Maxillary sinusitis is a common patient complaint that can present with a wide variety of symptoms and causes. A proper diagnosis of these cases can prove to be difficult. This seminar will discuss how to use a multidisciplinary approach to diagnose and treat patients with maxillary sinusitis associated with a dental etiology.

Dr. Rowshan Ahani, a UCLA dental graduate, received his Endodontics certificate and M.S. in Oral Sciences from SUNY in 2001. He is a published Diplomate of the American Board of Endodontics who runs a successful endodontic practice in Daly City. Dr. Ahani enjoys spending time with his wife, three sons, and competes as a black belt in Brazilian Jiu-Jitsu.

*The NCADA is a non-profit professional organization whose goal is to provide quality continuing education at affordable fees to dentists of all backgrounds, for generalists and specialists, their office staff, and dental laboratories in Northern California. We promote camaraderie, community, and life-long learning amongst our members and guests.*
