Pit Regulations

BBQ Regulations & Safety

Eagle River Fire receives many inquiries about what is allowed with regard to barbeque grills.

If you live in an apartment building, condominium or other multifamily dwelling you may not operate open-flame cooking devices on your balcony or on patios that are within 10 feet of combustible construction. This includes but is not limited to hibachis, charcoal grills, and wood/pellet burning smokers. HOAs may also have restrictions on use of any type of grill, please check with your HOA covenants. One- and two-family dwellings, which include townhomes, are exempt.

The exceptions also include decks and balconies protected by an automatic sprinkler system. You may also use a propane grill if it utilizes a 20 pound or smaller propane tank. Another option is to use an electric grill, which has no restrictions.

Following these regulations is making a difference. Eagle River Fire has seen a dramatic decrease in structure fires attributed to barbecue grills and recreational fires. We appreciate your cooperation in following these regulations.

Fire Pits and Portable Fire Places.

The use of fire pits and portable fire places is permissible within the Eagle River Fire Protection District if the International Fire Code requirements are met and there are no fire bans in place.

Here are some things to remember about recreational fires and portable fire places:

A recreational fire is limited to a pile size of 3 feet in diameter and 2 feet high. A recreational fire does not require a permit, but anything larger requires an open burn permit (bonfire or agricultural burn).

A recreational fire pit must be at least 25 feet from a structure or combustible material.

Recreational fires are for your pleasure, not for burning yard waste or rubbish. Fuel should consist of cut and dried wood or untreated lumber. If you are burning yard waste you will be asked to extinguish the fire. If your fire creates or adds to a hazardous condition, you will be asked to put it out.

Portable fire places must be at least 15 feet from a structure or combustible material and shall be used in accordance with the manufacturer's instructions. One- and two-family dwellings, which include townhomes, are exempt from this distance requirement.

Please check to see if there are any fire restrictions currently in effect. Information can be found on the Eagle County Government web site.

http://www.eaglecounty.us/Emergency/Fire_Restriction_Information/

The following information is taken from the 2021 Edition of the International Fire Code:

RECREATIONAL FIRE. An outdoor fire burning materials other than rubbish where the fuel being burned is not contained in an incinerator, outdoor fireplace, portable outdoor fireplace, barbeque grill or barbeque pit and has a total fuel area of 3 feet (914 mm) or less in diameter and 2 feet (610 mm) or less in height for pleasure, religious, ceremonial, cooking, warmth or similar purposes.

PORTABLE OUTDOOR FIREPLACE. A portable, outdoor, solid-fuel-burning fireplace that may be constructed of steel, concrete, clay or other noncombustible material. A portable outdoor fireplace may be open in design or may be equipped with a small hearth opening and a short chimney or chimney opening in the top.

SECTION 307

OPEN BURNING, RECREATIONAL FIRES AND PORTABLE OUTDOOR FIREPLACES

307.1.1 Prohibited open burning. Open burning shall be prohibited when atmospheric conditions or local circumstances make such fires hazardous.

307.3 Extinguishment authority. When open burning creates or adds to a hazardous situation, or a required permit for open burning has not been obtained, the fire code official is authorized to order the extinguishment of the open burning operation.

307.4.1 Bonfires. A bonfire shall not be conducted within 50 feet (15 240 mm) of a structure or combustible material unless the fire is contained in a barbecue pit. Conditions which could cause a fire to spread within 50 feet (15 240 mm) of a structure shall be eliminated prior to ignition.

307.4.2 Recreational fires. Recreational fires shall not be conducted within 25 feet (7620 mm) of a structure or combustible material. Conditions which could cause a fire to spread within 25 feet (7620 mm) of a structure shall be eliminated prior to ignition.

307.4.3 Portable outdoor fireplaces. Portable outdoor fireplaces shall be used in accordance with the manufacturer's instructions and shall not be operated within 15 feet (3048 mm) of a structure or combustible material.

Exception: Portable outdoor fireplaces used at one- and two-family dwellings.

307.5 Attendance. Open burning, bonfires, recreational fires and use of portable outdoor fireplaces shall be constantly attended until the fire is extinguished. A minimum of one portable fire extinguisher complying with Section 906 with a minimum 4-A rating or other approved on-site fire-extinguishing equipment, such as dirt, sand, water barrel, garden hose or water truck, shall be available for immediate utilization.

SECTION 308

OPEN FLAMES

308.1.4 Open-flame cooking devices.

Charcoal burners and other open-flame cooking devices shall not be operated on combustible balconies or within 10 feet (3049 mm) of combustible construction.

Exceptions:

1. One and two-family dwellings
2. Where buildings, balconies and decks are protected by an automatic sprinkler system.
3. LP-gas cooking devices having LP-gas container with a water capacity not greater than 20 pounds [nominal 1-pound (0.454 kg) LP-gas capacity].
