

National High School Rodeo Shooting Sports Rules/Guidelines

Revised February 5, 2026

Introduction

The NHSRA established shooting sports as part of the activities scheduled for National Finals Rodeo(s) in 2005 in partnership with the NRA (National Rifle Association). No longer supported by the NRA, this program continues to thrive and in January 2022 became an event within the National High School Rodeo Association that will be offered in all states/provinces where interest is shown.

Section 1: Qualified Supervision- Roles and Responsibilities

The National High School Rodeo Association is comprised of 44 states, 5 Canadian Provinces, Australia, Mexico, Guatemala, and New Zealand. Each state, province and country have a National Director as well as an elected or appointed board.

Each state, province or country interested in forming shooting sports teams should appoint or elect a Shooting Sports Coordinator. Contact information for this person must be reported to the National Shooting Sports Coordinator in the Denver, Colorado office. Information regarding changes, updates and rules are communicated from the National Office to the individual Shooting Sports Coordinators for each state, province or country as well as to National Directors and State/Provincial Secretaries.

State/Provincial/Country Shooting Sports Coordinator

- Must be 21 years of age or older
- NRA certified instructor for one or both disciplines offered in the NHSRA (*recommended*) or have equivalent training/experience in the disciplines.
- Current NRA Range Safety Officer certification (*recommended*)

NRA Range Safety Officer (Recommended)

- Twenty-one years of age or older and holds current NRA range safety officer credentials
- In charge of the firing line at any time it is in operation
- May not leave the firing line any time it is in operation
- May or may not be the same person as the State/Provincial/Country Shooting Sports Coordinator

COMPETITION OFFICIALS

Officials will be thoroughly familiar with the conditions of the program and with the National High School Rodeo Association Rules.

- **Arena Director** - The Arena Director is the official primarily responsible for the efficient conduct of the entire tournament. He/she may change match and firing conditions from those shown in the program, provided an announcement is posted for the information of all competitors, and that such changes are not contrary to current NHSRA Rules. The Arena Director is also directly responsible for the efficient operation of the range and scoring and for the safety and proper discipline of all tournament operating personnel, competitors and spectators. Instructions from the Arena Director for the operation of the tournament will be complied with by all people on the range. The Arena Director will use the best judgment at all times. His/her behavior and decisions must be characterized by absolute impartiality, firmness, courtesy and complete awareness. In the application of these Rules the Arena Director will confer with the NHSRA Shooting Sports Coordinator or Committee on any doubtful point and will be guided by their decision.
- **Coordinator** - The National Coordinator is not an administrative or operating official and is not responsible for the behavior or efficiency of either range or scoring personnel. It is the responsibility of the coordinator to properly interpret and apply all NHSRA Rules. Except in an emergency involving the safety of personnel or property, the coordinator will not give instructions directly to tournament operating personnel but will give all such instructions through the Arena Director. In the event of a disagreement between Tournament Officials, the Coordinator shall prevail at the match with recourse only to the National High School Rodeo Association Shooting Sports Committee. It is the duty of the coordinator to render a complete report to the NHSRA covering all phases of the tournament. The coordinator may disqualify all or any portion of the score, if, in the coordinator's opinion, the

conditions warrant such action.

- **Chief Range Safety Officer** – NHSRA Chief Range Safety Officers are people who possess the knowledge, skills, and attitude essential to organizing, conducting, and supervising safe shooting activities and range operations. CRSO personnel will give instruction and clarification on rules and proper conduct to both competitors and other Range Safety Officer personnel on the firing line.
- **Range Safety Officer** - The Range Safety Officer (RSO) supervises shooting activities as prescribed by the range Standard Operation Procedures (SOPs), NHSRA Rulebook and instruction provided by the Chief Range Safety Officer.
- **Student Event Director** - The Student Event Directors are elected at the first Student Delegate Meeting by Student Delegates, preferably from those entered in the shooting sports competition. The student(s) elected should only be entered in the shooting competitions only to avoid arena conflicts with rodeo events. There will be up to two Rifle Shooting Sports Event Directors at the Junior High Finals and up to two Rifle and Trap Shooting Sports Event Director the High School Finals. The student directors will be present during the event they are overseeing for the duration of the event and will be the first point of contact in the event of a challenge or protest by a contestant or provide an equally knowledgeable replacement for this duty. It is the Student Event Director's responsibility to understand and follow all NHSRA Rules and Regulations, to escalate issues as they arise to the Arena Director and be present during challenge or protest resolution meetings with the contestant.

Section 2: Rifle Shooting Sports Program

Purpose: To introduce NHSRA members into shooting sports programs

Rifles: Junior High and High School Division- Any .22 caliber rimfire .22 short, .22 long, or .22 long rifle with not less than a 2-pound trigger pull, and which weighs not more than 8 ½ pounds when equipped with sights. Telescopic sights must be set at 10 power or less. No portion of the rifle or any attachment to the rifle shall extend more than 3 inches beyond the rear of the shooter's shoulder. Silencers/suppressor/muzzle breaks are prohibited.

Ammunition: Rimfire cartridges commercially catalogued as the ".22 Short, ".22 Long, or ".22 Long Rifle which have an over-all length not more than 1.1 inches and loaded with a lead or alloy bullet of not larger than .23-inch diameter. *Hollow point, tracer, incendiary or explosive bullets are specifically excluded from ammunition authorized for match use.*

Range: A NHSRA approved range (approved by the State/Provincial Shooting Sports Coordinator), public or private range or club for cartridge firing rifles.

Training: *Recommended:* NRA Rifle FIRST Steps (3 hours) or NRA Basics of Rifle Shooting Course (8 hours) taught by an NRA Rifle Instructor or NRA/USA Shooting/CMP certified rifle coach. If the contestant has completed Hunter's Safety training, this training would not be necessary. **Please note: This training is RECOMMENDED, not REQUIRED.**

Safety: Eye and ear protection is REQUIRED.

Range Supervision: A NHSRA approved coordinator or certified range safety officer is to directly supervise all live fire on the range.

Ratio: One approved NHSRA coordinator or range safety officer or rifle instructor to eight shooters. The number of range safety officers at the National Finals events is 1/per 5 shooters on the firing line.

Course: Refer to NHSRA Light Rifle Rules.

Events: A rifle shooting event MUST be submitted and approved by the National Office on a Rodeo Activity Form a minimum of 30 days prior to the State/Provincial event.

Section 3: Shotgun Shooting Sports Program

Purpose: To introduce NHSRA members into shooting sports programs

Shotguns: High School Division Only- Youth or adult size 20, 16 or 12-gauge shotguns may be used.

Ammunition: Correct ammunition for the shotgun being fired. *Tracer, armor-piercing and explosive ammo are not allowed.*

Range: A NHSRA approved range (approved by the State/Provincial Shooting Sports Coordinator), public or private range or club.

Training: *Recommended* NRA Shotgun FIRST Steps (3 hours) or NRA Basics of Shotgun Shooting Course (8 hours) taught by an NRA Shotgun Instructor or NRA/USA Shooting/CMP certified shotgun coach. If the contestant has completed Hunter's Safety training, they would not be required to take this training. **Please note: This training is RECOMMENDED, not REQUIRED.**

Safety: Eye and ear protection is REQUIRED.

Range Supervision: A NHSRA approved coordinator or certified range safety officer is to directly supervise all live fire on the range.

Ratio: One approved NHSRA coordinator or range safety officer or shotgun instructor per 5 shooters.

Course: Refer to NHSRA Shotgun Rules.

Events: A shotgun shooting event MUST be submitted and approved by the National Office on a Rodeo Activity Form a minimum of 30 days prior to the State/Provincial event.

SECTION 4: RANGE OPERATION

General Equipment Common to all Shooting Disciplines:

Eye and Hearing Protection. Each shooter MUST wear hearing and eye protection appropriate for each shooting discipline. It is recommended that spectators in immediate, designated areas also wear protection.

Ammunition Control. Only the number of rounds of ammunition required to complete the competition should be allowed on the firing line.

First-Aid Kit. It is recommended that a first-aid kit be readily available for the range. It should be well stocked and include items appropriate for potential injuries unique to the specific shooting sports venue. Assistance with preparing these kits is usually provided by local EMT or hospital personnel. Check on this availability in your local community.

Emergency Communications Device. If cell phone coverage at your venue is not available, make sure there is a landline that can be used in case of emergency. Prepare a list in advance of any medical service numbers you may need specific to your exact location.

Safe Firearm Handling. Each firearm must be treated as if it were loaded. With that in mind, the following universal rules of safe firearm handling MUST be followed at all times:

- **Always** keep the firearm pointed in a safe direction.
- **Always** keep your finger off the trigger and outside the trigger guard until you are instructed to shoot.
- **Always** keep your firearm unloaded until instructed to load/shoot.
- **Know** your target and what is beyond it.
- **Be familiar with the safe operation of your firearm.**
- **Always use the correct ammunition for your firearm.**
- **Unattended firearms should not be accessible to unauthorized persons.**

SECTION 5: NHSRA RIFLE RULEBOOK

National High School Rodeo Light Rifle Rules

REVISED February 5, 2026

NATIONAL HIGH SCHOOL RODEO ASSOCIATION Official Rules for Light Rifle Matches

SAFETY IS YOUR BUSINESS! READ THE RULES

These rules provide for the efficient and orderly operation of a competition. But *that's not all*. Many local range regulations exist for one reason alone SAFETY. Others serve a dual purpose, smooth range operation and SAFETY. It's your responsibility as a competitor or as a competition official to be familiar with the rules and to know the meaning behind those which are safety oriented.

NRA Firearm SAFETY RULES (Adopted by the NHSRA) The fundamental NRA rules for safe firearm handling are:

- ☐ Always keep the firearm pointed in a safe direction.
- ☐ Always keep your finger off the trigger until ready to shoot.
- ☐ Always keep the firearm unloaded until ready to use.

When using or storing a firearm, always follow these NRA (Adopted by the NHSRA) rules:

- ☐ Be sure the firearm is safe to operate.
- ☐ Know how to safely use the firearm.
- ☐ Use only the correct ammunition for your firearm.
- ☐ Know your target and what is beyond.
- ☐ Wear eye and ear protection as appropriate.

- ❑ Never use alcohol or drugs before or while shooting.
- ❑ Store **firearms** so they are not accessible to unauthorized persons.

NHSRA EVENT

1.0 NHSRA Event - NHSRA Event is a competition which is authorized by the National High School Rodeo Association. The program, range facilities and officials must comply with standards established by NHSRA and must be approved by the National Office by submitting a Rodeo Activity form 30 days prior to the event via the State/Provincial Secretary.

1.1 NHSRA Sanctioned Events - A Sanctioned Event is an event that has been approved by the National Office. Such matches must be conducted by an NHSRA affiliated organization.

1.2 Types of NHSRA Matches

(a) Match - A complete event as indicated in the schedule for the awarding of certain specific prizes. A match may consist of one or several stages.

(b) Stage - A portion of a match which consists of one or more strings fired in one position, distance, time allowance, or target.

(c) Unsquadded Individual Match- A match in which the competitor is not assigned a definite relay or target. The competitor reports to the official registration area within the time limits specified on the official posting board and is then assigned to a target and a relay in which to fire. For the National Finals event(s), report times will be listed on the official Draw Posting Board prior to the event.

2. ELIGIBILITY OF COMPETITORS

Eligibility of Competitors – Competitors qualify for the National Finals events at their State/Provincial Finals.

INDIVIDUALS

2.1 Members of the National High School Rodeo Association - Any individual member of the Association or Junior High Division of the Association in good standing.

3. EQUIPMENT AND AMMUNITION

This section defines authorized equipment. Where alternative types of equipment are shown, the least restrictive conditions apply unless the tournament programs set forth limitations.

3.1 Light Rifle - Any .22 caliber rimfire .22 short, .22 long, or .22 long rifle with not less than a 2-pound trigger pull, and which weighs no more than 8 ½ pounds when equipped with sights. No portion of the rifle or any attachment to the rifle shall extend more than 3 inches beyond the rear of the shooter's shoulder. The same rifle must be used throughout all stages of any one match (except aggregate) except in the case of a malfunction or disabled rifle when the competitor may change rifles with permission of the Chief Range Officer. **Silencers/suppressor/muzzle breaks are prohibited.**

3.2 Trigger Guard - A rifle must be equipped with an effective trigger guard. Lack of a trigger guard constitutes an unsafe rifle.

3.3 Sights-

(a) Metallic

(1) **Non-corrective:** Any sighting system, constructed of metal or equivalent, which provides a method of aiming or aligning 2 separate but visible sights, or reference points mounted on the rifle, including tube sights and non-magnifying color filters.

(2) **Corrective:** Same as (1), except that a lens or system of lenses, not containing an aiming reference or reticle at the focal plane of any such lens or system of lenses, may be included in such system.

(b) Telescopic - Any sighting system which includes a lens or system of lenses and an aiming reference or reticle at the focal plane of a lens or system of lenses. Illuminated reticles are allowed. Telescopic sights must be set at 10 power or less. A scope greater than 10 power will be taped **at safety check/inspection**. If a scope needs to be adjusted during the event an RSO must be present, and the adjustment can only happen during the prep period prior to each shooting stage.

(c) Any - Any sight without restriction as to material or construction.

(d) Prohibited - Any sighting device programmed to activate the firing mechanism is prohibited.

3.4 Shooting Kits - The shooting kit may not be placed forward of the shooter's forward shoulder on the firing line, except that in the standing position a shooting kit, table, or stand may be used as a rifle rest between shots. The shooting kit, table, or stand may not be of such size and construction as to interfere with shooters on adjacent firing points or to constitute a wind break. Shooting stand must be set no taller than shoulder height of contestant when in the respective firing position stance.

3.5 Personal Wind Indicators – Are not permitted.

3.6 Shooting Mats or Ground Cloth – Shooting Mats or ground cloth may be used providing it is not constructed or used in a manner to provide artificial rest or support.

3.7 Gloves- Gloves may be worn which do not form an artificial support.

3.8 Shooting Coats - Are not permitted. **OUTERWEAR IS NOT ALLOWED AT THE NATIONAL FINALS EVENTS.** In addition, outer clothing, for example but not limited to vests, sweatshirts, and jackets, worn that may be used to provide support or advantage are not allowed unless weather conditions dictate. It will be up to the sole discretion of the Arena Director and CRSO to determine this need.

3.9 Shooting Trousers - Are not permitted.

3.10 Padding - Shoulder pads, sling pads and elbow pads may be worn while shooting on the outside of clothing, provided they are constructed so as not to provide artificial support. Compression elbow pads that extend more than 4" either direction from the elbow are prohibited during the match. All equipment must go through safety inspection.

3.11 Slings –Unless otherwise specified in the conditions of the match by the Arena Director, the rifle sling may be used in prone and kneeling positions only. There are two types of slings allowed (unless otherwise specified by the Arena Director). No part of the sling under tension may touch the rifle stock except at the sling swivel and/or handstop.

A. Single point sling of the arm cuff type consisting of a quick detach at the forearm or the hand stop. Sling cuff will be attached to the upper arm with sling running on the outside or inside of the forearm. At no time will the sling be between the palm of the hand and the stock / body of the rifle.

B. Two-point sling, consisting of two attachment points, one at the forearm or hand stop, the second point will be at the buttstock of the rifle on the bottom of the stock. The sling will be positioned from the rear attachment point on the buttstock across the **front and/or chest** of contestant's body (not across the back, shoulders or neck), underneath and around the outside of the upper arm, sling will then proceed forward on the outside or inside of forearm. At no time will the sling be between the palm of the hand and the stock / body of the rifle. At no time will the arm be placed between the separate straps of the sling to act as an arm cuff. **A separate cuff may not be attached to a two-point sling.**

3.12 Kneeling Roll - A cylindrical cushion for shooting in the kneeling position; maximum dimensions will be 9.84 inches long (25 cm) and 7.08 inches in diameter (18 cm) and made of soft and flexible material.

3.13 Butt plates and hook - A butt hook projecting more than 153 mm (6.02 inches) past the rear of a line, which is perpendicular to a line drawn through the axis of the bore of the rifle, and which is tangent to the deepest part of the butt plate depression that normally rests against the shoulder. It must have a total outside length around any curve or bend of not more than 178 mm (7.01 inches). The hook must remain in line with the axis of the bore (no rotation around the body at any time or in any position). No part of the hook can touch the ground during competition. Shoulder hooks and top hooks are not allowed. See pictures below.

3.14 Release Triggers - Triggers which function on release are prohibited.

3.15 Ammunition -Rimfire cartridges commercially catalogued as the “.22 Short, “.22 Long, or “.22 Long Rifle which have an over-all length not more than 1.1 inches and loaded with a lead or alloy bullet of not larger than .23-inch diameter. *Hollow point, tracer, incendiary or explosive bullets are specifically excluded from ammunition authorized for match use.*

3.16 General - All devices or equipment which may facilitate shooting, and which are not mentioned in these Rules, and which are contrary to the spirit of these Rules and Regulations, are forbidden. The Arena Director or CRSO shall have the right to examine a shooter's equipment or apparel. The responsibility shall be upon the competitor to submit questionable equipment and apparel for official inspection and approval in sufficient time prior to the beginning of a match so that it will not inconvenience either the competitor or the official.

3.17 Eye Protection- All competitors and other personnel in the immediate vicinity of the range complex must wear eye protection devices. Must show the ANSI Z87.1 (**and/or the equivalent standard for all countries involved**) safety rating for eye protection devices.

3.18 Ear Protection - All competitors and other personnel in the immediate vicinity of the range complex must wear hearing protection devices. Only sound reducing devices may be worn by competitors forward of the ready line.

3.19 Empty Chamber Indicator (ECI) – An ECI is required in all rifle competitions to indicate that the chamber is empty. The ECI must be continuous from chamber to muzzle visible at both ends. A simple method is a piece of high-visibility heavy monofilament trimmer line, cut approximately 12 inches longer than the barrel of the firearm. When inserted in the barrel, approximately 6 inches of the line should be visible at both the muzzle and the breech. The empty-chamber indicator must be inserted from the breech of the rifle. See: <https://www.brownells.com/gun-cleaning-chemicals/brushes-amp-bore-snakes/bore-brushes/bore-whips-by-swab-its-22-cal-prod73560.aspx>

3.20 Audible Timing Devices - Audible timing devices are allowed.

3.21 Electronic Devices-Radios, tape recorders, or any type of sound producing, or communications systems including cell phones/smart watches are prohibited forward of the ready line except hearing aids, medical devices and those devices necessary for range control.

4. TARGETS

- (a) Rifle range is 50 yards.

4.1 Official Targets- Orion 50 yd conventional 6 bull target (SKU:TAR0042 equivalent to NRA A23 target) will be used. 3 shots may be fired on each record bulls' eye. For more information, please visit: <https://www.scopos.tech/50yd-conventional-rifle-6-bull-target-scanner-camera.html>

5. POSITIONS

Positions - The positions for use in a match shall be stated in the program under the conditions of the match and shall be in accord with the definitions of positions prescribed in this section.

No portion of the shooter's body or equipment may rest upon or touch the ground in advance of the firing line.

5.1 The Ground - All references to "the ground" in the following position rules are to be construed as applying to the surface of the firing point, floor, such as shooting mats, or platforms as are customarily used on shooting ranges.

5.2 Artificial Support - Any supporting surface except the ground not specifically authorized for use in the Rules for the position prescribed. Digging or use of elbow or heel holes at the firing points or the use of depressions which form artificial support for the elbows, arms, or legs is prohibited. Use of artificial support including back braces, use of magazines, vertical handle on the firearm to apply pressure in either direction is prohibited. Exceptions authorized by NHSRA for a physically handicapped shooter.

5.3 Position of Rifle Butt-In all positions, except standing (Rule 5.6), the butt of the rifle must be held against the front of the shoulder on the outside of the shirt and must not touch the ground.

5.4 Prone - Body extended on the ground, head toward the target. The rifle will be supported by both hands and one shoulder only. No portion of the arms below the elbows shall rest upon the ground or any artificial support, nor may any portion of the rifle or body rest against any artificial support. The forearm supporting the rifle shall form an angle with the line from the point of elbow contact to the target of not less than 30°. (Measured through the axis of the forearm.)

5.5 Kneeling - Buttocks clear of the ground but may rest on one foot. The rifle will be supported by both hands and one shoulder only. The elbow of the arm supporting the rifle rests on the knee or leg. The wrist of the supporting hand must be free of all support. The elbow of the trigger arm will be free from all support. One knee must be touching the ground or shooting mat. The shooter may be on all, partially on, or all off the shooting mat. A roll as described in Rule 3.12 may be placed under the instep provided the foot is placed toe down at an angle not greater than 45 degrees from the vertical. Only the trousers and underclothing may be worn between the shooter's buttocks and heel. No other article may be placed between these two points. If the kneeling roll is not used, the foot may be positioned at any angle, to include placing the side of the foot and the lower leg in contact with the ground.

Contact area/placement for elbow to knee-

- a) Contact area of knee - 4 inches from center of knee (point of knee when bent in competition position) in either direction.
- b) Contact area of elbow - 4 inches from center of elbow (point of elbow when bent in competition position) in either direction.
- c) No portion of the arm beyond this 4" may be supported by the leg.

5.6 Standing - The shooter shall stand free with both feet on the ground or at his/her mat without any other support. The rifle shall be held with both hands and the shoulder (upper right chest) or the upper arm near the shoulder, the cheek and the part of the chest next to the right shoulder. However, the rifle must not be supported by the clothing or chest beyond the area of the right shoulder and right chest. The left upper arm and elbow may be supported on the chest or on the hip. The use of the sling is prohibited for all rifles in this position. (Left-handed shooters reverse these descriptions)

5.7 Illegal - Anyone found using an illegal position shall be warned once and given an opportunity to correct his/her position. If the same person continues to use an illegal position or reverts to it, that person shall be penalized according to the provision of Rule 9.20.

6. RANGE STANDARDS

6.1 Firing Line - The firing line is immediately in front of the several firing points. All ranges are measured from this firing line to the face of the targets when targets are hung in their proper position in front of the backstop.

6.2 Firing Point - That part of the range provided for the competitor immediately in the rear of the firing line from which firing takes place. Each firing point is numbered to correspond with the target frames. Each firing point should have a maximum width of five feet and a minimum of 3'9" (at the discretion of the Arena Director).

6.3 Distance- Outdoor rifle ranges may be 50 yards, 50 meters, 100 yards or any combination there of.

6.4 Illumination- Artificial illumination of ranges is authorized.

6.5 Target Numbers - Target frames will be numbered on an alternating background of contrasting color. The number will be large enough to be identified under ordinary conditions with normal vision. The numbers should be at least nine inches high and must correspond with firing point numbers.

6.6 Wind Flags – Event Officials, only, may erect wind indicators forward of the firing line.

7. COURSE OF FIRE

7.1 Course of Fire - Targets will be changed after each 12 shots. The number of shots on record bulls at each position are 50 yards, 3 shots for record.

7.1.1- A total of 5 sighter shots may be used in the Prone Position ONLY. Those rounds are not included in the number of shots per round and those 5 rounds would be added to the total number of ammunitions allowed at the line. Either of the top two Orion 6 bull targets may be used for sighter shots.

7.2 NHSRA 3-Position- 1st Round

<i>Distance</i>	<i>Target</i>	<i>No. of Shots per Match for score</i>	<i>per Bull</i>
50 Yards	<u>Orion 6 bull</u>	12 in each position Prone, Standing and Kneeling	3

7.3 NHSRA 3-Position- Short Round

The top 20 Shooters by score, not including center shots (x's) from the 1st round will compete in the Short Round the following day. All shooters should compete at the same time (with the same conditions) for Short Round. Placing in the competition would be determined on the aggregate scores from the 1st Round and the Short Round with total center shot (x's) as part of placing position.

SEE 7.11 FOR TOTAL NUMER OF SHOTS.

<i>Distance</i>	<i>Target</i>	<i>No. of Shots per Match for Score</i>	<i>per Bull</i>
50 Yards	<u>Orion 6 bull</u>	12 in each position Prone, Standing and Kneeling	3

8. TIME LIMITS

8.1 Computing Time - Time is not checked on each shot. The time allowance is computed for a complete stage (including sighting shots when specified) on the basis of the specified number of shots for score multiplied by the allowances per shot. The Chief Range Safety Officer may terminate any relay before completion of the full time allowed, if all competitors in that relay have completed firing. Time allowed, but not used, does not carry over to another string or stage.

8.2 Time Allowance:

One minute per record shot for score prone and kneeling. 1 ½ minutes per shot standing.

8.3 Passage of Time- Range Officers will not voluntarily warn competitors of the passage of time.

Competitors may inquire of Range Officers as to the time remaining before expiration of the time limit. The request for time and the response shall be given in a tone which will not disturb other competitors.

9. COMPETITION REGULATIONS

9.1 Changing Rifles - No competitor will exchange his/her rifle or the stock of his/her rifle during the firing of any single or multiple stage match unless it has become disabled and has been so designated by the Chief Range Safety Officer. For the purpose of this Rule, the firing of a match is considered to have started when the competitor has fired his/her first record shot. Claim that a rifle is disabled must be made immediately. All shots fired up to the time that the claim is made will stand as part of the official score. *Changing butt plate assemblies does not constitute changing rifles.*

9.2 Sighting Shots – Up to 5 Sighting shots are permitted ONLY in the prone position of the match. The sighting shots are optional, will not be scored or used when determining the time allotted in the prone position. **(Time for the prone stage is inclusive of these shots; no additional time is allowed).** There is no stoppage between sighting shots and shots for score in the prone position. Unused sight shots are to be collected at the end of the prone position. Sighting shots will only be fired upon the command “COMMENCE FIRING”.

9.2.1 Misplaced Sighting Shots-

When the first sighting shot hits below an imaginary or transcribed line midway between the sighter and record bullseyes, the competitor will inform the Range Officer of the location of such shot before firing another shot on the target card: the Range Officer will indicate to the Arena Director or Chief Range Safety Officer the value and location of the bullet hole. No such claim will be allowed after the competitor has fired more than one shot on the target card. After the first sighting shot any additional shot below an imaginary or transcribed line midway between the sighter and record bullseye will be considered a record shot.

9.3 Defective Cartridge - A defective cartridge is one:

- (a) which has such evident structural defect as to cause misfire or cause a rifle to fail to function
- (b) which does not fire
- (c) from which the bullet has not left the barrel. (No claim for a defective cartridge shall be allowed if bullet has left the barrel except in the incident of a ruptured case. The Range Officer will indicate to the Arena Director or Chief Range Safety Officer the value and location of the bullet hole.) (For procedure in case of a defective cartridge see Rule [10.8](#). For refiring privileges see [Rule 9.11](#).)

9.4 Disabled Rifle - Any rifle which cannot be properly aimed or safely fired may be declared disabled. Sights improperly adjusted do not constitute a disabled rifle. A rifle once declared disabled by the Range Officer shall not be used again for competition firing until the defect has been corrected, and the rifle has been ruled as safe by the Chief Range Officer. (For procedure in case of a disabled rifle see Rule [10.8](#). For refiring privileges see Rule [9.11](#).)

9.5 Malfunction - Failure of the rifle to function properly due to mechanical defects or to defective ammunition. Functional failures due to improper manual operation are not to be considered as malfunctions. (For procedure in case of a malfunction see Rule [10.9](#). For refiring privileges see Rule [9.11](#).)

9.6 Weighing Triggers/Rifle – All rifles presented for inspection **MUST** have an ECI inserted [per Rule 3.19](#). If the competitors’ rifle does not include this safety indicator upon presentation for inspection, [the firearm safety officers will provide and insert one. During the firearm check in period, the firearm safety officer will attempt to pass the firearm for both weight and trigger pull. They will attempt to qualify the firearm a maximum of three times at this time. If the firearm will not pass both requirements, the contestant will have the opportunity to make adjustments and have the firearm rechecked. If the firearm will not pass after the adjustments are made, the firearm safety officer may disqualify the firearm for the competition.](#)

- [9.6.1-](#) Triggers will be weighed with official NRA trigger test weights or by any other calibrated method at the discretion of the Arena Director. While the trigger pull is being weighed, the rifle shall be held with barrel perpendicular to the horizontal surface on which test weight is supported. The rod or hook of test weight shall rest on the lowest point of the curve in curved triggers or on a point approximately ½ inch from the lower end of straight triggers. To pass the weight test, a weight of the correct number of pounds shall be lifted by the rifle trigger while in the cocked position and while all safety devices are in firing positions, from the horizontal surface on which it is resting, until the weight hangs free and without releasing the trigger. Failure of the trigger to pass the weight test is the competitor’s responsibility.
- [9.6.2- Rifle will be weighed in a horizontal position on a scale the discretion of the Arena Director. The rifle will include mounted optics, bolt, butt plate/hook \(see rule 3.1\)](#)

9.7 Competitor’s Position - A competitor will take his/her position on the firing line as directed by the Chief Range Safety Officer. No portion of the shooter’s body *or equipment* may rest upon or touch the ground in advance of the firing line.

9.8 Coaching Prohibited in Individual Matches - Coaching is prohibited in all individual matches. If a competitor wishes to speak with his/her coach or leader, he/she must unload his/her firearm, leave it in a safe condition on the firing line and leave the firing line to confer with coach or leader, being careful not to disturb other competitors. **Competitors must first have permission from a Range Safety Officer to confer with the coach or leader. A Range Safety Officer will escort contestant to coach and back to position on firing line.**

9.9 Matches Not Complete:

Individual matches not complete-When a match or stage is not completed by all competitors in accordance with the tournament schedule, the match or stage may be rescheduled or cancelled. Any match or stage which has been completed by all competitors will not be re-fired.

9.10 Interference - With the exception of competitors actually firing and such range personnel as may be necessary, the firing points and lines will be kept clear at all times. Competitors will not be permitted to interfere with the handling of targets by range personnel.

9.11 Re-firing

(a) No competitor will fire more than one score for the same award except as provided in the competition rules or in accordance with Rule [9.9](#).

(b) No competitor will be allowed more than one re-fire because of the defective cartridge, disabled rifle or malfunction.

9.12 Cross Fire and Excessive Hits - No competitor will deliberately fire on the wrong target nor fire more than the required number of shots, including hits on some other competitor's target card.

9.13 Disorderly Conduct - Disorderly conduct or intoxication is strictly prohibited at the range *complex* and anyone guilty of same will be expelled from the range complex. [Expelled competitors will be disqualified from the competition.](#)

9.14 Willful Destruction of Range Equipment - No competitor shall cause any range equipment to become damaged through a deliberate act and anyone guilty of the same will be expelled, without a warning, from the range. Expelled competitors will be disqualified from the competition.

9.15 Refusal to Obey - No person will refuse to obey instructions from the Arena Director, Chief Range Safety Officer, Range Officers or of any other officer of the competition, if instructions are given in the proper conduct of his/her office.

9.16 Evasion of Rules - No competitor will evade nor attempt to evade nor be an accessory to the evasion of any of the conditions of a match as prescribed in these rules. Refusal of a competitor or Officials to give testimony regarding facts known to him concerning violations or attempted violations of these rules will constitute being an accessory to the violation or attempted violation and may be subject to disciplinary action.

9.17 Penalties/Disqualifications - In cases of infringement and contravention of the regulations or of the instructions of range officers by an individual shooter, team shooter or non-firing team member, the following penalties may be imposed upon the individual competitor by the Arena Director, Chief Range Safety Officer, Range Officer or other competition official certified by NHSRA.:

1. Warning
2. Deduction of points from the score
3. Disqualification

In case of infringement of the regulations:

(a) A warning may be given so that the competitor may have the opportunity to correct the fault.

In the case of a serious violation of safety regulations, the Chief Range Safety Officer, [Range Safety Officer](#), Arena Director, [National Director](#) or other competition official certified by the NHSRA has the authority to impose immediate disqualification on the competitor.

(b) If the competitor does not correct the fault before the next shot, 10 points shall be deducted from his score.

(c) For repeated infringement, the competitor may be disqualified.

(d) A warning to the competitor must be expressed in such terms as will leave no doubt that it is an official warning. A warning to the competitor, whenever it is possible, should be given so as not to disturb him/her while firing a shot, unless the infringement concerns safety, in which case the competitor shall be warned immediately.

(e) If a competitor continues to handle his/her firearm in a dangerous manner, or continues to violate any of the safety regulations, he/she may be disqualified.

(f) If the Arena Director, Chief Range Safety Officer, Range Officer or other competition official certified by the NHSRA is of the opinion that the competitor has attempted to intentionally circumvent the rules or disturb other competitors in an unsportsmanlike manner, he/she may be warned, then penalized by the deduction of 10 points from his/her score and may be disqualified.

(g) If the Arena Director, Chief Range Safety Officer, Range Officer or other competition official certified by the NHSRA considers that the competitor is holding up the procedure unnecessarily, with the intention of gaining unfair advantage, he/she may be warned, then penalized by having 10 points may be deducted from his/her score or may be disqualified.

(h) The discharge of any firearm anyplace other than the firing line, or the firing line prior to the shooters being placed in the preparation period, will result in disqualification and expulsion from the competition. If a firearm is discharged while the shooters are in the preparation period prior to the command **LOAD**, it will result in the competitor being disqualified.

(I) Any competitor placing an unfired cartridge in the chamber, on the loading ramp or in the magazine before the command "load", will be warned on the first violation and disqualified for the second violation.

10. RANGE COMMANDS, CONTROL AND OPERATIONS

10.1 Discipline - The safety of competitors, range personnel and spectators require continuous attention by all to the careful handling of firearms and caution in moving about the range. Self-discipline is necessary on the part of all. Where such self-discipline is lacking it is the duty of the range personnel to enforce discipline and the duty of competitors to assist in such enforcement.

Under no circumstances shall firing commence or continue on a range where an unsafe condition exists.

10.1.1 Actions Open - Unless the rifle is cased, the action must remain open at all times and the ECI inserted in the chamber. The ECI must be continuous from chamber to muzzle visible at both ends. No competitor will aim toward the targets until the proper command is given. No rifle will be handled in any manner to violate any rule of safety.

10.1.2 Rifles Unloaded - Rifles will not be loaded until the competitor has taken position at his/her firing point, rifles pointed toward the targets and the command "LOAD" has been given.

10.1.3 Loaded Rifles - No loaded cartridge will be inserted into the rifle nor placed on the loading ramp except at the firing point and under the command "LOAD". The muzzle of the rifle will be pointed in the direction of the targets and will be forward of the firing line until the rifle is discharged or unloaded.

10.1.4(a) Cease Firing - All shooters will immediately stop firing upon the command "Cease Firing". Actions will remain open and an ECI inserted in the chamber. The ECI must be continuous from chamber to muzzle visible at both ends.

"Cease" is the preparatory part of the command and "Firing" is the action part of the command. NO shot should be fired after the word "Firing" is spoken.

10.1.4(b) Commence Firing - All shooters may start firing upon the command "Commence Firing" as the timing of the string is started with this command.

"Commence" is the preparatory part of the command and "Firing" is the action part of the command. NO shot will be fired before the word "Firing" is spoken.

10.1.5 Not Ready - It is the duty of competitor(s) to notify the Range Officer if not ready to fire at the time the Chief Range Officer asks, "IS THE LINE READY?" Failure of competitor(s) to notify the Range Officer that he/she is not ready means they forfeit their right to re-fire.

NOTE: 1. If a competitor is not ready through no fault of his/her own, he/she will be given an opportunity to explain. If satisfactory, the competitor will be permitted to re-fire at a later time or simply allowed to fire with his/her relay and given additional time to make up for time lost.

2. If the competitor is not ready because of his/her own actions, he/she will be required to fire within the appropriate time on his/her appropriate relay.

10.2.1 Preparation Period - (The preparation period will begin only after the shooters have been given time to bring their rifles to the line.) In all cases competitors will be allowed a minimum of 3 minutes to take their places at their firing points and prepare to fire at the beginning of each match, after the firing point has been cleared by the preceding competitor.

10.3.1 Interrupted Fire - If firing is halted for two minutes or more, a preparation period of a minimum of one minute will be given, and one minute will be added to the firing time remaining.

10.4 Policing Range - It is the duty of competitors to police the firing points after the completion of each Stage, unless otherwise directed. The Range Officers will supervise such policing and will see that the firing points are kept clean.

10.5 Competitors may Score - Competitors will act as scorers when requested to do so by the Arena Director or Chief Range Officer, except that no competitor will score his/her own target.

10.6 Repeating Commands - A Range Officer will repeat the Chief Range Officer's commands only when those commands cannot be clearly heard by competitors under his/her supervision.

10.7 Firing Line Procedures and Commands - When ready to start the firing of a match the Chief Range Officer commands **"RELAY ON THE FIRING LINE."** Competitors in that relay may set up their equipment on their assigned firing points but will not bring their rifle to the firing line until called to do so by the Chief Range Officer. After the down range area is clear, targets are hung and all shooters and match personnel are behind the firing line the Chief Range Officer commands, **"RELAY ... YOU MAY BRING YOUR RIFLES TO THE LINE, ECIs MUST BE INSERTED IN YOUR CHAMBERS."**

The Chief Range Officer states, **"YOUR ____ MINUTE PREPARATION PERIOD STARTS NOW."**

At the end of the preparation period the Chief Range Officer states, **"YOUR PREPARATION PERIOD HAS ENDED."** After ascertaining that the range is clear, he/she proceeds with the range firing commands. The Chief Range Officer then asks, **"IS THE LINE READY?"** Any competitor who is not ready or whose target is in bad order, will immediately raise his/her arm and call, **"NOT READY ON TARGET..."** The Chief Range Officer will immediately state **"THE LINE IS NOT READY"**, and the Range Officer will immediately investigate the difficulty and assist in correcting it.

When the difficulty has been corrected, the Chief Range Officer calls, **"THE LINE IS READY."**

When the Chief Range Officer asks, **"IS THE LINE READY?"** and the line is ready, he/she then calls, **"THE LINE IS READY."**

If the size of the line requires it for safety, the Chief Range Officer will state the following: **"READY ON THE RIGHT, READY ON THE LEFT, READY ON THE FIRING LINE."**

The Chief Range Officer then commands **"LOAD."** Rifle chambers may be loaded.

The Chief Range Officer then commands **"COMMENCE FIRING."** At the latter command he/she starts his/her stopwatch or makes note of the time and at the end of the time limit commands **"CEASE FIRING- CHAMBERS OPEN."** All rifle chambers and magazines are unloaded, and competitors leave the firing line with the actions of their rifles open.

Shooters are reminded that there will be no handling of firearms forward of the ready line while shooters are down range.

Before competitors are allowed down range the Chief Range Officer should ask **"IS THE LINE CLEAR?"** This means that all rifles on the line are unloaded, and all bolts are open. Upon receiving confirmation from the Line Officers that all rifles are clear, say **"THE LINE IS CLEAR."** Additional instructions are proper at this time such as **"GO FORWARD AND CHANGE TARGETS"** or **"REMOVE YOUR EQUIPMENT FROM THE LINE FOR THE NEXT RELAY."**

Succeeding relays are handled in a similar manner.

Range Officers will immediately command **"CEASE FIRING—CHAMBERS OPEN"** if any incident occurs which indicates possible injury to some living thing should firing continue. In all other cases commands will originate with the Chief Range Officer.

Should a target blow out of the frame or otherwise become unserviceable the Range Officer will report the condition immediately to the Chief Range Officer who will issue such commands and directions as seem advisable to him/her.

10.7.1 Range Alibis – Re-fires are allowed through faulty or improper range procedure and or weather such as: Targets of a relay rendered un-scoreable or unshootable because of extreme weather conditions (wind/rain).

10.8 Procedure in Case of Defective Cartridge, Disabled Rifle or Malfunction - If a cartridge fails to fire or a rifle fails to function the competitor will call the Range Officer. The Range Officer, when satisfied that there is a defective cartridge, disabled rifle, or malfunction, will permit the competitor to replace the unfired cartridge or clear the jam and continue firing. Additional time may be allowed each competitor, equal to the time lost because of the defective cartridge, disabled rifle or malfunction. It is not required that the Range Officer attempt to fire a cartridge before it is declared defective.

11. PHYSICALLY DISABLED SHOOTERS -

11.1 Physically Disabled Shooters - A shooter who because of physical disability cannot fire from one or more of the prescribed shooting positions outlined in these Rules, or who must use special equipment when firing, is privileged to petition the NHSRA for permission to assume a special position or to use modified equipment, or both. This petition will be in the form of a written request from the person concerned to the Committee outlining in detail the reasons why the special positions must be assumed, or the special equipment must be used. The petition will be accompanied by pictures of the shooter in the position the contestant desires approved and, if special equipment is required, the picture will show how this equipment is used. The petition and all pictures must be furnished in exact duplicate. The petition must be accompanied by a medical doctor's statement if the physical disability is not completely evident in the pictures submitted.

(a) Each petition will be reviewed by the Arena Director, the Coordinator and the NHSRA Shooting Sports Committee (if applicable). The Committee may require additional or supplementary statements, medical information or pictures. If approved, the NHSRA will issue special authorization to the individual concerned. Such authorization will have necessary pictures attached (if applicable). Safety will be paramount to make the decisions of positions for physically disabled shooters.

(b) Shooters who have received special authorization will be required to carry them when competing in competition governed by NHSRA Rules, and to present the authorization when requested by officials of the competition or by the NHSRA Coordinator.

(c) In the event of a protest involving the position or the equipment used by such a shooter, the Arena Director will compare the questioned position or equipment with the certificate and photographs presented by the shooter. If the shooter's position or equipment does not, in the opinion of the officials, conform to that authorized by the NHSRA (or if the shooter has no authorization or pictures), the protest shall be allowed, and the shooter will be required to change immediately to the position or equipment which has been approved or to an otherwise legal position or equipment.

NRA Sports Adaptive Shooting Positions –

Prone: - Both elbows resting on shooting table. The chest and/or abdomen may also rest on the table (in prone only).

Note: - The shooting table does NOT have to be attached to the wheelchair, it may be freestanding.

Sitting: - This position is the same as the prone position, except that the chest or abdomen may NOT touch the table in any way.

Kneeling: - Only one elbow may rest on shooting table. Chest or abdomen may not contact the table in any way. The sidearms of the wheelchair must be removed when competing.

Standing: - Competitors must sit up against the back of the wheelchair in this position. The shooting table cannot be used in this position; however, an “offhand stand” may be affixed to the wheelchair. The sidearms of the chair must be removed. No part of the competitor’s arms may come in contact with any part of the wheelchair. Rifle sling cannot be used in this position.

Note: - All outlined positions may also be fired while seated on a stool or stationary chair without arms.

11.2 Temporary Disability: Substitute Position - Any person who has a temporary physical disability, as substantiated by a current written medical opinion, which prevents the contestant from using a specified position may assume the next more difficult position in lieu of that position. In this manner, kneeling may be used for prone, and standing may be used for kneeling. The Arena Director must be informed of the substitute and may require that the substitute position be demonstrated so that he may be certain it meets the definition of the appropriate rule.

12. SCORING

12.1 When to Score - Targets are scored as they are collected from the firing line. Special conditions may require other than this usual procedure.

13.1.1 National Finals Rodeo Scoring Procedure- The Scopos Orion Scoring System will be used to determine a competitor’s score utilizing their automatic scoring system for both the NJHFR and NHSFR shooting competitions. For more information, please visit the following link: <https://www.scopos.tech/orion>

12.2 Where to Score - Targets may be scored in the office or on the range. Scoring targets while hanging is prohibited.

12.2.1 Targets as Score Cards - Targets are used as score cards and transferred to a computer, the computer record becomes the official score card.

12.3 How to Score - A shot hole, the lead edge of which comes in contact with the outside of the bullseye or scoring rings of a target, is given the higher value. If a competitor fails to hit any target (shot/s outside the scoring ring) that shot will be scored as a miss (zero). A scoring gauge will be used to determine the value of close shots..

(a) Inward (best edge) scoring is done as follows: The higher value will be allowed in cases where the flange on the gauge touches the scoring ring. Inward gauges must be within the following limits: .2225-.2240 inches (5.65 - 5.69 mm).

(b) *Shot groups* - When, in scoring outdoor targets, the 10 and in some cases, the 9 rings are partially obliterated by shot groups of two or more shots or when two adjacent shot holes have a connecting tear in the target paper, the plug type scoring gauge shall not be used. In such cases, the values of the shots in the partially obliterated scoring ring area shall be determined by authorized tournament scoring personnel, and the Arena Director when required, by using a scoring gauge aid.

Note: For States not using Orion Scoring System, targets will be scored while in a horizontal position. The plug gauge should be inserted carefully so that no pressure is exerted to any side as this may affect the final plug position in the shot hole and, therefore, the value of the hit. Never plug a shot that is not doubtful. If two scorers cannot agree on the value of a shot, another match official will decide. To make tie breaking easier, it is suggested to score all center shots the first time the scoring team scores a target. Ties would be broken simply by comparing targets as opposed to re-scoring.

(d) *Center shots* - Center shots are determined as follows:

Light Rifle (A-23 target) - Any shot hole within the ten ring which, with the aid of a .22 caliber plug type scoring gauge, the flange or outer ring of which does not touch the outside edge of the ten ring.

12.3.1 Authorized Use of Plug Type Scoring Gauges - The use of the plug type gauge will be restricted to use by range operating personnel who may include the Range Officers or Arena Director, Coordinator or authorized NHSRA personnel, as appropriate.

12.4 Misses - Hits outside the scoring rings of the competitor's target are scored as misses.

12.5 Early or Late Shots - If any shots are fired before the command **COMMENCE FIRE**, after the command **LOAD** has been given or immediately after the command **CEASE FIRE** prior to the command **THE LINE IS SAFE**, the shots of the highest value on the target card, equal in number to those fired in error, will be scored as misses. All shots fired before or after this time see Rule 9.17(h).

12.6 Excessive Hits

Note: The term "target card" will be interpreted as applying to all record bullseyes framed at one time (i.e., Prone, Standing, Kneeling target cards hung for each respective position).

- (a) *On his/her own target* - If a competitor fires more than the required number of shots on a target card, he/she will be scored only the required number of hits of lowest value minus a penalty equal to the highest score in the target per target (not cumulative scores from the match).
- (b) *On the target of another competitor* - If a competitor fires more than the required number of shots for a target card and one or more hits are on a target other than his/her own, all shots on the targets of others will be brought back to the corresponding bullseye(s) on his/her own target and scored as outlined in Rule 12.6 (a) (excessive hits) and Rule 12.7 (cross-fires). An excessive hit fired on a target other than your own will be brought back as a miss (0).

12.7 Crossfires

- (a) Crossfires of competition shots must be scored as misses. If a shooter fires a sighting shot on the competition target of another shooter, he must be penalized by deduction of the highest score from his/her own score.
- (b) If a shooter fires a sighting shot on the sighting target of another shooter no penalty is incurred.
- (c) If a shooter receives a confirmed crossfire shot and it is impossible to determine which shot is his/hers, he must be credited with the value of the highest undetermined shot.
- (d) If there are more hits on a shooter's competition target than are provided for in the program, and if it is impossible to confirm that another shooter(s) fired the shot(s), the hit(s) equal to the highest value must be nullified.
- (e) If a shooter wishes to disclaim a shot on his/her target, he/she must report this immediately to a Range Officer before cease fire is called on the active state of the shooting position. This must be called before the end of the course of fire.
- (f) If the Range Officer confirms that the shooter did not fire the disputed shot(s), that the shot must be annulled.
- (g) If the Range Officer cannot confirm beyond all reasonable doubt that the shooter did not fire the disputed shot(s), the shot(s) must be credited to the shooter and must be so recorded.
- (h) The following must be considered as reasons to justify the annulment of a shot:
 - (1) If the Range Official confirms by his/her observation of the shooter and the target that the shooter did not fire the shot.
 - (2) If a missed shot is reported by another shooter or other Range Official at approximately the same time, and from within the neighboring two or three firing points.

12.8 Ricochets - A hole made by a ricochet bullet does not count as a hit and will not be scored.

12.9 Visible Hits and Close Groups - All hits which are clearly visible on the target card will be scored. In the case where the grouping of three or more shots is such that it is possible for a required shot or shots to have gone through the enlarged hole without leaving a mark or marks, and there is no evidence that a shot or shots have gone elsewhere than through the assigned target (a cross-fire for example), the shooter will be given the benefit of the doubt and scored hits for the required number of shots in that bullseye. If such action could place a non-visible hit or hits in either of two scoring rings, such hits shall be scored in the high value ring.

12.10 Scoring Altered Targets - Targets intentionally altered, or marked to benefit a shooter over other competitors, will not be scored.

13. DECISION OF TIES

13.1 Match - The term "match" as used in this section refers to all individual matches.

13.7.2 Tie Breaking for Top 20 after Long Round and Short combined totals

Aggregate Matches or any fired match consisting of multiple positions.

- (1) By the greater number center shots on targets (x's) total of both Long and Short Rounds.
- (2) By the highest-ranking score in the standing position, then kneeling and prone in Short Round.
- (3) By the greater of center shots in standing in short Round.
- (4) By the highest score on the last numbered bullseye in standing in Short Round.
- (5) By the greater number of center shots on the last numbered bullseye in standing in Short Round.
- (6) By the highest-ranking score on each bullseye applied in inverse order from last to first in standing in Short Round.
- (7) By the greater number of center shots on each bullseye applied in inverse order from last to first in standing in Short Round. If still a tie, apply 3 through 6 to the kneeling position, followed by prone.

14. COMPETITORS' DUTIES AND RESPONSIBILITIES

Note: The following competitors' duties are in addition to those specified elsewhere throughout these Rules.

14.1 Discipline - It is the duty of each competitor to sincerely cooperate with **Competition** Officials in the effort to conduct a safe, efficient tournament. Competitors are expected to promptly call the attention of proper officials to any infraction of rules of safety or good sportsmanship. Failure of a competitor to cooperate in such matters or to give testimony when called upon to do so may result in said competitor being considered as an accessory to the offense.

14.2 Knowledge of Program - It is the competitor's responsibility to be familiar with the program. Officials cannot be held responsible for a competitor's failure to obtain and familiarize **themselves** with the program.

14.3 Reporting at Firing Point - Competitors must report at their assigned firing point immediately when the relay is called by the Range Officer. The proper rifle and ammunition for that particular match must be ready and in safe firing condition. Time will not be allowed for rifle repairs, sight blacking, sight adjustments or search for missing equipment after a relay has been called to the firing line.

14.4 Timing - The timing of the firing of a stage (within the official time limit) is the competitor's responsibility. Range Officers may not announce the time during the firing but if requested will give the competitor information as to remaining time.

14.5 Loading - No competitor will load a rifle except at the firing point and after command has been given by the Chief Range Safety Officer.

14.6 Cease Firing - All rifles will be unloaded immediately upon the command **CEASE FIRING – UNLOAD AND INSERT ECI**. Actions will remain open with the ECI inserted. The ECI must be continuous from chamber to muzzle visible at both ends.

14.7 Checking Scores - It is the duty of competitors to check the Posting Board and call attention to errors within the time specified at the competition. Failure to check scores within the time limit forfeits the right to challenge.

14.8 Clearing the Firing Point - It is the competitor's duty to leave the firing point promptly at the conclusion of his relay. When leaving the firing point the rifle must be unloaded with action open and ECI inserted. The ECI must be continuous from chamber to muzzle visible at both ends.

14.9 Responsibility - It shall be the competitor's responsibility, that:

- (a) All equipment meets all rules and matches specifications in any match in which that equipment is to be used. All equipment used by the contestant must be carried by the contestant through safety checks.
- (b) The competitor's position conforms to the rules.
- (c) The competitor has full knowledge of the rules under which that match is fired.
- (d) After due warning of any infraction of existing rules, including the improper marking of the target, that competitor shall understand that a repetition thereof shall be the subject of disqualification for that relay or match.
- (e) When targets are framed by the competitor, it is the competitor's responsibility that the correct target and backer for the range and position being fired are framed properly.
- (f) To ensure that his/**her** target is not altered intentionally or with special marks which benefit him/**her** in any way. Scores fired on such targets will be disqualified.
- (g) When the targets are framed by the competitor, it is the competitor's responsibility to ensure that the area between the target and firing point is clear of obstructions (weeds, wind flags, etc.) before the start of the preparation period.
- (h) It is the contestant's responsibility to remove all scored targets from the office area within one (1) day after the competition is declared final (post-challenge period) when final results have been posted. All unclaimed targets will be disposed of after 1 day.

SECTION 6: NHSRA TRAPSHOOTING RULEBOOK

National High School Rodeo Trapshooting Rules

Revised February 5, 2026

NATIONAL HIGH SCHOOL RODEO ASSOCIATION Official Rules for Trapshooting in NHSRA

SAFETY IS YOUR BUSINESS! READ THE RULES

These rules provide for the efficient and orderly operation of a competition. But *that's not all*. Many local range regulations exist for one reason alone SAFETY. Others serve a dual purpose, smooth range operation and SAFETY. It's your responsibility as a competitor or as a competition official to be familiar with the rules and to know the meaning behind those which are safety oriented.

NRA (Adopted by NHSRA) GUN SAFETY RULES

The fundamental rules for safe firearm handling are:

- ☐ Always keep the firearm pointed in a safe direction.
- ☐ Always keep your finger off the trigger until ready to shoot.
- ☐ Always keep the firearm unloaded until ready to use.

When using or storing a firearm, always follow these NRA (adopted by NHSRA) rules:

- ☐ Be sure the firearm is safe to operate.
- ☐ Know how to safely use the firearm.
- ☐ Use only the correct ammunition for your firearm.
- ☐ Know your target and what is beyond.
- ☐ Wear eye and ear protection as appropriate.
- ☐ Never use alcohol or drugs before or while shooting.
- ☐ Store firearms so they are not accessible to unauthorized persons.

Be aware that certain types of firearms and many shooting activities require additional safety precautions. To learn more about firearm safety, enroll in an NRA safety training or basic marksmanship course, NRA hunter clinic or state hunter education class.

1. NHSRA COMPETITION

1.0 NHSRA Competition - NHSRA Competition is a competition which is authorized by the National High School Rodeo Association. The program, range facilities and officials must comply with standards established by NHSRA and must be approved by the National Office by submitting a Rodeo Approval form 30 days prior to the event via the State/Provincial Secretary.

NHSRA Sanctioned Events - A Sanctioned Event is an event that has been approved by the National Office. Such matches must be conducted by an NHSRA affiliated organization.

Types of NHSRA Matches

(a) **Match** - A complete event as indicated in the schedule for the awarding of certain specific prizes. A match may consist of one or several stages.

(b) **Stage** - A portion of a match which consists of one or more strings fired in one position, distance, time allowance, or target.

(c) **Unsquadded Individual Match-** A match in which the competitor is not assigned a definite relay or target. The competitor reports to the official registration area within the time limits specified on the official posting board and is then assigned to a target and a relay in which to fire. For the National Finals event(s), report times will be listed on the official Draw Posting Board prior to the event.

(d) **SUB-EVENTS-** A sub-event is any number of targets shot on any one field at one time, with one full rotation on all five (5) posts by each shooter, such as (25) 16-yard targets. An event is the total targets of a specific type such as (100) 16-yard targets. It is not necessary to change traps after each sub-event.

2. ELIGIBILITY OF COMPETITORS

Eligibility of Competitors - The conditions of a match shall prescribe the eligibility of competitors to qualify for the National Finals events at their State/Provincial Finals.

INDIVIDUALS

2.1 Members of the National High School Rodeo Association - Any individual member of the National High School Rodeo Association.

TEAMS

2.12 Team Representation- No individual may be a Team Captain, Coach, firing member, or alternate firing member on more than one team in any one match.

CONDUCT

2.13 Members are strongly encouraged to know the NHSRA Trapshooting Rules and abide by them for their own benefit and for the benefit of other shooters. By entering the competition, every contestant agrees to accept all official decisions and to abide by these rules.

3. EQUIPMENT AND AMMUNITION

This section defines authorized equipment. Where alternative types of equipment are shown, the least restrictive conditions apply unless the tournament programs set forth limitations.

3.1 Shotgun - High School Division Only- Youth or adult size 20, 16 or 12-gauge shotguns may be used. A contestant cannot use: A **shotgun** with a chamber larger than 12 gauge. A contestant may not use a **shotgun** capable of chambering more than one gauge of shells at the same time. For example, chambering 12 gauge and 20-gauge shells in the same **shotgun** at the same time is prohibited. The same shotgun must be used throughout all stages of any one match (except aggregate) except in the case of a malfunction or disabled shotgun when the competitor may change shotguns with permission of the Chief Range Safety Officer or Arena Director.

3.2 Ammunition – A contestant **MAY NOT USE** loads that contain nickel or copper coated shot or tracer loads. However, the use of lead, steel, bismuth, or other composite non- toxic shot materials shall be allowed. A contestant **MAY NOT USE** any load with a velocity greater than 1290 FPS (feet per-second) with maximum shot charge of 1 1/8 ounces, or 1325 FPS with a maximum shot charge of 1 ounce, or 1350 FPS with a maximum shot charge of 7/8 ounces or less, as measured in any individual shot shell. These velocities are maximum, and no individual shot shell shall exceed these limits for the designated shot charge. In addition, no load containing more than 1 1/8 ounces or any shot larger than number 7 1/2 can be used. Shot charges are maximum and no charge may exceed the charge amount by more than 3%. Steel shot in number 7 will be acceptable if velocity criteria are the same as for lead shot shells. A contestant **MAY NOT USE** any shell loaded with black powder. **NO reloaded ammunition is allowed.**

3.3 Challenges – **Range Official** or any contestant may challenge the load of any other contestant. Any challenge shall be initiated to not disrupt the harmony of the shoot or interfere with other contestants not involved with the challenge. On receipt of a challenge management shall obtain a shell or shells from the challenged party, and if after examination, management finds the contestant violated the rule, he/she may be disqualified.

3.4 Eye Protection- All competitors and other personnel in the immediate vicinity of the range complex must wear eye protection devices. Must show the ANSI Z87.1 (and/or the equivalent standard for all countries involved) safety rating for eye protection devices.

3.5 Ear Protection - All competitors and other personnel in the immediate vicinity of the range complex must wear hearing protection devices. Only sound reducing devices may be worn by competitors forward of the ready line.

4. TRAPHOUSES AND TARGETS

4.1 Trap Machine – A trap machine which throws targets at an unknown angle shall be used.

4.2 Trap houses – Trap houses must adequately protect the trap loaders and shall not be higher than necessary for that purpose.

4.3 Posts – Posts shall be 3 yards apart on the circumference of a circle whose radius is 16 yards.

4.4 Targets – Targets should not measure more than 4 5/16 inches in diameter and not more than 1 1/8 inches in height. The weight of the target should not be less than 95 grams or more than 105 grams with an allowable variation of plus or minus 5 grams per target lot. A target lot is defined as all targets with the same production number.

5. FIRING POSITIONS AND SHOOTING ORDER

Positions - The positions for use in a match shall be stated in the program under the conditions of the match and shall be in accord with the definitions of positions prescribed in this section.

5.1 There shall be five (5) firing positions (posts) numbered 1 to 5 left to right, spaced 3 yards apart and at a distance of 16 yards unless:

- There are less than five (5) contestants available for the last squad.
- When there are draw outs from a squad after the competition has begun and the squads are scheduled.
- When in the opinion of shoot management, the harmony of the shoot may be enhanced by squadding less than five (5) contestants.

5.1.1 Squad positions for less than 5 contestants shall be as follows:

- If 1 shooter, post number 2.
- If 2 shooters, post numbers 2 and 4.
- If 3 shooters, post numbers 2, 3 and 4.
- If 4 shooters, post numbers 2, 3, 4 and 5.

5.2 Shoot management will provide pullers unless voice activated pullers are used. The puller will not throw a target unless all contestants are in their correct positions.

5.3 Rotation of shooters shall be in a clockwise direction, with the shooter from post 1 advancing to post 2 and the shooter from post 5 rotating to post 1 (or to the post dictated by the number of shooters remaining).

6. SAFETY

6.1 It is the responsibility of both the shooter and shoot management to conduct a shoot in a reasonable and safe manner.

6.2 It is shooting management's responsibility to remove/disqualify any contestant who is conducting himself/herself in an unsafe manner.

6.4 It is shooting management's responsibility to instruct the trap help in proper and safe conduct of their respective duties.

6.5 All trap help must have a flag or other warning device to warn of any person(s) entering or exiting the trap house.

6.6 Trap personnel should be instructed on the potential danger of the trap; trap throwing arm.

6.7 Movement and exposure on adjacent traps should be kept to a minimum.

6.8 The practice of tracking targets behind a shooting squad is unsafe and is not permitted.

6.9 Disorderly Conduct - Disorderly conduct or intoxication is strictly prohibited at the range *complex* and anyone guilty of same will be expelled from the range *complex*.

6.10 Failure to Fire - A gun, which for any reason fails to fire as intended, must be promptly opened without any subsequent determination by the puller/scorer of the cause of the failure to fire. In the event of a jam, the contestant will be given two (2) minutes to clear the jam. If time elapses past 2 minutes, the contestant will be scored as a failure to fire for the remainder of the round.

6.11 All guns must have the action open can contain no live or empty shells at any time, except when the shooter is on the firing line and instructed to load a shell. A break open gun's action may be closed when it is in the gun rack but must not contain a live or empty shell.

6.12 Test shots will not be permitted before a squad starts shooting and may only be fired when requested by the puller/scorer to verify an apparent gun misfire, gun malfunction or broken gun.

6.13 Contestants shall place a live shell in his/her gun only when on a post facing the traps and only when instructed to do so. Only one live shell is permitted in his/her gun at one time and empty shells must be removed before moving from one post to another. When rotating posts, the shooter will not walk in front of other contestants.

6.14 A contestant may hold his/her gun in any safe position when it is his/her turn to shoot. The contestant must in no manner interfere with the preceding shooter by raising his/her gun to point or otherwise create an observable distraction.

6.15 All guns used by contestants must be equipped, fitted and utilized so as to not eject empty shells in a manner that disturbs or interferes with other contestants, including empty casings hitting the station next to the contestant in either direction of their station. Contestants with such type shotguns will be required to have a shell catcher or rubberband to keep the casings from ejecting to the station on either side of them.

6.16 All shooters, pullers/scorers and trap personnel must wear appropriate eye and hearing protection while on the trap field. Failure to do so could result in disqualification.

6.17 The practice of resting the muzzle of the shotgun on a shooter's toe is prohibited.

7. SCORING

7.1 The "official score" is the record kept by the scorer/puller on the sheets provided by shoot management and will show in detail the scores made in the event.

7.2 The scorer will keep an accurate record of each shot of each contestant and will promptly record "LOST" by marking "0" for "lost". If a score sheet is marked incorrectly, it must be corrected by the scorekeeper in such a manner as to leave no doubt of the score and must be initialed by the scorekeeper. Clear notations of the word "dead" or "lost" are acceptable corrections. If the intent of the scorekeeper is not clearly demonstrated, the score must be counted as lost. The scorer will verbally call "Lost" for each shot lost by each contestant. Dead targets will not be announced by the scorekeeper.

7.2.1 A scorer will rule "LOST" when the contestant fires and fails to break the target whether missed completely or when only dust falls from it. A "Dusted Target" is a target from which there is a puff of dust but no perceptible piece is seen, it is not a dead target and contestant has not called a failure to fire OR when a whole target appears promptly after a contestant's recognizable command and is within the legal limits of flight and the contestant does not voluntarily fire OR when an illegal target, a freak target or a target of a markedly different color is fired at and missed (contestant may refuse these types of targets, but if he/she fires at the target, the result MUST be scored) OR when a contestant voluntarily or involuntarily takes no further part in the event after firing at 1 or more targets and does not fire at all the targets in the event.

7.2.2 When the shooter is prevented by reasons beyond their control from competing the scores for that partial event will not be recorded. Example: shooters have shot 61 targets of a 100-target event when a storm stops shooting. Scores for the first 50 targets only would be reported.

7.2.3 Failure to Fire. A contestant will be allowed (2) failures to fire per "Sub-event of 25". When the first or second failure to fire occurs, the contestant will be allowed to call for and fire at another target. Whenever a failure to fire occurs, the scorer will mark F1 and if applicable, F2 on the score sheet. Subsequent failures to fire will result in "LOST" scores recorded on the score sheet.

7.3 The scorer will distinctly announce "Lost" when a target is missed and "No Target/Bird" when no target is thrown, or a target is thrown broken. The scorer may call the result of all targets or only lost targets as directed by shoot management.

7.3.1 The scorer will rule "NO TARGET/BIRD" and allow another target when an allowable "Failure to Fire" occurs OR when the target is thrown broken (regardless of the result of any shot fired) OR when a whole target appears on the call of the shooter along with target debris OR when a contestant shoots out of turn OR when two (2) contestants fire at the same target OR when the trap is sprung without any call or pull or when it is sprung at any material interval of time before or after the call of the contestant provided the contestant does not fire; if the contestant fires, the result must be scored OR when two (2) targets are thrown at the same time regardless of whether the contestant fires or not OR when an "illegal" target is thrown (a target that is not within the prescribed angle or height limits for single target shooting or what is known as a "flipper" or "freak" target which is a target that may have slipped out of or was not properly placed on the trap or is of a markedly different color), provided the contestant does not fire at it- if the contestant fires, the result must be scored.

7.4 If the scorer announces, "No Target/Bird" for any contestant, the next contestant shall not shoot until the last contestant has shot and the scorer has ruled "Dead" or "Lost".

7.5 It is the duty of the scorer to see that the shooters change posts at the proper time, however any targets that are shot after failure to move at the proper time will be scored.

7.6 A shooter is required to shoot the requisite number of targets from each post. If a shooter inadvertently skips a post, he/she or any other member of the squad will not be deemed out of turn but will be required to shoot the specified number of targets from the skipped post. While the shooter is shooting the skipped post, the remainder of the squad will remain behind the trap line and will not proceed to the next trap.

7.7 No member of a squad shall move toward the next post or leave the field until the squad member who is last has fired his/her final shot of the current posts' specified number of targets.

7.8 The official score sheet must be available for shooter inspection at all times.

7.9 It is an error if the referee/scorer fails to properly mark the results of any shot in the section of the score sheet where the results should be recorded. In such cases it is the duty of that contestant to have any error corrected before he/she has fired the first shot at the next post or in the case of his/her last post before leaving the trap. If the shooter fails to have the score corrected, the recorded score(s) shall remain unchanged, and no valid protest will be entertained.

7.10 Every contestant in a squad shall be permitted to examine his/her score before the sheet is sent to the bulletin board or to the cashier's office. The score sheet should be checked, confirmed, and initialed by each contestant. Each Contestant is encouraged to verify that any targets changed during a sub event are correctly noted as either dead or lost. After the completion of the last sub-event, the score sheet will be handled as directed by shoot management.

7.11 Any protest concerning a score, or scores must be made before or immediately after the close of the competition to which such scores relate. A valid protest may only be made by a contestant who competed in the event.

ALL PROTESTS/CHALLENGES WILL BE HANDLED BY THE SHOOTING SPORTS ARENA DIRECTORS AND STAFF AND THEIR DECISIONS WILL BE FINAL. DISPUTES IN THESE EVENTS WILL BE RESOLVED BEFORE SCORES ARE POSTED. DISPUTES ARE NOT ELIGIBLE FOR EXECUTIVE COMMITTEE REVIEW. IF A CONTESTANT FEELS AS IF THEIR DISPUTE WAS NOT HANDLED PROPERLY IN THE FIELD OR DURING THE PROTEST PERIOD, THE CONTESTANT SHOULD INFORM THEIR NATIONAL/PROVINCIAL DIRECTOR FOR CLARIFICATION. THESE POINTS WILL COUNT TOWARDS TEAM POINTS AT NATIONAL FINALS EVENTS BUT WILL NOT COUNT FOR ALL-AROUND.

8. DULY NOTIFIED

8.1 A contestant must be at the firing point within 3 minutes when it is time for their squad to shoot. Failure to do this may result in disqualification. The contestant is duly notified when their name has been called.

8.2 It shall be the shooter's responsibility to be present until the event is finalized by the highest score or other agreed upon disposition.

8.2 If a contestant is involved in a tiebreaker for the event, it is the shooter's responsibility to be ready when called to shoot. If the other tied contestants do respond, the missing contestant is deemed to have forfeited. 3 minutes will be allowed after the contestant's name is called for their squad before the shooter is disqualified.

9. FORMAT/TIE BREAKERS

NOTE: There is to be NO practice or test shots fired the day of the competition.

9.1 First Round. All contestants entered in the competition will be presented with 100 targets.

9.2 When all contestants have shot at 100 targets, Ties that exist in the first 20 will move to the 2nd go in the competition.

9.3 The 2nd go of this competition will be comprised of the top 20 contestants (including ties in the 20th place). The second go will be a mirror of the 1st go with respect to rules and regulations. At the end of the 2nd go, if ties exist in the overall placings in the aggregate scores, contestants will participate in a shoot off.

9.6 Shoot off- Shoot offs will be conducted for any places 1st through 20th that are tied. If there is no tie in 1st place, that shooter would be declared the winner of the event. If there is no tie in 2nd place, that shooter would be declared the Reserve Champion in the event and so on. Ties in the first 20 places will be shot off by presenting 10 targets to each contestant from the 20-yard line for the first tiebreaker. **If a tie still exists, shooters will shoot another 10 targets from the 23rd yard line to try to break the tie. If a tie still exists, shooters will shoot another 10 targets from the 27-yard line to try to break the tie. If a tie still exists, shooters will alternate shots from the 27-yard line on post 5 until the tie is broken.**

9.7 Protests or challenges should be voiced immediately after score cards are announced and must be done by the shooter or another shooting contestant. The scorer will verbally call "Lost" for each shot fired by each contestant. Disputes and/or protests for an individual shot must be voiced immediately. These points will count towards team points at National Finals Events but will not count towards All-Around.

10. PHYSICALLY DISABLED SHOOTERS

10.1 Physically Disabled Shooters- A shooter who has a disability that requires use of special equipment or assistance when moving stations or when competing is requested to petition the NHSRA for permission as such.

This petition will be in the form of a written request from the person concerned to the Committee outlining in detail the reasons why the special equipment or assistance is needed. The petition will be accompanied by pictures of the shooter in the position the contestant desires approved and, if special equipment is required, the picture will show how this equipment is used. The petition and all pictures must be furnished in exact duplicate. The petition must be accompanied by a medical doctor's statement if the physical disability is not completely evident in the pictures submitted.

Each petition will be reviewed by the Arena Director, the Coordinator and the NHSRA Shooting Sports Committee (if applicable). The Committee may require additional or supplementary statements, medical information or pictures. If approved, the NHSRA will issue special authorization to the individual concerned. **SAFETY WILL BE PARAMOUNT TO MAKE THE DECISIONS OF POSITIONS FOR PHYSICALLY DISABLED SHOOTERS.**

SECTION 7. DRESS CODE FOR SHOOTING SPORTS EVENTS AT NATIONAL FINALS

Junior High and High School Events

These requirements are for competitors.

10.1 Shooting sports contestants **are required** to wear contestant/back numbers at all times. If they are not wearing their contestant/back number, the contestant **WILL** be disqualified.

10.2 Jeans/long pants or trousers, wrist length sleeve shirts with collar and cuff are required, shirts must be tucked in. Shirt cuffs can be unbuttoned/ unbuttoned during competition. Sleeves may be rolled one time to allow flexibility, no more than a 4" roll. All footwear must be closed toe.

10.3 Any messages on clothing **MUST** be positive and cannot advertise alcohol or tobacco products.

10.4 Western boots and cowboy hats are optional during the competition; cowboy hats can prove to be a safety issue if they are blown off during a flight. Spurs are **HIGHLY** discouraged, and contestants may be asked to remove them at any time.

10.6 Baseball caps are acceptable.

10.6.1 Shooting Coats - Are not permitted. **OUTERWEAR IS NOT ALLOWED AT THE NATIONAL FINALS EVENTS.** In addition, outer clothing, for example but not limited to vests, sweatshirts, and jackets, worn that may be used to provide support or advantage are not allowed unless weather conditions dictate. It will be up to the sole discretion of the Arena Director and CRSO to determine this need.

10.7 Western attire must be worn when accepting awards during the year-end awards ceremony to include jeans, long sleeved shirts buttoned at the wrist, belt, boots and cowboy hat.

Just a reminder: These events are outdoors, and, in most cases, there is little to no shelter. Please remember to bring plenty of water to stay hydrated. Portable shades such as umbrellas, visors or hats for spectators is recommended. Severe, inclement weather may cause delays or postponements.

Appendix

1: Other Awards

[For Shooting Sports Members in General, not necessarily affiliated with NHSRA]

NRA Marksmanship Qualification Program. From a young shooter's first BB gun to sophisticated air rifles, shotguns, muzzleloaders, pistols and rifles, the NRA Marksmanship Qualification Program offers shooters a self-paced training platform to develop their shooting skills. It's a drill. We set the standards and you meet the challenge! Progression is self-paced, and scores are challenging but attainable. Performance is measured against established par scores and any shooter who meets or exceeds those scores is entitled to the corresponding recognition awards for that rating. For more information visit: <https://mqp.nra.org>.

National Rifle Association Youth Education Summit. Since the program's inception in 1996, more than 850 students have graduated from Y.E.S. and over \$500,000 in scholarships has been awarded. Scholarships totaling over \$55,000 will be awarded at this summit. For more information, please go to: <https://yes.nra.org>.

NRA Youth Wildlife Art Contest The George Montgomery/NRA Youth Wildlife Art Contest offers young artists interested in hunting and wildlife an outlet to use their creative talent, practice artistic techniques, and refine wildlife identification skills through the creation of original works. This contest encourages youth to nurture their interest for the visual arts, hunting, and wildlife conservation. It also reinforces the positive effects of hunting and wildlife conservation with the public at large.

Students grades 1 through 12 (including home-schooled children) are eligible to enter and all entries must portray North American game birds or animals that may be legally hunted or trapped. Artists have the chance to win thousands of dollars in prizes! For more information, visit <https://artcontest.nra.org/>.

Building the Next Generation of Hunters NRA's Youth Hunter Education Challenge (YHEC) provides a fun environment for kids 18 and under to improve their hunting, marksmanship and safety skills. Through its simulated hunting situations, live fire exercises, educational and responsibility events, YHEC helps build upon skills learned in basic hunter education courses and encourages safer, lifelong hunting habits. From rifle, bow and muzzleloader shooting at life-sized targets, to wildlife identification, map and compass orienteering and more, YHEC participants can get hands-on training in eight skill areas, giving them expertise in all methods of take and all types of game. For more information, please visit: <https://yhec.nra.org/>.

Shooting Sports Coach Development The NRA Coach Education Program offers multi-level training for coaches of the competitive shooting sports in partnership with USA Shooting, the Civilian Marksmanship Program, the Amateur Trapshooting Association, the National Skeet Shooting Association and the National Sporting Clays Association. Separate

coach training courses are available for rifle, shotgun, pistol and high-power rifle. It is our goal to provide every coach with the tools to be successful. The NRA is committed to creating a positive environment in which coaches, athletes, parents, officials and fans work together to achieve our mission in the shooting community. For more information, please visit: <https://coach.nra.org/>.

Rocky Mountain Elk Foundation: Conservation Awards & Scholarships

The Wildlife Leadership Awards (WLA) were established to recognize, encourage and promote leadership among future wildlife management professionals. The WLA grants scholarships to college juniors and seniors chosen for their dedication to wildlife conservation.

Each spring, the RMEF recognizes outstanding wildlife science college students through our scholarship program, the Wildlife Leadership Awards (WLA). Established to recognize, encourage and promote leadership among future wildlife management professionals, the program awards scholarships to college juniors and seniors chosen for their leadership ability, dedication to wildlife conservation and scholastic achievements. Awards include a \$5,000 scholarship and one-year RMEF membership.

WLA encourages young adults to pursue a career in conservation (wildlife management in particular) and provides a means for them to acquire the in-depth knowledge and experiences necessary to cement their commitment to the cause and become leaders in their field.

For more information, go to rmef.org/rmef-kids

APPENDIX

2. TRAINING COURSES

National Rifle Association Training *

***NRA Certified Rifle Instructor.** NRA Certified Instructors are individuals who are 21 years old or older. The NRA Instructor courses take experienced shooters and teach them to “teach” shooting using the NRA methodology and standards. The course is 14 hours and includes classroom and range activities with student teaching, evaluation and testing. The course is conducted by an NRA Training Counselor.

***NRA Certified Shotgun Instructor.** The NRA shotgun instructor course is 11 hours and includes classroom and range activities with student teaching, evaluation and testing. The course is conducted by an NRA Training Counselor.

***NRA Certified Range Safety Officer.** The NRA basic Range Safety Officer training is 9 hours and includes classroom and range activities with student teaching, evaluation and testing. The course is conducted by an NRA Chief Range Safety Officer or NRA Training Counselor. **For more information go to: <https://rso.nra.org/>**

***NRA Chief Range Safety Officer.** The NRA Chief Range Safety Officer training is approximately 8 hours and includes classroom and range activities with student teaching, evaluation and testing. The course is conducted by an NRA Training Counselor. **For more information go to: <https://rso.nra.org/>**

***NRA Training Counselor.** Qualified, experienced, certified instructors may apply for appointment as a training counselor to recruit and train new instructors to teach basic firearms training courses. To be eligible, they must:

- Be a member of the NRA

- Have at least 2 years of experience teaching discipline-specific NRA basic courses, conducting a minimum of 5 basic firearms courses with a total of 25 students.
- Attend a training counselor workshop and receive the endorsement of the NRA training counselor trainer.

***NRA Coach Education Program.** The coach education program under the Education and Training Division of the NRA offers both basic and advanced technical and tactical skills coach training schools for rifle, pistol, shotgun and high-power rifle along with training camps and clinics. Training reflects the latest in coaching philosophy and presentation methodology along with the most up-to-date techniques and competition tactics to help you and your team achieve your goals.

For information on all Education Programs offered by the NRA, please visit: <https://coach.nra.org/> for more information.

***NOTE-** Due to ITAR Regulations, NRA training can only be delivered to US Citizens. Please see specific information for your Province/Country for training provided in your locale.

APPENDIX

3. GRANTS

***NOT ASSOCIATED WITH NHSRA**

NRA Foundation Grants. For more than two decades, The NRA Foundation has served the needs of freedom-loving Americans across this great nation. We continue to teach freedom through programs that instill knowledge about our nation's great history. We build partnerships with leaders in our communities and provide grants that are instrumental in funding programs that support our shared vision.

Since our establishment in 1990, we've exceeded more than \$300 million in funding through more than 38,000 grants in support of the shooting sports. These grants provide essential funding that benefits programs such as youth education, law enforcement training, hunter education, conservation, firearms and marksmanship training and safety, and much more.

If your eligible organization or program is in need of funding assistance, you're invited to apply for a grant through The NRA Foundation. Two types of grants are available: General Grants are offered for supplies, equipment and consumables; Range Grants are offered to improve a range facility, for projects such as berm work, classroom, pavilion, road or trap machine improvements. Visit <https://www.nrafoundation.org/grants/frequently-asked-questions/> for more information.

Friends of NRA Banquets. Friends of NRA banquets are known for three things- fun, fellowship, and fundraising. For more information, please visit: <http://www.friendsofnra.org/>

Website: <http://www.cmich.edu/chsbs/x21965.xml> The Marksmanship Club and Rifle Team focuses on developing precision marksmanship of the cadets in the Chippewa Battalion. The cadre responsible for this club includes a nationally competitive marksman and a military trained sniper. Cadets receive focused training on .22 caliber competition-grade rifles, the M-16 rifle and the M-9 handgun, as well as various other weapons employed by the United States Army. The club utilizes our one-of-a-kind indoor rifle range, donated by Brigadier General (retired) John Kulhavi, on a weekly basis. They also take advantage of ranges in our local community and Army National Guard Posts to fire larger weapons and even provide familiarization with weapons like the M-249 Squad Automatic Weapon. The Rifle Team competes in national postal matches and is laying the groundwork for a local competition with other ROTC programs in the near future.

Comments: IUP Rifle Club participates in intercollegiate rifle competitions. Non-NCAA affiliated member of the Mid-Atlantic Rifle Conference (MAC). The primary criteria for membership in this organization will be competitive competence with the rifle. Supporting criteria will be sincerity of desire and competitive spirit. Membership will be on an annual basis and open to all IUP students. At the beginning of each academic semester, a four-week training program will be conducted for prospective members. Upon conclusion of the training course, a competition will be scheduled for all prospective and current members. This competition will yield membership for the year in question. It is believed that subjecting all concerned individuals to annual membership selection procedures will generate a responsibility for the development and retention of competence. IUP ROTC Program - IUP's Military Science Department is housed in one of the largest ROTC facilities on the East Coast,

including classrooms with multimedia and Internet capability, an indoor range for pistol and rifle marksmanship, and a library fully stocked with technical and field manuals. Cadets also have access to an outdoor track, several athletic fields and facilities, and a leadership laboratory. The ROTC program has two phases: The Basic Course, usually taken during the freshman and sophomore years, involves study of Army history, organization, structure, and basic military skills, such as rifle marksmanship, first aid training, and land navigation. The Advanced Course, taken in the junior and senior years, focuses on tactical operations and military instruction. Stressed throughout the courses are management, leadership, and command techniques. Scholarships available through the ROTC. Website: <http://www.iup.edu/ROTC/>

Comments: The Virginia Women's Institute for Leadership (VWIL) is the nation's premier leadership program for young women. The only all-female Corps of Cadets in the world, VWIL is comprised of academics, physical training, military leadership training, and a co-curriculum. Like MBC, VWIL is challenging, personalized, and transforming. VWIL students are

required to complete three years of ROTC. Four services — Air Force, Army, Navy, and Marine Corps — are available, and instruction is provided by the ROTC detachments at the Virginia Military Institute in Lexington, VA. Classes are conducted in the dedicated ROTC facilities located on the VMI campus or at Mary Baldwin College. In addition, all VWIL cadets participate in the band or rifle platoon of the Mary Baldwin College Corps of Cadets.

MASSACHUSETTS INSTITUTE OF TECHNOLOGY (MIT)

MIT PISTOL CLUB TEAM, 120 VASSAR STREET CAMBRIDGE, MA 02139

Details

Disciplines: Air Rifle, SB Rifle, Pistol, ROTC, NCAA, Varsity, Club Sport, Indoor Range

Equipment Provided: Yes

Intercollegiate: Yes

Comments: NCAA Affiliated Member, Mid-Atlantic Rifle Conference (MAC) ROTC Interservice Competitions MIT Pistol Club

No prior shooting experience is necessary. All MIT undergraduate students in full time enrollment (more than 36 units) are eligible to shoot competitively on the teams. Recruitment happens during the beginning of the school year with the Athletic Midway which is held during R/O week. If you are a grad student or employee, there is a pistol club at MIT that practices and competes on Tuesday nights and goes to local competitions. For more information go to <http://web.mit.edu/mitprc/www/index.html>. For the undergraduate teams, the season runs from September to March, with the first match in October. Training is currently from Monday to Thursday. The range is open for the teams from 4:30 to 7:00 pm (except on Tuesdays, when the pistol range closes at 6:30 for the MIT P&R Club). As with other sports, training is required, absences must be excused, and participation at home matches is expected. As your level of proficiency increases, you will be asked to go to away matches. You must be patient as it takes as much time to develop proficiency in pistol and rifle as it does in any other sport. However, if you train and stick with it, maybe you can join the ranks of our All-Americans and nationally ranked teams! There are also pistol P.E. classes available (basic and advanced), but slots are limited. Sign-ups are on P.E. registration days twice a semester and during IAP.

MTU PISTOL CLUB - 106 MEMORIAL UNION BUILDING, 1400 TOWNSEND DRIVE HOUGHTON, MI 49931

Details

Disciplines: SB Rifle, Pistol, Club Sport, Indoor Range
Equipment Provided: Yes
Intercollegiate: Yes
Comments: Website: <http://pistol.students.mtu.edu/> The Pistol Club of MTU is dedicated to providing a safe, secure, and enjoyable indoor shooting environment for shooters of all ability levels. We will help new shooters become acquainted with

firearm safety and basic shooting, and coach them to be as accurate as possible. The Pistol Club of MTU is partially funded by the Student Activity Fee as well as membership dues. We have several .22LR target pistols available for new shooters to try, and a couple of larger caliber firearms for more advanced shooters. Everyone is welcome at our range hours, from the most accurate bulls-eye shooters to the novices who have never held a firearm before. Michigan Tech is unusual in having a student-run firing range, and we set the highest safety standards for ourselves and our shooters in order to keep this wonderful privilege. The Competition Rifle Team is providing the very best in competition style training and athletic competitions. Our goal is to develop the marksmanship skills of the team members to a level at which the team can compete against NCAA division schools.

Comments: The NGCSU Shooting Sports Program includes two disciplines: Intercollegiate Rifle and Service Rifle & Pistol. The Intercollegiate Rifle Team is a division II NCAA Varsity team and a member of the South Eastern Air Rifle Conference (SEARC). The team competes in both the Air and Smallbore Rifle disciplines and has scholarships available to well-qualified athletes. The NGCSU Service Shooting team competes in many US Army (ROTC only) matches and various other Open matches. The team competes with service arms including the M-16 and M-9, among others. On campus 10-point indoor range for international rifle and pistol (air and .22) and several off campus outdoor ranges for all disciplines. Intercollegiate NRA and USAS competitions.

Comments: Army ROTC Education/ Individual SB and Air Competition via ROTC Weapons Team and Range Challenge Team competitions. Scholarships Available: Army ROTC scholarships (only) Website: www.mtsu.edu/aROTC. New: Clay Target Club of MTSU - The Clay Target Club of MTSU is a club dedicated to the promotion of the shooting sports on the collegiate level. Our goal is to generate competitions among TN universities and surrounding states in the hope that we can put MTSU on the map in the clay target arena. If you like the challenge of busting clay targets, then we have the club for you. If you would like to learn to shoot trap, skeet, sporting clays or any of the clays target sports, we can help you. If you have a competitive spirit and would like to shoot against Kentucky, UT Martin, and other collegiate teams, then you're looking in the right direction. We are a part of the fastest growing sport in the country, and you can be too!
