

WHOLE HOUSE WATER TREATMENT SYSTEM

NO SALT HYBRID ALKALINE WHOLE HOUSE WATER SYSTEMS

U.S. VORTECH PATENTED PLATES

Vortech

PATENTED VORTECH DISTRIBUTION TECHNOLOGY

Endorsed By KDF®

- Optimal Backwash & Cleaning Action
- Distributes Water Throughout the Media Beds
- No Channeling of Media
- High Flow Design Maximizes Efficiency
- Saves Water Money and the Environment

Gold Seal WQA
Clack Digital Demand Valve
 H₂O Management Controller
 1" - 1 1/4" - 1 1/2"

Clarifier Super Filtration
 3-Micron

Bacteriostat Patented
 55/85

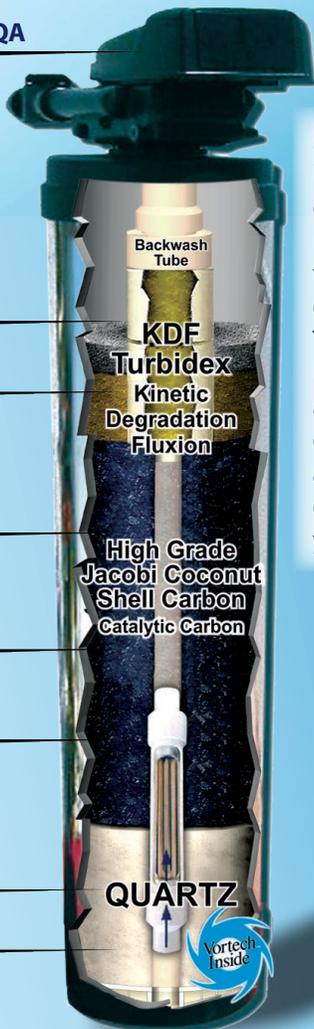

High Grade Jacobi Coconut Shell Carbon

Refiner
 Chlorine THMs-VOC Chloramine

Centaur
 Catalytic Carbon

Polisher
 Final Stage Maintains H₂O Quality

Ionizer

SALT-FREE HARD WATER IONIZER

Multi-polarity magnetic ionization magnetically charges the calcium molecules, causing them to repel instead of attract one another. This converts calcium bicarbonate to calcium aragonite, which prevents calcium deposits from accumulating and creating scale build-up in your plumbing system.

HYBRID 6 Stages

Every Go Green Best Price Water System™ features the Revolutionary New 21st Century Patented Vortech-Mid-Vortech™ Distribution Technology from Enpress®.

Our No Salt Alkaline Systems feature the state-of-the-art H₂O Multi-Polarity Magnetic Ionizer retaining the healthy alkaline minerals in the water while reducing hard water scale. The combination of the Patented Vortech-Mid-Vortech™ Distribution Technology and the H₂O Multi-Polarity Magnetic Ionizer makes it the most environmentally friendly Go Green Whole House Alkaline Water Filtration System™ on the planet.

FLUID TREATMENT, INC.
Solutions for economical clean water.™

COMPOSITE PRESSURE VESSEL

The **PATENTED ENPRESS Vortech™** and **Mid-Vortech™** distribution technologies are revolutionizing the water treatment industry. The design creates fluidity of the media bed and extends contaminant removal capacity; which means less regenerations and significant reduction of water use...saving water, salt and the environment, with backwash flow rate reductions of at least 30%. So it's easier to go green and save green at the same time.

- Up to 30% less backwash flow rate is required... conserving water for the consumer
- High flow design maximizes today's high efficiency valve technology
- Permanent attachment of dip tube to distributor, so when servicing a valve, distributor stays in place, no more re-bedding
- Vortech distributor plate is designed for over 6,500 lbs. Load capacity
- Most efficient softening regeneration, reducing salt consumption
- Self-cleaning nozzle design eliminates potential clogging and build-up
- Available for 9", 10", 12", and 13" tanks; adapters for 1" and 1-1/4" valves
- Increase in softening capacity due to improved flow through media
- No channeling of media, providing a cleaner more efficient system
- Environmentally friendly, reduction in required backwash times due to improved bed lift and mixing... at lower flow rates
