

[Complete Crop Test](#)

[Soil Testing](#)

Our most popular option is the Complete Crop Test which includes everything that the Basic and General Crop Tests include but adds on a plethora of important test including Iron, Manganese, Copper, Calcium, Magnesium, Sodium, CEC+ Base Saturation.

[General Crop Testing](#)

[Soil Testing](#)

One step up from the Basic Crop Test is the General Crop Test which includes everything offered in the Basic Crop Test but includes testing for Sulfur and Zinc.

[Basic Crop Testing](#)

[Soil Testing](#)

Our basic crop test is the first level in our crop testing format, It cover s many of the basics to give you a decent overall health of your crops. The test include testing for Nitrates, Soil pH, Phosphorus, Buffer pH, Potassium, Soluable Salts, and Organic Matter.
