

Fall is the time to test your soil for spring planting of your trees and bushes; we have a cost sharing program to help with your testing. That way you will have time to add any amendments required for the spring planting of your trees. It will also help in choosing the right tree for your location. Soil Lab that gives soil and microbe health reports on your soil gives us a better picture of how to amend and which plants will do better in your soil. The three I have located that provide this kind of report are
