Synthetic Turf

XGrass offers synthetic turf that will revolutionize your outdoor space. Designed to look just like healthy, well-trimmed, natural grass, our products require very little upkeep to look stunning.

We’ve built the most experienced team in the industry to meet our superior quality standards and ensure our customers receive the best-finished product. We strive to provide the most distinct synthetic turf surfaces, creating personalized solutions for landscapes, pet areas, playgrounds, water parks and sports.
The Benefits of XGrass Synthetic Turf

Made In The USA
All of our surfacing options are made right here in the USA.

Shine Block
Our goal is to not “outshine” the competition. Shine Block blade profiles reduce the reflective quality of the fiber allowing our grass to appear more like a healthy, well-trimmed, natural lawn.

Heat Block
With Heat Block color options, our turf is cooler than the competitions’ artificial grass systems.

Infill Options
Envirofill is an anti-microbrial, non-toxic, non-flammable infill that stays cooler and lasts longer than other infill materials.

XGrass Infill is made from a specially formulated blend of clean and uniform, round quartz sand designed to reduce compaction over time.

Duraflo® Backing is an innovative backing system developed exclusively for XGrass that offers the following significant benefits:

- **100% Recyclable**: Turf with Duraflo can be ground up into pellet form and utilized in a vast array of injection-molded products.
- **Permeable**: Our non-perforated Duraflo is up to 50% more permeable than perforated urethane backed products and won’t clog like hole-punched systems.
- **Polyolefin Backing**: Absorbs no moisture and thus minimizes expansion and contraction resulting in less stress on seams.
## Turf for Every Application

### Play Areas
XGrass synthetic playground turf is designed from the ground up for safety. With exclusive SofPad, Heat Block, and Envirofill, our synthetic turf system is one of the safest play surfaces available today.

### Pet Solutions
Animals can be tough on natural grass, pounding it to dirt or mud. But XGrass artificial grass will stand up to feet, paws, hooves or anything in between.

### Landscapes
XGrass landscapes are practically maintenance-free, edge-to-edge. XGrass turf always looks bright, green and fresh-cut, even in the harshest conditions. It’s soft, safe, comfortable, easy to maintain.

### Sports
When it comes to sports turf, one size (or one type of artificial grass) does not fit all. Your XGrass representative will work with you to match turf to your specific application, install location, local climate and other factors.

### Field Solutions
Between sports and the weather, the world can be tough on turf. But XGrass is tougher. Let us help you choose the low-maintenance synthetic turf for your facility.

### Water Play
The surfaces around your pool or water park are often hot and, worse, slippery when wet. XGrass artificial turf can alleviate these hazards.
Play Areas

- **Safety First**
  IPEMA certified, meets ASTM F1292 requirements for up to a 12’ fall height. Compliant with HIC standard.

- **Low Maintenance**
  Eliminates constant maintenance of loose fill surfacing.

- **Kid-Friendly**
  Dries quickly, allowing children to play immediately following a rain. Reduces allergic reactions caused by grass.

- **Environmentally Friendly**
  Earn up to 6 LEED points.

---

**XGrass synthetic turf meets ASTM 1292 requirements.**

**SofPad is our innovative pad providing the ultimate shock absorption and drainage.**

**XGrass synthetic turf ensures safety and accessibility across installations.**

XGrass works with clients to develop creative and safe solutions for any space!
Pet Solutions

- **Low Maintenance**
  Requires no watering, Less downtime due to weather or maintenance, Stays green all year long

- **Superior Drainage**
  Drain Tile installed beneath turf for maximum drainage

- **Pet Friendly**
  Minimize pests and allergen exposure, Provides safe, mud-free playing surface

**TruFlo Backing**
Our 100% permeable, TruFlo backing system allows liquids to flow through at rates over 400 inches per hour. That’s the highest drainage rates available.

**Envirofill**
Infused with Microban® antimicrobial technology, Envirofill inhibits the growth of bacteria, mold and mildew that can cause stains, odors, and product deterioration.

**Tile Subsurface**
Drain tile installed beneath your turf allows water to drain away quickly and completely. The drain tile provides airflow under the turf and a cleaner drainage path for waste and flushing.

**Odor Treatment**
ProVet Logic Kennel Care is an environmentally-friendly, enzymatic spray that will seek out and degrade odor causing organic matter from hard to reach places leaving a fresh-smelling, clean surface for your pets.

XGrass Total Service Promise

Our Promise to You

We believe installing our products should be a seamless, hassle-free experience. Our promise is to provide all of the expertise and materials you need for your artificial grass, rubber surfacing, court tile and mulch projects.

Rather than having multiple points of contact throughout your project, with XGrass, you’ll deal directly with a company representative from your area before, during and after installation. Our team has over a hundred years combined experience and we are confident that internal control of the installation process is the best way to ensure enduring quality.

Do you have what it takes?

At the end of a job, it’s easy to stand back and admire its beauty. But are you ready to ensure that it’s beauty that lasts a long time?

At XGrass, we believe the most important ingredient in our XGrass Service Promise is our network of certified dealers. Their knowledge, experience and expertise runs deeper than any other team in the industry. Their commitment to creatively and effectively solve our customers’ challenges is second-to-none. And just as importantly, their willingness to go above and beyond, even after the sale, is unmatched.

We’re always looking for certified dealers who can help us make our XGrass Service Promise even stronger.
