

I had the opportunity to work for 16+ years with Mark when he led medicinal chemistry efforts in large Pharma, and in his current consulting role (as President of Scicon Solutions). I found Mark to be a science-based, diligent colleague who I enjoy exchanging and bouncing thoughts and ideas often. Mark brought with him many years of experience in medicinal chemistry, in multiple therapeutics including neuroscience. His efforts resulted in the progression of several molecules into the clinic. I treasure his deep and professional knowledge.
