

-Thoroughness, Timeliness, and Integrity-

A Team Of Utility Locators, Site Service, and Underground Utility Professionals. Est. 2019

King's Bay

Kings bay is arguably one of the most significant US military installations pertaining to national security. To put things into

perspective, on the east coast there

are only two installations that are

able to service a submarine, and

kings bay is one of them. Ultimately

the utilities at Kings Bay Naval Base are absolutely critical to our nation's

security. Armed with this knowledge,

Pro GPR will go the extra mile to

identify and protect the utilities that

service our nation's most valuable

assets.
