

KC Flowmetering Ltd

Krohne Flowmeter Fact Sheet

This flowmeter is a proven machine that can stand up to the rigors of the agricultural industry. The Flowmeter is bolted to the spreading machine and a single cable connects to any KC Flowmetering Ltd in cab display. It can also be programmed to be used with some other manufacturers in cab displays.

It gives live, accurate readings on volumes {plus minus 1%} going through your pipework, the display is programmed in M³/hr and a total in litres. This can be changed if required.

*see below.
