

## 2024 Focus is Industry Events

Help us get this simple message about neurodiversity out in 2024:

1. Insurance depends on neurodivergent talent.
2. More adults find out every day they are neurodivergent, usually through their children.
3. MINOR accommodations to diet, workstation, and personal expectations can YIELD tremendous results.

## Not an Entitlement

We exhibit at events and in your office to make neurodivergent insurance professionals realize they are not alone and to help them be more productive at work and happier at home.
