

NARMADA - N

An effective neutralizing agent for neutralizing alkaline finishing processes

- Ensures complete neutralization of the bath preventing any problem due to alkali in the subsequent processes.
- Neutralizes any alkali on the fabric to the core thus preventing any dullness due to residual alkali / core alkali migration .
- Does not cause any severe fiber damages as compared to mineral acids .
- Exhibits good ecological profile .

CHARACTERISTICS

Appearance : Colorless to light yellow clear liquid

Chemical Nature : Blend of organic buffers

APPLICATION

Discontinuous process : 1.0 – 2.0 g/l NARMADA – N

In last rinsing bath after alkaline process . The exact dose has to be decided depending on the alkalinity .

Continuous Process : NARMADA – N can be used in the counter flow rinsing / washing system for neutralization , the application amount depending on the residual alkali on the fabric .

Storage Stability : Minimum 4 months under normal conditions of storage
