

Bermuda Sour Strain Info

Bermuda Sour is a rare evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the delicious [East Coast Sour Diesel](#) with the potent [Triangle Kush](#). With a THC level that easily tops 21% on average and long-lasting effects, Bermuda Sour is one hefty-hitter that's perfect for any experienced hybrid lover. You'll feel a lifted onset a few minutes after your first toke, filling you with deep happiness and a touch of cerebral relaxation. As your mind settles into euphoria, your body will follow suit, leaving you completely at ease both physically and cerebrally. Thanks to these potent effects and its high THC level, Bermuda Sour is said to be perfect for treating a variety of conditions including migraines or headaches, depression, chronic fatigue, appetite loss, and chronic stress or anxiety. Bermuda Sour has a flavor of lemony diesel with a slightly pungent exhale. The aroma is very earthy with a sour diesel overtone that's very herbal and pungent. This bud has tapered olive green nugs with light thin amber hairs and a frosty thick coating of tiny bright white crystal trichomes

Black Runtz Strain Info

Black Runtz is a slightly indica dominant hybrid strain (55% indica/45% sativa) created through crossing the delicious Gelato X [Zkittlez](#) strains. This mouthwatering combination creates the perfect balanced bud with creeping effects and an amazing flavor to go along with it. The high will slowly sneak into both mind and body, hanging out in the background before suddenly taking center stage. You'll feel your mind launched into a state of pure mental energy and euphoria that makes you feel outgoing and sociable, ready to chat with anyone around you. As your mind soars, a heavy body high will begin to sink in, eventually locking you down to the couch and leaving you ready to relax. Given these effects and its high 19-29% average THC level, Black Runtz is often said to be perfect for treating a variety of conditions including chronic pain, chronic stress or anxiety, insomnia, chronic fatigue and arthritis. This bud has a sweet and creamy sugary citrus candy flavor with touches of spicy berries and fresh earthiness. The aroma takes it up a level, adding layers of flowery roses and fresh herbs to the mix. Black Runtz buds have dense and oversized, spade-shaped dark olive green nugs with bright purple undertones, thick orange hairs and a frosty blanket of chunky, vibrantly purple-tinted white crystal trichomes.

**BLUE
DREAM**

Blue Dream Strain Info

Blue Dream is a slightly sativa dominant hybrid (60% sativa/40% indica) strain that is a potent cross between the hugely popular [BlueberryX Haze](#) strains. This infamous bud boasts a moderately high THC level that ranges from 17-24% on average and a myriad of both indica and sativa effects. Users describe the Blue Dream high as having an immediate onset of an uplifting cerebral head high that leaves you completely motivated and focused with waves of creative energy that hit quickly and hard. This is accompanied by a mellow relaxing body high that leaves you warmed, numb, and completely pain free. Due to these potent combination effects, Blue Dream is said to be an ideal strain for treating patients suffering from conditions such as chronic stress, chronic pain due to injury or illness, mild to moderate cases of depression, and sleep disorders, including insomnia. Blue Dream has a delicious aroma of sweet blueberry pie and a taste of sugary sweet blueberries that stays on your tongue long after smoking. This bud has large dense yet fluffy popcorn-shaped bright neon green nugs with amber and blue hairs and rich blue undertones. These nugs are dusted with a fine layer of sandy milky white trichomes and sweet sticky resin.

Blueberry Cream Wafflez Strain Info

Blueberry Waffles is an indica dominant hybrid strain (70% indica/30% sativa) created as a unique phenotype of the infamous [Godfather OG](#) strain. Known for its amazing flavor, Blueberry Waffles packs a super potent high and long-lasting effect into each and every delicious little toke. Like its namesake morning treat, this bud has a sweet and sugary blueberry berry taste accented by a touch of nutty doughiness. The aroma is very similar, although it does have a notable punch of spicy, gassy diesel to it, too. The Blueberry Waffles high will hit you as soon as you exhale, beginning as a subtle tingle felt in the face and palms. This tingle will soon take hold of your brain, leaving you insanely euphoric and totally out of touch with reality, unable to focus on anything at all. As the tingle spreads throughout your body, you'll begin to feel totally relaxed and pretty locked to your couch without causing too much sedation. Combined with its high 21-28% average THC level, these effects make Blueberry Waffles a great choice for treating chronic pain, depression, chronic stress, nausea and cramps or PMS. This bud has fluffy and popcorn-shaped olive green nugs with deep purple undertones, thin red-orange hairs and chunky, amber-tinted white crystal trichome.

Blue M & M Sprinklez

Blue M&M Sprinlez Strain Info

M&M is an indica dominant hybrid strain (70% indica/30% sativa) created through a combination of [Northern Lights](#) and [Chemdawg](#) strains. Named for the iconic candy, M&M packs a delicious flavor and soothing high that will have you soaring for hours and hours on end. Much like its namesake, this bud packs a sweet chocolatey flavor with light touches of spicy skunk and woody pine. The aroma is on the heavier side of things, with a super skunky overtone that's accented by woody pine and a touch of earthy chocolate. The M&M high will settle in a few minutes after your final exhale, filling your brain with an expansive happiness that pushes out any negative or racing thoughts. A light physical tingle accompanies this heady lift, filling your body with a deep relaxation that drops you into a heavy state of calm. In combination with its high 15-20% average THC level, these full-bodied effects make M&M a great choice for treating those suffering from conditions such as chronic pain, muscle spasms or cramps, chronic stress or anxiety and insomnia. This bud has hand-shaped super dense forest green nuggets with thin orange hairs, dark amber undertones and a coating of frosty, amber-tinted white crystal trichomes

Candy Runtz Strain Info

Candy Runtz is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the iconic [Zkittlez](#) X [Gelato](#) strains. This gorgeous combination creates the perfect tasty child strain with an amazingly intoxicating flavor and mellow yet lifted effects that take on both mind and body. The flavor of Candy Runtz is exactly what you'd expect given its name, with hints of sweet fruity caramel candies accented by sour citrus and juicy, ripe berries. The aroma is just as delicious, with a bouquet of fresh fruits, sour citrus and creamy, caramel candies. The Candy Runtz high will settle in with a mellow onset, slipping into both mind and body with a deep sense of relaxation that envelops your entire being with a sense of calm. As you settle down into this happy place, a lifted effect will creep into your mind, filling you with a heady euphoria that puts a big smile on your face. As your mind lifts higher and higher, your body will settle down into the couch and leave you feeling a bit locked down. Combined with its insanely high 19-38% average THC level, these effects give Candy Runtz an edge in treating chronic stress, chronic pain, chronic fatigue, insomnia and depression or mood swings. This bud has fluffy, diamond-shaped forest green nuggets with super thin, red-orange hairs and a frosty coating of chunky, amber-tinted white crystal trichomes.

Cheetah Piss Strain Info

Cheetah Piss is a rare evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the iconic [Lemonnade](#) X [Gelato 42](#) X London Poundcake 97 strains. Made as a homage to the infamous “[Cat Piss](#)” strain, Cheetah Piss packs a super potent high and pungent aroma that will leave your eyes watering. The high comes on fast and hard with a sense of expansive euphoria that launches you into a purely happy state. As your mind flies higher and higher a sense of clarity will wash over you, giving you the focus that you need to carry on any conversation or easily tackle anything on your to-do list. In combination with its super high 20% + average THC level, these effects give Cheetah Piss an edge in treating those patients suffering from conditions such as chronic fatigue, depression or mood swings, chronic stress and chronic pain. This bud has a sweet and creamy fruity flavor with a sour citrus exhale that lingers long after your final exhale. The aroma is very similar, although with a heavy pungency to it that's accented by heavy diesel and gas as the nugs are broken apart and burned away. Cheetah Piss buds have bright neon green nugs with yellow orange hairs and frosty thick coating of golden amber crystal trichomes.

Cherry Trufflez Strain Info

Black Cherry Truffle is an indica dominant hybrid strain (70% indica/30% sativa) created through crossing the tasty [GMO X Cherry Fritter](#) strains. If you're after a potent bud with an even heavier flavor to go along with it, Black Cherry Truffle might just be the perfect strain for you. The high will hit you quickly, slamming into your brain with a burst of tingly, giggly euphoria that leaves you feeling insanely giddy and ready to get laughing. As your mood reaches new heights of insane happiness, you'll find a relaxing body high beginning to creep in, wrapping its way around you and leaving you kicked back and stimulated, sometimes aroused. Thanks to these effects and its super high 28-29% average THC level, Black Cherry Truffle is often chosen to treat a variety of conditions including chronic pain, depression, cramps or muscle spasms and headaches or migraines. This bud has a sweet and sour citrusy lemon flavor with hints of spicy skunk and black cherries. The aroma is very similar, with a spicy cherry overtone accented by dank, citrusy lemons. Black Cherry Truffle buds have dense, grape-shaped emerald-green nugs with bright purple undertones, thin orange hairs and chunky white crystal trichomes.

Cotton Candy Runtz Strain Info

Also known as [Cotton Candy Runtz](#), this strain is an indica-dominant hybrid, though the exact ratio of sativa to indica isn't widely known. Cotton Candy is a complex mix of [Power Plant](#) from South Africa and [Lavender](#) from Amsterdam, itself a blend of [Skunk](#) strains and an [Afghani Hawaiian](#). THC levels are relatively high, topping 22% in some samples, while CBD is much less prominent. That chemical makes up less than 1% of this strain, meaning Cotton Candy shouldn't be used as the sole treatment for conditions that respond to CBD, including seizure disorders. Expect a calming body high from this strain, along with cerebral effects, euphoria, and a boost of happiness. It's a good choice for patients who suffer from anxiety, migraines and other headaches, chronic pain, and everyday stress. Not surprisingly, the smell and flavor are reminiscent of cotton candy, with sweet, fruity notes and hints of other kinds of candy. Cotton Candy produces the usual side effects: dry mouth and dry eyes, as well as paranoia and dizziness. It sells best on the West Coast, in Arizona, in Colorado, and British Columbia.

Darth Vader OG Strain Info

A genetic breed of [Afghani](#) and [Kush](#), this indica dominant strain gets its name from its deep purple colored nuggets. The resinous and dense buds of this plant have an astonishing visual appeal. The plant can be grown indoors and outdoors, has a flowering period of 8 – 9 weeks and produces an average yield. This potent cannabis strain is an excellent cure for physical pains, anxiety, stress, insomnia and eating disorders. A few tokes of this pleasant strain will uplift your mood and trigger your appetite. After the euphoric effects of this strain disappear, you will be left feeling lazy and tired. This marijuana strain works well for those who have trouble sleeping at night. The aroma of this powerful strain is sweet with a sour tinge of grape and compliments the sweet earthy flavor very well. The strain offers a delicious, rich and smooth smoke and its buzz will last a solid 2 – 3 hours. Ideal for a lazy night, this strain will relax and soothe you, offering a floating sensation and helping you to drift off into a restful sleep.

Donny Burger OG Strain Info

Donny Burger is a indica strain (0% sativa/100% indica) created through crossing the powerful [GMO X Han Solo Burger](#) strains. Love a great sativa high but appreciate the physical effects of a hybrid? Donny Burger may be one snack that you'll want to indulge in ASAP. This tasty bud packs full-bodied effects that boost the mind and relax the body at the same time. You'll feel an instant sense of happiness wash over you as soon as you exhale, leaving your brain no room for negative moods or racing thoughts. You'll find that you're more sociable and charismatic in this state, happily chatting with those around you. A light physical tingle comes next, slowly working its way into your physical form and leaving you feeling stimulated and pretty kicked back. In combination with its high 20-28% average THC level, these effects make Donny Burger perfect for treating inflammation, chronic pain, insomnia, depression and chronic stress. This bud has a spicy and peppery cheesy citrus flavor with a punch of earthy anise. The aroma is of pungent spicy black licorice with a heavy cheesy overtone and hints of tangy sour citrus. Donny Burger buds have oversized grape-shaped piecey bright neon green nuggets with fuzzy orange hairs and a coating of frosty and chunky golden white crystal trichomes.

GARY PAYTON

Gary Payton Strain Info

Cookies Gary Payton, also known simply as “Gary Payton,” is a rare evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the classic They X [Snowman](#) strains. Known for its hard-hitting high and long-lasting effects, Cookies Gary Payton is definitely best suited for the experienced patient. The high comes on with an almost immediate effect, slamming into your mind with a high level of potency and launching it into a state of pure euphoria. As your mind flies higher and higher, you'll feel an increase in your energy level that is accompanied by focus and sometimes a case of the giggles. With these effects and its super high 20-25% average THC level and 1-5% CBD level, Cookies Gary Payton is often chosen to treat those suffering from conditions such as headaches or migraines, chronic stress or anxiety, depression and ADD or ADHD. This bud has a spicy yet sweet and savory diesel flavor with a lightly herbal exhale. The aroma is very similar, although with a heavy pungency to it that lingers long after the nugs are burned away. Ice Cream Cake Strain Info

Ice Cream Cake is a rare indica dominant hybrid strain (75% indica/25% sativa) created through a cross of the Gelato 33 X [Wedding Cake](#) strains. With this bud, the name says it all in the flavor department. Ice Cream Cake packs a super delicious cheesy creamy flavor with a sweet nuttiness that lingers long after you finish your final toke. The aroma is of the same nature, with a light pungent effect to it that's released as the nugs are burned. The Ice Cream Cake high is just as beautiful as the flavor, with lifted and relaxing effects that will have you kicking back in no time flat. The high starts with a rush of cerebral effects that lift your mind into a state of pure happiness and ease, pushing out any negative or racing thoughts immediately. Soon after, a relaxing body high will start to creep into your physical form, leaving you falling deeper and deeper into a couch-locked state of sedation before you eventually begin to drift away. With these calming effects and its high 20-25% average THC level, Ice Cream Cake is said to be perfect for treating those suffering from depression, chronic pain, insomnia, and nausea or appetite loss. This bud has small dense grape-shaped forest green nugs with thick orange hairs and frosty white crystal trichomes.

London Pound Cake Strain Info

London Pound Cake is an indica dominant hybrid strain created through crossing the delicious [Sunset Sherbet](#) with another indica-heavy hybrid strain. Named for its insanely delicious flavor, London Pound Cake packs a sweet berry and grape flavor accented by nutty lemon and citrus. The aroma is earthy and woody, with hints of nutty lemon and fruity berries throughout. The London Poundcake high is just as delightful as the flavor, with calming and centered effects that are both relaxing and lifting in nature. You'll feel a light lift at the onset of the high that fills you with a calming sense of centered focus, gently easing away negative or racing thoughts immediately. As your mind settles, a relaxing body high will sneak up on you, lulling you into a slightly couch-locked state that doesn't cause too much sedation or sleepiness at all. Thanks to these effects and its insanely high 26-29% average THC level, London Pound Cake is said to be perfect for the experienced patient suffering from conditions such as mood swings, chronic stress, depression, ADD or ADHD and chronic fatigue. MAC Mints Strain Info

MAC Mints, also known as “MAC Mintz,” is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the potent [MAC X Kush Mintz](#) strains. This celebrity child boasts a super delicious flavor, gorgeous appearance and amazingly stoney high into each and every toke. MAC Mints buds have dense and long pepper-shaped dark olive green nuggets with deep purple undertones, lots of thin amber hairs and a coating of tiny, milky amber crystal trichomes. As you pull apart each sticky little nugget, aromas of fresh mint, spicy black pepper and sour lemony chemicals are released, intensifying the more that you toke. The flavor is on the sweeter side of things, with a sour lemony citrus taste accented by a punch of spicy black pepper and sharp mint. The MAC Mints high will hit you almost as soon as you exhale, filling your mind with an instant sense of lifted euphoria. This mental boost will soon take a heady turn, leaving you totally stoned and out of touch with reality but with a big smile on your face. A tingly physical relaxation comes next, washing over you and lulling you into a state of soothing relaxation that can be arousing at times. Combined with its super high 23-24% average THC level, these effects make MAC Mints a great choice for treating a variety of conditions including chronic pain, insomnia, chronic stress, migraines or headaches and cramps or muscle spasms.

NEW YORK SOUR DIESEL

New York Strain Info

New York Power Diesel, also more commonly called “[NYPD](#)” by medical patients, is a sativa dominant hybrid (70% sativa/30% indica) strain created as a cross between the hugely popular [Aurora Indica](#) X [Aurora Borealis](#) strains. With a powerful THC level that ranges between 19-24% on average and a myriad of both cerebral and body effects, New York Power Diesel is a perfect bud for even the most discerning cannabis user! The high hits you almost immediately in the head with a crisp uplifting effect that leaves you intensely energized with a sense of creative focus and motivation. This happy cerebral high is almost violently cut by a narcotic indica effect that leaves you completely couch-locked and sedated with a heavy introspection that can leave you spacey and distant. Upon the comedown you'll be quickly pulled into a deep and peaceful sleep that lasts for hours on end without interruption. Because of these effects, New York Power Diesel is perfect for treating chronic fatigue, pain, insomnia, and mild to moderate cases of depression. This bud has an enticing aroma of pungent sour lemon with a hint of diesel and a taste of sweet diesel with a sour lemon aftertaste. These buds have long super leafy narrow pepper-shaped nuggets with light amber hairs and milky amber trichomes.

Orange Cream Strain Info

Orange Cream has a 70:30 ratio and is an indica-dominant strain whose parents are [Cookies N Cream](#) X [Orange Valley OG](#). . It has bright green leaves with orange hair and a crystalline outlook. It has a potency of 9/10 with a lasting effect of 1.5 to 2 hours. Its THC level is 20.65% and CBD level is 0.20%. [Orange](#) cream is a cross between orange crush and ice cream. The aroma of this medical strain is highly orange-like and dank. In terms of flavor, it tastes like candy. When you use this medical marijuana strain, you will instantly feel very relaxed, tingly and body buzz. If you are looking for a good appetite stimulator, or something that gives you relief from body or stomach pain, Orange cream is the right pick for you. It may not be good for overcoming headaches, but orange cream is a definitive solution for sleeplessness. For that precise reason, you may use this medical strain during the day. You may also use it otherwise only if you are not required to work on a focus-oriented task. Orange cream is also a powerful strain for overcoming symptoms of depression and anxiety. The users will experience an instant soothing effect on their body and mind. Its effects can make you feel heavy.

Oreoz Strain Info

Oreoz is an indica dominant hybrid strain (70% indica/30% sativa) created through crossing the delicious [Cookies N Cream](#) X [Secret Weapon](#) strains. Named for its super delicious flavor, Oreoz is a great choice for any indica lover after its high potency and great taste. As its name suggests, Oreoz packs a taste that's almost like a cup of Oreo dirt pudding, with sweet yet spicy chocolate and delicious nuttiness. The aroma is very similar, although with a touch of pungent diesel to it, too. The Oreoz high hits you almost as soon as you exhale, slamming into your mind and body with long-lasting effects that will have you soaring for hours. The high begins with a boost of cerebral effects, filling your mind with an uplifted sense of happiness that instantly washes away any negative or racing thoughts. As your mind flies higher and higher and your happiness expands, you'll be slammed with a heavy case of the munchies and a light physical high that helps you relax while you snack. Combined with its super high 22-33% average THC level, these full-bodied effects make Oreoz a great choice for treating those suffering from conditions such as appetite loss or nausea, depression, insomnia, chronic stress and gastrointestinal disorders. This bud has dense and lumpy bright neon green nugs with deep amber hairs and a coating of matching crystal trichomes dripping with sweet sticky resin from top to bottom.

PEANUT BUTTER BREATH

Peanut Butter Breath Strain Info

Peanut Butter Breath is a rare evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the classic [Dosidos](#) X [Mendobreath F2](#) strains. With this bud, the name says it all – the flavor is nutty and earthy with a rich herbal overtone. The aroma follows the same profile, with an earthy herbal overtone that's accented by rich nuttiness. As soon as you exhale, the effects of Peanut Butter Breath will sink in, starting with a cerebral lift before spreading throughout the rest of your body in tingly waves of energy. These tingles start in the back of your neck and spine before spreading their buzzing tendrils throughout the entirety of your body, leaving you hopelessly relaxed, kicking back without a care in the world - that is, until the munchies hit. Be sure to have some snacks on hand, since you won't really be able to get up off the couch to hunt for any at this point. With these long-lasting effects and its high 18-28% average THC level, Peanut Butter Breath is often chosen to treat conditions such as appetite loss or nausea, depression, chronic stress, or chronic pain. This bud has long grape-shaped olive green nugs with bright red-orange hairs and a coating of thick frosty white purple-tinted crystal trichomes.

PINK Runtz™

Pink Runtz Strain Info

Pink Runtz is a rare evenly balanced hybrid strain (50% indica/50% sativa) created either as a phenotype of the infamous [Runtz](#) strain, a [Zkittlez](#) X [Gelato](#) cross, or as a cross of the delicious Rainbow Sherbet X [Pink Panties](#) strains. Described as a strain that will have you 'talking to your forehead,' this bud brings on the unfocused and giddy effects that will leave you feeling totally out of it and completely happy about it. The high starts with a rush of cerebral effects, filling you with a happy sense of high-flying euphoria that immediately pushes out any negative or racing thoughts, replacing them with heady unfocused bliss. As your mind settles into this buzzy state, a tingle will begin to spread throughout your physical form, leaving you totally relaxed and kicked back, pain-free from head to toe. In combination with its high 23-25% average THC level, these effects give Pink Runtz an edge in treating conditions such as depression, chronic stress or [PTSD](#), mood swings, nausea or appetite loss and chronic fatigue. This bud has a sweet and fruity cherry berry flavor with a notable hint of sour candy. The aroma is very similar, although with a heavier sour overtone that intensifies as the nugs are burned away. Pink Runtz buds have dense spade-shaped minty green nugs with purple leaves, thin orange hairs and a thick frosty coating of tiny white crystal trichomes.

Purple Runtz Strain Info

Purple Runtz is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the delicious [Zkittlez](#) X [Gelato #33](#) strains. Named for its delicious flavor and gorgeous appearance, Purple Runtz is the perfect choice for any hybrid lover. This bud has dense grape shaped bright neon green nugs with thick orange hairs, vibrant purple undertones and a frosty, thick coating of tiny, purple-tinted white crystal trichomes. As you pull apart each sparkling little nugget, aromas of fresh sweet grape candy and sour citrus are released, accented by touches of fresh earthiness. The flavor is on the sweeter side of things, with a fresh tropical citrus overtone accented by sweet and sugary grape candy. The Purple Runtz high is just as delicious, with stimulating and lifted effects that will boost the mind while helping the body truly settle down into a state of pure ease. You'll feel euphoric with a happy sense of stimulating mental energy that quickly turns tingly and arousing. This tingle will soon spread throughout your entire body, leaving you feeling aroused yet relaxed and totally calmed from head to toe. Combined with its high 18% + average THC level, these effects make Purple Runtz a great choice for treating chronic pain, depression, chronic stress or anxiety and cramps or muscle spasms.

Raspberry Ice Strain Info

Raspberry Ice to most of the cannabis community, is an indica dominant hybrid (75% indica/25% sativa) strain created through crossing the infamous Raspberry Kush with an Ice Cream Cake strain. Raspberry Ice is the perfect choice for any patient looking for a delicious bud with happy relaxing effects that hit both mind and body. Raspberry Ice is said to have a sweet creamy flavor of raspberries and vanilla and an aroma to match. The Raspberry Ice high starts with a euphoric lift that boosts your mood and leaves you feeling completely happy and at ease. You may experience a slight decrease in energy that's very calming, pulling you down into slight buzzy sedation that numbs any physical or mental pains. With these effects and its powerful 16-20% average THC level, Raspberry is said to be perfect for treating conditions such as chronic pain, muscle spasms, insomnia, depression, and chronic stress or anxiety. Raspberry buds have grape-shaped neon green nuggets with rich purple undertones and hairs and a sticky coating of sweet syrupy resin topped with super tiny crystal clear trichomes.

RockStar Kush Strain Info

Rockstar Kush, also commonly called “Rockstar [OG](#)” by medical patients, is an indica dominant hybrid (75% indica/25% sativa) strain created through a cross of the insanely potent [Rockstar X Bubba Kush](#) strains. This powerful bud has a well-balanced but extremely potent high that is powered by an intensely high THC level that typically falls between 22-25% on average. The high starts with a feeling of uplifted euphoria with a hazy introspection that immediately relieves any feelings of anxiety or racing thoughts. This high slowly spreads throughout the body leaving you completely relaxed with a slight sense of sedation. This sedative feeling eventually leads to a pretty heavy couch-lock with an intense case of the munchies. In fact, the couch-lock can be so intense for some users that it can cause feelings of paranoia and fear. Because of these relaxing and heavy effects, Rockstar Kush is a favorite strain for treating chronic pain, chronic stress or anxiety, and inflammation. This bud has a delicious classic aroma of earthy skunky blueberry that becomes spicy and pungent when the nugs are broken apart. The taste is similar, with a flavor of rich spicy blueberry earth that has a pungent skunky aftertaste that intensifies upon exhale. Rockstar Kush buds have medium-sized lime green spade-shaped super airy nugs with rich amber hairs and a fine layer of crystal clear trichomes.

STRAWBERRY CAKE

Strawberry Cake Strain Info

Strawberry Cake, also known as “The Strawberry Cake,” is an indica dominant hybrid strain (75% indica/25% sativa) created through crossing the delicious [Chronic](#) X [White Widow](#) X [Cheese](#) strains. When it comes to the flavor of Strawberry Cake, the name says it all. This bud has a super sweet and creamy doughy strawberry cake taste with hints of sugary berries upon exhale. The aroma is very similar, although it has been said to be more like a strawberry cheesecake than a standard cake. The Strawberry Cake high is just as mouth watering as the taste, with classic indica effects that will please the pickiest of patients. The high has a cerebral build at the onset, slowly filling your mind with a sense of happiness that activates the senses. You'll feel a sense of mental clarity wash over you, filling you with focus and motivated creativity, perfect for when you have to take on any mental task on your to-do list. As your mind reaches new heights of focused euphoria, your body will begin to drop off into a deeply relaxed physical state that won't cause too much sedation. These effects combined with its high 16-22% average THC level make Strawberry Cake a great choice for treating chronic pain, depression, chronic stress or anxiety, mood swings and [PTSD](#). This bud has fat oversized spade-shaped bright neon green nugs with thin red-orange hairs and tiny, white crystal trichomes.

Super Sprinklez Strain Info

Sprinklez, also known as “Sprinkles,” is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the delicious [Zkittlez](#) X [Titty Sprinkles](#) strains. Famous for its amazing flavor and gorgeous appearance, you'll find yourself reaching for Sprinklez again and again to help soothe your aches and pains. Like its namesake treat topper, Sprinklez packs a sweet and sugary tropical fruity flavor with hints of vanilla and a touch of creamy butter. The aroma takes an herbal turn, with a sage overtone accented by sugary fruits and sour citrus galore. The Sprinklez high is just as amazing, with happy and lifted effects that will have you soaring for hours on end. You'll feel lifted and infused with a sense of energy and focus that gets you motivated and on task in no time at all. You'll feel creatively inspired and talkative, easily socializing with anyone and everyone around you. With these effects and its high 24-25% average THC level, Sprinklez is often chosen to treat a variety of conditions including chronic fatigue, headaches or migraines, chronic anxiety, ADD or ADHD, chronic stress and depression. This bud has dense and small spade-shaped olive green nuggets with dark purple undertones, thin red-orange hairs and tiny white crystal trichomes.

Sunset Sherbet Strain Info

Sunset Sherbert, also known as “[Gelato](#)” and “[Sunset Sherbet](#),” is an indica dominant hybrid (85% indica/15% sativa) strain created through crossing the delicious [Pink Panties](#) X [Girl Scout Cookies](#) strains. If you're a fan of sweet and fruity flavored cannabis, Sunset Sherbert is definitely made for you. This addictive bud has a fruity cookie flavor with a hint of minty cream and one of the smoothest exhales you'll ever experience. The aroma is slightly pungent with a sweet creamy overtone that's accented by fruits and a touch of sharp mint that will wake you up with one whiff. The Sunset Sherbert high is just as tasty as its flavors, with uplifted effects that are calming without weighing you down. The high begins with an almost immediate onset of an incredibly euphoric lift that instantly wipes away any negative thoughts and leaves you feeling happy. You might experience a slight increase in energy for a short while, but this typically fades very quickly into an overall sense of calm and awareness. These effects paired with its moderate 15-19% average THC level make Sunset Sherbert a great bud for all users who suffer from conditions such as chronic stress or anxiety, depression, and mood swings. This bud has oversized and super dense [Christmas tree](#) shaped minty green nuggets with long orange hairs and milky white trichomes scattered across each leaf.

Tropicana Strain Info

Tropicanna, also known as “Tropicana,” is a rare sativa dominant hybrid strain created through a potent cross of ([Pineapple](#) X [Kali Mist](#)) X [Northern Lights #5](#) strains. With a bright, clear-headed high and an eye-opening flavor, this bud is definitely one for the ages. Tropicanna hits you with a long slow building effect that creeps its way through your mind with euphoric energy and a clear-headed focus. You'll feel an influx of motivation and creativity along with an increase in sociability that lends itself well to conversation with friends. These effects are long-lasting in nature and perfect for an early morning pick-me-up for a busy day ahead. Thanks to these effects and its high 27-28% THC level, this bud is often chosen to treat conditions such as chronic stress or anxiety, depression, mood swings, and hypertension. Tropicanna buds have a sweet and sour citrusy lemon lime flavor with a hint of rich berries upon exhaling. The aroma is very earthy and citrusy with a lemon lime overtone and a sweet herbal effect as the nugs are burned. Tropicanna buds have long tapered forest green nugs with amber hairs and a thick frosty blanket of tiny white crystal trichomes.

Watermelon Zkittlez

Watermelon Strain Info

Watermelon Zkittlez is an indica dominant hybrid strain (70% indica/30% sativa) created through crossing the delicious [Zkittlez](#) X [Watermelon](#) strains. If you're after a bud that actually tastes like its name sounds, look no further. Watermelon Zkittlez packs a mouthwatering sweet citrus and watermelon flavor into each and every earthy toke. The aroma is of earthy herbs and rich fruity citrus with a heavily sour overtone that turns slightly pungent the more the nugs are burned. The Watermelon Zkittlez isn't quite as bright as the flavor, with effects that are best-suited for a lazy night at home rather than one spent off the couch. The high starts with a rush of cerebral effects that smash into your head with giddy and unfocused euphoria. As your mind soars higher and higher, your body will begin to settle into a deeply relaxing state, keeping you anchored as the head rush continues to rampage. Thanks to these cerebral effects and its high 25% + average THC level, Watermelon Zkittlez is said to be perfect for treating conditions such as mood swings, chronic stress or anxiety, neuropathy and chronic pain. Watermelon Zkittlez buds have heart-shaped dark olive green nugs with rich purple undertones, sparse orange hairs and a coating of tiny purple-tinted white crystal trichomes.

Midnight Sprinklez Strain Info

Midnight Sprinklez is an indica dominant hybrid strain (70% indica/30% sativa) created through crossing the delicious [Funky Charms](#) X [Runtz](#) strains. Named for its celebrity parentage and nighttime effects, Midnight Sprinklez is the perfect bud for any patient who's after some sweet relaxation before they get to sleep. The high settles in a few minutes after your final exhale, wrapping both mind and body with a warming sense of calm, almost like settling in under a heavy electric blanket. A boost in euphoria accompanies this deep relaxation, helping to lift your spirits even as you settle further and further into the couch or into bed. Thanks to these effects and its high 25-26% average THC level, Midnight Sprinklez is often said to be perfect for treating conditions such as chronic pain, inflammation, irritable bowel syndrome, depression and headaches or migraines. This bud has a sweet and fruity blueberry candy flavor with hints of sour citrus and a touch of spiciness. The aroma is of sweet fruity blueberries and spicy earth, accented by sour citrus and fresh herbs. Midnight Sprinklez buds have dense and small grape-shaped forest green nuggets with dark purple undertones, thin orange hairs and tiny, bright white crystal trichomes.

Banana Runtz Strain Info

Banana Runtz is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the classic [Banana OG](#) X [Runtz](#) strains. Love a super sweet candy flavor? You've got it with Banana Runtz. This baby has a sweet and sugary candy taste with hints of ripe banana and just a touch of black pepper, too. The aroma is just as delicious, although a little heavier, with a pungent and spicy overtone accented by fresh fruity banana and sour candy. The Banana Runtz high is pretty well-balanced overall, with effects that hit both mind and body with a high level of potency thanks to its 20-26% average THC level. You'll feel lifted with a sense of mental energy and motivation that has your euphoria flying and your focus ebbing and flowing. A relaxing physical effect accompanies this heady lift, freeing you of any aches and pains in both mind and body and letting you really kick back. With these effects, Banana Runtz is often said to be perfect for treating conditions such as depression, chronic pain, muscle spasms or cramps, arthritis and chronic stress. Zoy Strain Info

Zoy Sauce's origin story is as layered as its genetics, conceived from a desire to blend the most aromatic and flavorful strains into a singular, unparalleled experience. By marrying Zushi, Lemon Cherry Gelato, and Lemon Cherry Sherbert, Zoy Sauce benefits from a rich lineage that combines diverse terpene profiles and effects, resulting in a strain that is both potent and complex. The strain boasts a symphony of sweet, citrus, earthy, and pine notes, with a hint of creamy undertones. Dominant terpenes such as Myrcene, Limonene, and Caryophyllene orchestrate a rich and engaging sensory experience. Zoy Sauce Strain is renowned for delivering a profound and multifaceted high. It skillfully balances cerebral stimulation with physical relaxation, making it an excellent choice for users seeking to unwind while maintaining a sense of alertness and creativity. Its potent effects are beneficial for managing stress, anxiety, and pain, providing a comforting escape with a lingering sense of well-being. Zoy Sauce boasts **THC levels** ranging from 25 percent to 30 percent, making it a potent option suitable for experienced cannabis users. The CBD content is relatively low, emphasizing the Zoy Sauce features dense, resinous buds that are a feast for the eyes, adorned with a kaleidoscope of green and purple hues, accented by fiery orange pistils. The buds are sticky to the touch, hinting at the rich cannabinoid and terpene profile contained within. train's recreational and therapeutic benefits through its THC potency.

White Cherry Gelato Strain Info

White Cherry Gelato is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the classic White Cherry X [Gelato](#) strains. Known for its insanely delicious flavor and long-lasting high, White Cherry Gelato is one for the ages. This bud has a super sweet and flowery fruity citrus flavor with a hint of nuttiness to it, too. The aroma is earthy and sour with a citrusy overtone that's accented by spicy fruits and nutty herbs that turn savory and rich as the nugs are burned away. The White Cherry Gelato high settles in almost as soon as you exhale, hitting your mind first with a lifted effect before working its way throughout your entire body. You'll feel a stoney heady sense kick in, numbing your brain and leaving you feeling unfocused and not really ready to do much of anything. As your mind settles, your body will soon follow suit, dropping off into a deeply relaxing and calming state that's pretty immovable. With these effects and its high 15-21 THC level, White Cherry Gelato is often chosen to treat appetite loss or nausea, headaches or migraines, chronic stress and depression. This bud has popcorn-shaped forest green nugs with orange hairs and a frosty thick coating of dusty crystal trichomes dripping with sweet sticky resin.

Gummy Strain Info

Gummy is a slightly sativa dominant hybrid strain (60% sativa/40% indica) created through crossing the delicious [Peach Ringz](#) X Jetlatto strains. Named for its iconic gummy candy-like flavor, Gummy is a great choice for any patient who's after some mellow physical relief and a substantial mental boost to get through the rest of their day. Like its name implies, Gummy has a sweet and fruity strawberry gummy candy flavor with light touches of sour lemons and spicy black coffee. The aroma is very similar, although it does have a notable punch of spicy earthiness to it, too. The Gummy high is full-bodied and soothing in nature, with lifted effects that will boost the spirits while calming the body. You'll feel mentally lifted from the start, filled with a heady happiness that's slightly weighty and pretty creative. You'll find conversations flowing easily and laughter coming even easier in this state. At the same time, a mellow body high will begin to settle into your entire being, leaving you feeling pretty relaxed without affecting your mental energy level. Combined with its high 20-25% average THC level, these effects make Gummy a great choice for treating a variety of conditions including chronic stress or anxiety, depression or mood swings, chronic pain and nausea or appetite loss. This bud has dense rounded dark olive green nuggets with purple undertones, thin orange hairs and chunky, golden-white trichomes.

Hippy Crasher Strain Info

Hippie Crasher, also known as “Hippy Crasher,” is an indica dominant hybrid strain (80% indica/20% sativa) created through crossing the delicious [Wedding Cake](#) X Kush Mints strains. If you're looking for a bud that will really take hold and knock out any aches or pains, you've found it with Hippie Crasher. This bud comes on fast and hard, launching your mood to new levels of happiness while dropping your body into a state of pure physical relaxation and ease. You'll feel a euphoric creativity wash over your mental state, activating your mind and leaving you sociable and outgoing. As you carry on conversations with those around you, your body will begin to fall deeper and deeper into a relaxing and sedative state that can have you couch-locked and dozing. With these effects and its high 21-22% average THC level, Hippie Crasher is perfect for treating chronic stress, depression, mood swings, nausea or appetite loss, chronic pain and insomnia. This bud has a sweet and fruity berry cake flavor with a slightly nutty minty cookie exhale. The aroma is of sweet fruity cherries and sharp mint with hints of spicy nuts, too. Hippie Crasher buds have fat dense heart-shaped minty green nugs with orange hairs and a coating of tiny frosty white crystal trichomes

Florida Kush Strain Info

Florida Kush lineage is a fabulous interstate mix that unites LA Kush Cake – an indica-dominant Wedding Cake and Kush Mints crossbreed – with TK BX1 – Jungle Boys carefully backcrossed Triangle Kush cut. This latter strain, named for Florida’s three cannabis-producing capitals, lends its chatty psychoactive characteristics and chemical citrus pungency to the OG recipe, resulting in an updated pheno that’s packing all of the party atmosphere of the Sunshine State but with Californian-level quality. Both LA Kush Cake and Triangle Kush have a similar flavor profile that’s earthy and vanilla-tinged with a notable peppermint exhale, but the latter also has a slight chemical kick that sets it apart from other OG strains. Florida Kush aroma is similar, with a strong citrus quality that smells a little like bleach or floor cleaner and its taste evokes a similar fruity quality with heavy skunk notes and a minty finish. Florida Kush effects are typical of an OG strain but supercharged by its high THC content. Expect a stimulating, sativa-influenced start to the high and a talkative, cerebrally-charged experience paired with prominent physically relaxing effects that will kill pain and bad vibes almost instantly. This sedative side becomes ever more intense as the hours pass or if consumed in excess – a signature feature of high-quality indica strains – but it shouldn’t send you to sleep unless you really overdo it. Although perfect for euphoric [fun with friends](#) in the hot sun, it should be noted that Florida Kush THC content is around 29.5%, which can be easily pushed into the low thirties if reared correctly. For experienced users, the strain’s high pinene content may mitigate some of its unwanted effects, but if you’re of a low THC tolerance, then we recommend opting for something with a little less fire to avoid getting burned.

Black Cherry Gushers Strain Info

Black Cherry Gushers is an evenly balanced hybrid strain (50% indica/50% sativa) created through crossing the delicious Acai X [Black Cherry Funk](#) strains. This delicious combination creates the perfect candy-like bud with a gorgeous appearance and calming, full-bodied effects to go along with it. The flavor of Black Cherry Gushers will keep you coming back for more, with a sweet and fruity cherry overtone accented by spicy, sugary candies and a hint of juicy apricots. The aroma is very similar, with a spicy dark cherry overtone accented by sweet fruity apricots and a touch of woody pine. The Black Cherry Gushers high will wash over you fairly quickly, filling your mind first before taking on your body with high levels of potency. You'll feel your mind lifted into a place of pure happiness that is accompanied by a boost of sociability that has you ready to get chatting with anyone and everyone around you about anything at all. As your mind lifts higher and higher, a relaxing body high will begin to creep in, calming your entire body without causing too much sedation. In combination with its super high 26-30% average THC level, these effects make Black Cherry Gushers a great choice for treating a variety of conditions including chronic pain, chronic stress, depression, cramps or muscle spasms and the symptoms of PMS. This bud has super dense, heart-shaped dark olive green nugs with deep black undertones, red hairs and chunky white trichomes.

Peanut Butter Gelato Strain Info

Peanut Butter Gelato is an indica dominant hybrid strain (70% indica/30% sativa) created through crossing the delicious [Do-Si-Dos](#) X [Mendo Breath](#) strains. If you're after a smooth smoke and a delicious flavor with your favorite indica, Peanut Butter Gelato is totally the choice for you. This bud packs lifted effects from start to finish with a taste that will leave you begging for more. You'll feel the high hit you a few minutes after your final exhale, slowly creeping into your brain with a lifted sense that boosts your spirits, lifts your chin and has you with a calming happiness. This blissful state will quickly turn heady and unfocused, leaving you giggling at anything and everything. At the same time, a soothing body high will creep into your body, leaving you feeling totally sedated and completely locked to your couch for hours on end before you finally fall asleep. With these effects and its high 17-31% average THC level, Peanut Butter Gelato is often chosen to treat conditions such as chronic pain, depression, chronic fatigue, insomnia or nightmares and chronic stress. This bud has a super sweet and nutty creamy peanut butter vanilla flavor with touches of flowers upon exhale. The aroma is just as delicious, with a creamy peanut butter overtone that's accented by hints of earthy herbs and spicy flowers. Peanut Butter Gelato buds have fluffy heart-shaped bright neon green nugs with thin orange hairs and a coating of tiny white crystal trichomes.

Parlay Strain Info

Created by cannabis connoisseurs with the goal of providing quality weed to the California recreational market, **Parlay** lives up to its name by transforming what they're working with into something of much greater value.

Parlay has developed four unique strains in which they take great pride. Their clean and high quality approach to their products is evident, whether you are getting loose flowers or vaping cartridges. These are their signature strains:

- **Dolato** – Pungent cream aroma with gelato undertones, delivering a cream cake taste and a potent body high.
- **Miami Vice** – Gassy cake aroma with pine undertones, giving you a blanched body and head high through a piney cream cake flavor.
- **Gushers** – Slightly herbal overtone smell with hints of grape, a taste that evokes tropical fruits and creamy cookies, and a strong body and head high that doesn't make you drowsy.
- **Parlay OG** – Pungent pine aroma with gassy undertones, delivering a mostly piney taste with earthy undertones and an extremely potent body high.

Gushers Strain Info

Gushers is a slightly indica dominant hybrid strain (60% indica/40% sativa) created through crossing the classic [Gelato #41](#) X [Triangle Kush](#) strains. Named for the delicious candy, Gushers brings on the flavors with a combination of sour tropical fruits and rich creamy cookies in each and every toke. The aroma follows the same profile, although with a slightly herbal overtone and touches of spicy grape. The Gushers high isn't quite as bright as the flavor, with super relaxing effects that are best suited for lazy nights spent at home with friends catching up on Netflix. The high starts with an influx of tingly euphoria that fills the back of the head with slightly arousing tingles. This quickly spreads throughout the rest of your body, leaving you pretty aroused and incredibly relaxed through and through. You won't be sleepy in this state, but rather totally at ease with anything and everything happening around you. With these effects and its high 15-22% average THC level, Gushers is said to be perfect for treating chronic stress or anxiety, depression and chronic pain. This bud has elongated olive green nugs with bright green leaves, lots of thin amber hairs and a coating of tiny amber crystal trichomes.

Jet Fuel Strain Info

Jet Fuel, also known more commonly by the name “G6,” is a sativa dominant hybrid (70% sativa/30% indica) strain created through crossing the infamous [Aspen OG](#) X [High Country Diesel](#) strains. With its powerful 17-19% average THC level and soaring effects, Jet Fuel is often said to be the “cocaine of marijuana.” And after one hit of this heavy hitter, you'll definitely see why. The Jet Fuel high smashes into you with an immediate effect felt right in the forehead and behind the eyes. You'll feel euphoric and uplifted with a sense of tingly cerebral energy that can leave you super giggly at times. As your mind soars through the clouds, your body will succumb to a feeling of complete relaxation that doesn't cause sedation or couch-lock, but rather leaves you incredibly lazy. With these powerful effects, Jet Fuel is often a patient choice for treating chronic fatigue, migraines or tension headaches, chronic stress, mood swings, and depression. Jet Fuel has lumpy and flat heart-shaped olive green nuggets with furry amber hairs decked in glittering amber crystal trichomes. The flavor is incredibly pungent with a diesel overtone accented by sweet skunk. Jet Fuel's aroma is even stronger, with a pungent diesel effect topped with sweet skunk and pine.

Mac 1 Strain Info

MAC 1, also known as “Miracle Alien Cookies X1.” Is an evenly balanced hybrid strain (50% indica/50% sativa) created as a backcross of the iconic [MAC](#) strain. This celebrity child takes the beloved effects of MAC and amps it up a notch to a whole new level, with a super lifted feeling that will have you flying higher and higher the more that you toke. The high starts in the head with a rushing euphoria that fills your mind with an expansive happiness, gently easing away negative or racing thoughts and replacing them with creative motivation and pure happiness. A relaxing body high accompanies this cerebral lift, keeping you tethered to the world below as your mind soars higher and higher into outer space. In combination with its super high 20-23% average THC level, these heavy effects make MAC 1 perfect for treating those suffering from conditions such as chronic pain, mood swings, chronic fatigue, depression and chronic stress. This bud has a classic sour diesel flavor with a spicy herbal overtone that's accented by sweet citrus. The aroma is very similar, although with a heavy pungent overtone that lingers long after your final toke. MAC 1 buds have rounded fluffy dark olive green nuggets with rich purple undertones, thin orange hairs and a coating of tiny white crystal trichomes.

Madison Square Gumbo Strain Info

Madison Square Gumbo is an indica dominant hybrid, it was named after a bubble gum flavor, but it is not to be underestimated. The buds are covered by crystals and are light green in color. Additionally, they are incredibly frosty making it irresistible to any cannabis user. With a 65:35 indica/sativa ratio, it has an amazing 20% THC content. As for the aroma, it is incredibly sweet and smells like bubblegum. It goes without saying that it is one of the very few cannabis strains that smell exceptionally good. The taste is intense, sweet and hashy with bubble gum undertones. Moreover, it has a sugary taste to it and is no different than candy in this regard. Just like its taste, the high is intense and packs quite a punch. Additionally, you will experience symptoms of couch-lock. It is the perfect strain for those who plan to stay indoors and do nothing else than watch TV. The high easily lasts for two hours. You have to keep in mind that you will get the munchies, which is why it is a good idea to have some snacks lying around. That being said, considering the effects of the strain it is quite beneficial for patients suffering from stress, pain, muscle spasms and even sleeplessness.

Mimosa Strain Info

Mimosa is a sativa dominant hybrid strain (70% sativa/30% indica) created through crossing the classic [Purple Punch](#) X [Clementine](#) strains. If you're looking for an early morning pick-me-up (minus the alcohol), this bud is totally for you. Mimosa packs bright and happy daytime effects that are perfect for chasing sleep away and giving you a positive mood as you take on your day. You'll feel an energetic, clear-headed lift at the onset of the high, which fills your brain with euphoric motivation and laser-sharp focus. A light tingle accompanies these effects, resting mainly in the body rather than your head. With these effects and its high 19-27% average THC level, Mimosa is said to be the perfect choice for treating those suffering from conditions such as depression, chronic stress or anxiety, ADD or ADHD, migraines, and nausea or appetite loss. This bud has a sweet and sour tropical citrus flavor with a light berry exhale, almost like a fresh mimosa! The aroma follows the same profile, although with an influx of woody florals and fresh earthy herbs. Mimosa buds have rounded dense small olive green nugs with lots of dark orange hairs and a coating of bright white crystal trichomes.

OG Kush Strain Info

OG Kush, also known as “OGK,” is a slightly sativa dominant hybrid strain (55% sativa/45% indica) with unknown parentage due to breeder secrecy, although it is thought to be a cross of the iconic [Chemdawg](#) X [Hindu Kush](#) strains. Probably the most famous strain in the world of medicinal marijuana, OG Kush is the perfect hybrid for any indica or sativa lover. It starts almost as soon as you exhale, filling your brain with an uplifted sense of unfocused happiness and ease. You'll find yourself feeling sociable and outgoing, chatting with anyone and everyone around you, although you may fall in and out of fits of the giggles at times. A pang of hunger comes next, leaving you with a heavy case of the munchies and reaching for anything in sight to snack on. Combined with its high 20-26% average THC level, these effects make OG Kush a great choice for treating those suffering from conditions such as chronic stress or anxiety, mood swings or depression, appetite loss or nausea and migraines or headaches. This bud has a classic sour citrusy flavor with hints of woody pine. The aroma is very similar, with a spicy kushy overtone that's accented by sour citrus, woody pine and pungent dank. OG Kush buds have fat grape-shaped forest green nugs with long, thin orange hairs, golden undertones and a coating of tiny, golden-white crystal trichomes.

Pink Rozay Strain Info

Pink Rozay is an indica dominant hybrid strain (80% indica/20% sativa) created through crossing the delicious [Lemonchello 10](#) X LPC75 strains. Named for its gorgeous color and delicious flavor, Pink Rozay is one indica that you need to try. This bud has dense spade-shaped olive green nugs with deep pink and purple undertones, bright orange hairs and a coating of frosty purple-tinted white crystal trichomes. As you pull apart each sticky little nugget, aromas of sweet strawberries and nutty herbs are released. The flavor follows the same profile, with a sweet strawberry overtone accented by spicy florals and nutty herbs. The Pink Rozay high is just as delicious as its taste, with long-lasting effects that hit the head and body with a high level of potency. It comes on fast and hard in the head, smashing into the mind with an uplifted tingly effect that leaves you dazed and happy about it. As your mind reaches this point of blissful oblivion, your body will begin to settle into a relaxing state that keeps you anchored by causing too much sedation. With these effects and its high 16-18% THC level, Pink Rozay is often chosen to treat conditions such as chronic fatigue, depression, mood swings, chronic stress and chronic pain.

Skunk Butter Strain Info

Skunk Butter, is an indica dominant hybrid strain (70% indica/30% sativa) created through crossing the tasty [Peanut Butter Breath](#) X [Velvet Glove](#) strains. An amazing indica with long-lasting effects, Skunk Butter is the perfect choice for any patient who's after a delicious flavor and almost endless high. Like its name suggests, Skunk Butter has a super sweet and creamy buttery nutty flavor with a touch of sour citrus to it, too. The aroma is just as delightful, with a creamy buttery overtone accented by sour citrus, sweet fruits and a punch of spicy herbs. The Skunk Butter high has a mellow onset before suddenly launching you into outer space. You'll find your mind instantly launched into a high-flying zone of euphoria that'll have you feeling pretty hazy and chatty. You may also begin to succumb to heavy cases of the giggles in this state, laughing at anything around you for any reason at all. With these effects and its super high 24-29% average THC level and 0-2% CBD level, Skunk Butter is often chosen to treat a variety of conditions including chronic fatigue, depression or mood swings and chronic stress or anxiety. This bud has small and dense tight dark olive green nugs with deep purple undertones, thin orange hairs and tiny purple trichomes.

Sour Sunset Strain Info

Sour Sunset is a rare slightly indica dominant hybrid (60% indica/40% sativa) strain created through crossing the delicious [AJ's Sour Diesel](#) with [Sunset Sherbet](#). The flavor of Sour Sunset is everything you want from a fruity bud, with tastes of rich tropical fruits blending together for a flavor explosion that will leave your mouth watering. As each bright neon green frosty nug is broken apart, you can detect fresh scents of delicious fruits that quickly turn sour and pungent with a diesel overtone as the nuggets are burned. The Sour Sunset high kicks in only a few minutes after you toke, slowly rushing through your body and into your head with a tingly sense of euphoric energy that leaves you feeling creative and uplifted. This energy will ebb and wane, moving in and out of your body, leaving you alternating between feeling motivated and feeling completely lethargic. This effect can cause some anxiety, so be careful if you're prone to feeling it! In combination with its high 18-24% average THC level, these effects make Sour Sunset perfect for treating conditions such as chronic fatigue, headaches or migraines, depression, and insomnia.

Super Wedding Cake Strain Info

Super Wedding Cake is, sometimes called [Pink Cookies](#), a hybrid with indica-dominance. It is attained by crossing [Triangle Kush](#) and [Animal Mints](#). It gives an exceptionally sweet aromatic essence and a fruity flavor. The taste is a perfect combination of sweetness of cookies and fruitiness of a cherry pie. It works as a calming agent and appetite stimulator, and is quite helpful for patients who experience regular depression-associated syndromes, fibromyalgia, MS and other such related symptoms. It may act as a sedative for patients, but does help in calming down nerves or controlling anxiety stimulating symptoms. Although it might not completely hamper your focus and energy levels, it will cause the usual drying out of eyes and mouth. This particular medical marijuana is grown indoors. It is observed to contain a THC level of 25-27%. In terms of physical features, it is shaped like pine trees and looks dense in its structural form. It is quite frosty looking and has dark green leaves. This particular medical marijuana is also thickly dressed up with orange hair all over it. It is most generally known for its sugary taste, as well as high potency value.

White Truffle Strain Info

White Truffle is an indica dominant hybrid strain (80% indica/20% sativa) created through crossing the potent [Gorilla Butter X](#), another unknown hybrid strain. If you're a fan of powerful indicas with arousing and intoxicating effects, you might just want to put White Truffle on your shopping list. The White Truffle high is a great choice for a late evening, with soothing and sedative effects that will stimulate the body before leaving you dozing. You'll feel lifted from the onset, filled with a light sense of happiness that also helps to slightly numb the brain. As your mind settles, a tingly physical effect will begin to wash over your entire body, eventually lulling you into a state of arousal that has you feeling relaxed, kicked back and ready to get to sleep. A heavy sedation rounds things out, so get ready to get dozing! In combination with its high 18-26% average THC level, these potent effects give White Truffle a notable edge in treating a variety of conditions including chronic pain, chronic stress or anxiety, nausea or appetite loss, cramps or PMS and insomnia. This bud has a sweet and sour citrusy lemon flavor with hints of herbal garlic and spicy black pepper. The aroma takes it up a notch, adding a fresh woody pine effect to the equation. White Truffle buds have long and fluffy, pepper-shaped dark olive green nuggets with deep purple undertones, thick orange hairs and chunky, purple-tinted white crystal trichomes.
