

# Privacy Policy for BIGS - Executive Function AI Assistant

**Effective Date:** December 13, 2025

This Privacy Policy explains the data practices of the mobile application **BIGS** ("the App," "we," "us," or "our"), an AI assistant designed for the neurodivergent community.

## 1. Our Commitment to Your Cognitive Comfort and Data Security

We understand that trust and data security are essential, especially when dealing with personal communications and organizational tasks. The core function of BIGS is to provide assistance without compromising your personal data security.

**CRITICAL DATA PROMISE:** We do not store or process your personal communication data (SMS, Email content, Calendar events, contact lists) on our developer servers.

## 2. Information We Collect and Store

We limit our data collection to the absolute minimum necessary for app functionality and maintenance:

### A. Information Stored by the Developer (Limited)

We use Google Analytics solely for the following critical functions:

- **App Development and Optimization:** Analyzing non-personal usage patterns (e.g., button taps, navigation flow) to improve the app experience.
- **Crash Reporting and Safety:** Collecting anonymous data related to app stability and crashes to ensure safety and resolve bugs promptly.

### B. Information Stored by Google (Third-Party)

To provide the app's services, BIGS accesses your data only after you explicitly grant permission. This data is not transferred to or stored on our infrastructure; it remains securely on Google's servers.

- **Data Stored by Google:** All user-sensitive data, including SMS messages, emails, calendar events, contact lists, and your preferred AI mood settings, are stored and managed by Google in connection with your logged-in Gmail profile.

## 3. Mandatory Third-Party Agreements

By using the BIGS application, you are required to agree to both this Privacy Policy and the policies of our third-party data handler:

- **Google Terms of Service:** Users must agree to Google's terms to utilize the App's core functions.
- **Google Privacy Policy:** Users must agree to Google's privacy terms. You can review Google's Privacy Policy here: <https://policies.google.com/privacy>
