Power Adapter	Input: 100~240V~50/60Hz Output: 12V 3A
Pillow Cover Material	Polyester
Cord length	6 ft
Certifications	FCC, IC, CE

## 3.Using the Product

### Before Use

1. Plug the power adapter into a power source. Plug the DC connector of power adaptor into the temperature controller.
2. The side of the pillow with the embroidery is the heated side. Position the heated side of the pillow on the desired area of your body.

Note: To prevent a burn to your skin, do not apply the heated pillow directly to your skin.

### Operation

1. Turn the temperature controller on or off using the rocker switch. An LED will light up when the controller is powered on.
2. The temperature controller offers three heat settings, with the default being medium, indicated by a blue LED. Press the heat mode select button to select your desired temperature; the setting will be saved automatically. If the current temperature setting is too hot, please select a lower temperature setting or turn off the pillow. Use low temperature setting if you will put the heated pillow under your neck or back.

Note: Check the skin under the heated pillow frequently as burns may occur regardless of heat settings.

3. The auto shut off mode is enabled by default. The heat pillow will turn off heating and LED after 180 minutes of continuous use. After that, you will need to use to rocker switch to power off/on the controller to turn on the heated pillow again.
4. If you want to use the heated pillow continuously for more than 180 minutes, you may turn off the auto shut off mode by pressing the select button more than 3 seconds. The LED will blink one time to indicate the auto shut off mode was disabled. To re-enabled the auto shut off mode, press the select button again more than 3 seconds. LED will blink three times to

indicate the auto shut off mode was enabled. The setting will be saved automatically.

4.If the red LED flashes continuously, it means overheating or the temperature sensor can not read the temperature correctly. Turn off the pillow and stop using the pillow immediately.

5.Power off the temperature controller when the pillow is not being used.

## **Safe Use Instructions**

- 1.This product is for household use only and is not intended for commercial or medical purposes.
- 2.Use this product only for its intended use as described in this manual.
- 3.Do not attempt to disassemble or repair this product.
- 4.Do not leave this product unattended, especially around children.
- 5.Do not use this product while sleeping.
- 6.Do not fold this product. Do no sit on this product.
- 7.This product is not to be used on or by an invalid, a sleeping or unconscious person, a person with diabetes, or a person with poor blood circulation. This product must not be used by people who are not sensitive to heat or by vulnerable people who may not be react to overheating.
