

Art Classes

Understanding how to draw can build confidence for students. Even very young students can be taught to look at simple shapes and reproduce what they see. At each class we learn the alphabet of drawing- the straight line, the curved line, the dashed line, the closed shape and the filled in shape. These are practiced in abstract warmups and then applied to a simple line drawing. Then we proceed to another free form project such as a model or a painting.

September

Dinosaurs

Learn to draw dinosaurs, then create silhouette paintings and dioramas.

October

Famous Structures

From the Golden Domes of Eastern Europe to the bridges in Venice, lighthouses and Monet's Bridge at Giverny. We will tour the world and all manner of architecture.

November

Art Through History

We will explore ancient cave paintings, frescoes by Angelica, weather scenes by El Greco, and Impressionism by Van Gogh

December

Christmas Crafts TBA
