

YACHTREMOTE.AI

Your Yacht. Our Watch. 24/7.

The Future of Superyacht Safety, Security, and Control.

An integrated solution for visionary owners and world-class builders.

When Seconds Count, Who is Your Second Watch?

Even the most professional and experienced crew cannot be everywhere at once.

The maritime environment is unpredictable. Sudden, localized weather events can develop in minutes. A simple, unlatched hatch can compromise vessel integrity. A mechanical fault, invisible until it's critical, can endanger everyone on board.

Tragic incidents like the 2024 sinking of the 56m S/Y *Bayesian* highlight a stark reality: catastrophic failure, whether from unforecasted "downburst" winds or rapid top-down water ingress, can happen faster than an onboard crew can humanly react.

Our Solution: A 24/7 Onshore Command Center

We provide a dedicated team of maritime, security, and medical experts who act as your vessel's digital co-pilot. Operating from redundant, RINA/ABS-approved command centers in Dubai and Amsterdam, we see what your crew can't, identify threats before they escalate, and provide an immediate, expert-level response.

We don't replace your crew. We empower them.

Complete Oversight. Total Peace of Mind.

YachtRemote.ai integrates all your vessel's critical systems into a single, intelligent, and constantly monitored dashboard.

1. 24/7 Remote Monitoring & Control

Our core service. We monitor thousands of data points in real-time:

- **Vessel Integrity:** Bilge levels, watertight door/hatch status, and list/heel angles.
- **Systems Health:** Engine vitals, generator performance, and power grid stability.
- **Environment:** Advanced micro-weather tracking, anchor-drag alerts, and wave-state analysis.

2. Advanced Security & Threat Detection

AI-Driven Analysis: Our system learns your vessel's "normal" operation and flags anomalies.

- Monitors for unauthorized boarding attempts or suspicious vessel approaches.
- We provide immediate alerts and coordinate directly with local maritime authorities.

3. Integrated Telemedicine

24/7 Doctor Access: In a medical emergency, you are instantly connected via live video to a certified maritime doctor.

- Our "Elite" and "Sovereign" tiers include an integrated medical suite with a defibrillator, oxygen, and diagnostic tools.

4. Emergency Remote Override

(Sovereign Tier) The Ultimate Safety Net: In an extreme scenario—such as crew incapacitation or a critical security breach—our licensed remote captains can, with your authority, take partial or full remote control of the vessel.

Protect Your Asset, Your Guests, and Your Privacy.

As an owner, your primary concerns are safety and peace of mind. Our service is designed to deliver both, directly and discreetly.

Unmatched Safety

Enjoy your time on board knowing that a dedicated team of experts is monitoring your vessel's vital signs, 24/7. We provide an unparalleled layer of protection for your family, guests, and crew.

Ultimate Asset Protection

Our predictive maintenance alerts identify potential engine failures **before** they happen. Our instant ingress alarms can prevent a minor issue from becoming a catastrophic loss, saving millions.

Enhanced Privacy

Our "Private-Crew Mode" (Sovereign Tier) offers a new level of discretion. For private moments, our onshore center can remotely manage vessel monitoring, ensuring ultimate privacy without compromising safety.

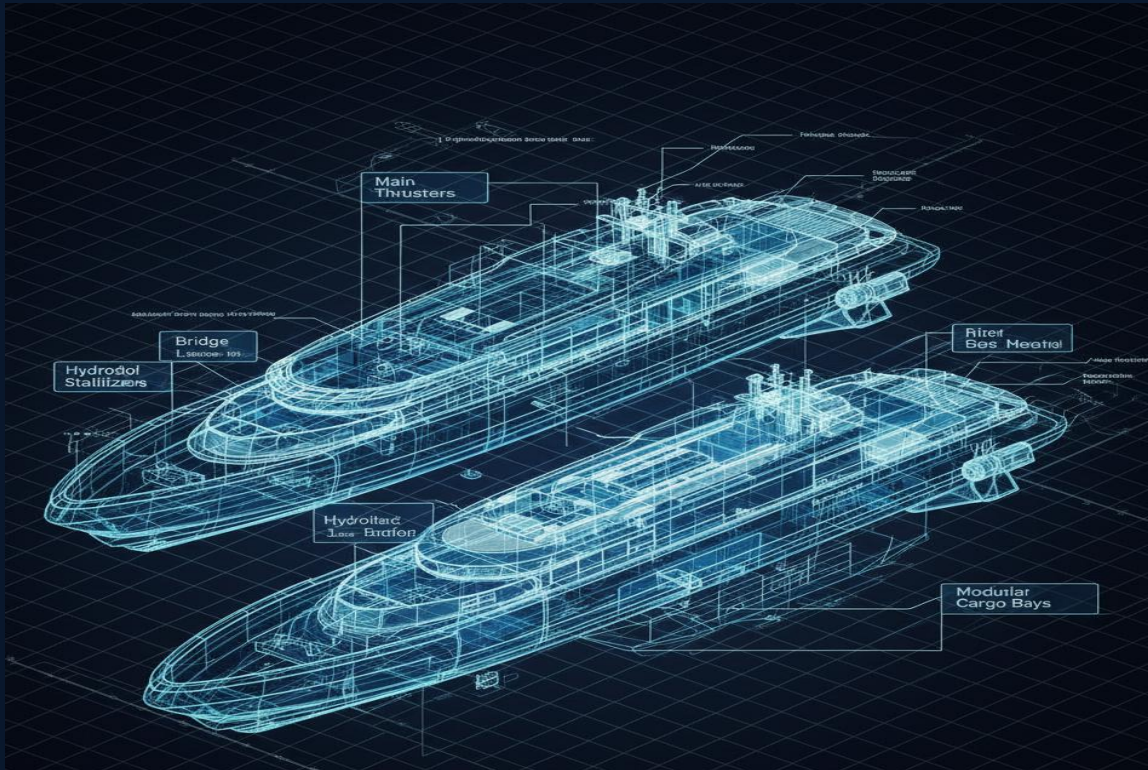

Financial Wisdom

Our RINA/ABS-approved service is recognized by leading maritime insurers as a major risk-mitigation tool, offering significant ****premium discounts**** to our clients.

Create the Superyacht of Tomorrow, Today.

As a builder, your reputation is built on quality, innovation, and delivering on a client's vision. Partnering with us gives you a powerful competitive advantage.

Gain a Competitive Edge

Offer your clients a vessel that is demonstrably safer, more secure, and "future-proof." Integrating our system positions your brand at the forefront of maritime technology.

Seamless "Keel-Up" Integration

A new build is the perfect opportunity. By integrating our advanced sensor packages and communication links during construction, you deliver a cleaner, more robust, and more capable system than any retrofit.

A New Standard of Excellence

Showcase your commitment to the highest standards. Our RINA/ABS-approved control centers add a verifiable layer of technological and safety sophistication to your builds.

A Strategic Partnership

We offer a "white-label" solution. Integrate our service as your own branded, high-margin, "smart yacht" package. We provide the 24/7 backend; you strengthen your client relationship.

A Scalable Solution for Every Vessel.

We offer three distinct packages, allowing you to choose the precise level of oversight your vessel requires.

TIER 1 ESSENTIAL GUARDIAN

- ✓ 24/7 Remote Monitoring (Hull, Bilge, Engine)
- ✓ Automated Open-Hatch & Ingress Alerts
- ✓ Advanced Weather & Route Alerts
- ✓ Basic Security Checks & Perimeter Alerts
- ✓ Onshore Crew Notification System

RECOMMENDED

TIER 3 SOVEREIGN GUARDIAN

All features from Elite, PLUS:

- ✓ Emergency Remote Control & Override
- ✓ "Private-Crew" Mode
- ✓ Premium Cybersecurity Protection
- ✓ Dedicated VIP Service Team

TIER 2 ELITE GUARDIAN

All features from Essential, PLUS:

- ✓ Integrated Telemedicine Suite
- ✓ AI-Driven Predictive Maintenance Analysis
- ✓ Enhanced Security (AI Threat Detection)

Future-Proofing Your Investment: Our AI & Robotics Roadmap

Our service is not just for today. It's an evolving platform.

The high-quality vessel data we gather (sensor readings, incident logs, operator decisions) is building the most robust maritime data library in the world. This data is actively training the next generation of AI-driven safety solutions.

Partnering with YachtRemote.ai means you are investing in a system that grows with you. Our roadmap leads directly to:

Advanced AI Agents

That autonomously manage onboard systems, optimize fuel consumption, and predict safety risks in real-time.

Humanoid Robotics

Capable of performing physical onboard checks, security patrols, and assisting in emergencies, providing a true 24/7 physical presence.

By choosing us, you are future-proofing your vessel, ensuring it remains at the pinnacle of technology and safety for years to come.

Secure Your Consultation.

Whether you are an owner, captain, or builder, the next generation of maritime safety is here.

For Owners & Yacht Management

Contact us for a private, confidential assessment of your vessel or fleet. We will demonstrate our system and coordinate with your insurance provider to secure your premium discount.

For Builders & Shipyards

Let's discuss a strategic partnership. We can provide technical specifications for new build integration and explore a white-label solution to enhance your brand's portfolio.
