

Art Classes- Basic Drawing- Theme- Oceans

January and February

Understanding how to draw can build confidence for students. Even very young students can be taught to look at simple shapes and reproduce what they see. Students are given a story for inspiration. Then we learn the alphabet of drawing- the straight line, the curved line, the dashed line, the closed shaped and the filled in shape. These are practiced in abstract warm ups, and then applied to a simple line drawings, which can be colored. We finish up with a free form craft- such as a model, or a painting.

March- Theme- The Jungle

With the confidence to reproduce an image, we do a 3D lion face, with paint, and a collage inspired by John Klee about birds.
