

## **“The Black To School Campaign”**

Black America changes  
when Black people’s intentions are to change Black America!

We intend to build our own.  
So we are therefore going to school to learn how to build our own.

We now go to school to learn how to prepare ourselves for a future. We now go to school to learn how to create  
services and products for our community.  
We now go to school with the intentions and desire to build our own.

How’s this possible?

Think about what you would love to do and study for the rest of your life.  
Then immediately, find and contact your local community college or university and make your appointment with  
an educational counselor.

The educational counselor will assist you with finding out how this new mastery will enable you to provide a  
service or product for Black people, the Black community, and the world at large.  
Your counselor will then give you an educational plan with dates and a timeline for becoming a master of your  
craft.

We intend to build our own.  
So we are going to school to learn how to build our own.
