COST CALCULATION

Rates are based on the deductible and medical limit you choose along with your age and the length of your trip. The plan pricing tables provide daily rates based on these variables.

Three easy steps to calculate your plan cost:

Step 1 - Pick a plan deductible and medical limit from the rate tables

Step 2 - Find the corresponding daily rate based on the age of the enrollee

Step 3 - Multiply the daily rate by the number of travel days required (7-day minimum)

Cost Calculation Example:

A 50-year-old traveler selecting a TravelGap Excursion Plan plan with a \$250 deductible and a \$500,000 medical limit would pay a daily rate of \$4.12. For a 10-day trip, the plan cost would be $\$4.12 \times 10 = \41.20

Please Note

If you purchase the TravelGap® Single Trip Excursion plan, you must be concurrently covered by a primary health plan and you are not subject to a Pre-existing Conditions exclusion. TravelGap® Single Trip Voyager has a Pre-existing Condition exclusion.
