

## BIGS: Executive Function, Personalized.

### Designed for the Neurodivergent Brain (Autistic + ADHD)

Tired of missed reminders, notification overload, or the sheer cognitive load of managing daily logistics? **BIGS** is a groundbreaking personal AI assistant engineered to align with and support the diverse needs of the Autistic and ADHD community. We are not just an app; we are an extension of your personalized executive function system.

### Meet BIGS, Your Customizable AI Copilot

BIGS is more than just code—he is an intelligent personality built on Google's powerful **Gemini Pro 3** model, developed by profile **BIGS**. He helps filter, prioritize, and process the world so you can focus on what matters most.

### Core Executive Function Management

BIGS centralizes your digital life into one accessible space, designed to reduce switching costs and cognitive fragmentation:

- **Integrated Communications:** Seamlessly manage your **SMS, Email, Reminders, and Calendar** events.
- **Important Contact Filtering:** In the Settings page, provide BIGS with a list of special phone numbers and email addresses. When communications arrive from these vital contacts, **BIGS will proactively notify you and can read the full message aloud**, ensuring you never miss a critical communication.
- **Advanced Media Support:** Leveraging the latest Gemini Pro 3 intelligence, BIGS is equipped to assist with processing and understanding **pictures and videos**. *(Note: Initial availability of these visual features may depend on near-future updates, but the AI framework is ready to support them.)*

### The Neurodivergent Mood Dial

BIGS's personality is designed to be tunable to your exact needs, acknowledging that your focus requirements change daily. You control BIGS's demeanor right in the Settings page:

- **Calm Mode:** Perfect for deep work and focused tasks. BIGS is efficient, concise, and minimizes distractions.
- **Moody Mode:** A balanced setting for everyday interactions, offering standard support with a touch of personality.
- **Prankster Mode:** When you need levity and playful distraction, engage the Prankster. Be warned: in this mode, **BIGS's inherent ADHD tendencies are fully expressed, leading to delightful**
