Holcomb attends Evansville/state police groundbreaking ceremony

Governor Eric Holcomb was in attendance for the groundbreaking ceremony of the Evansville District 35 extension. Pepper Construction has partnered with the state in a 100-million project to add much needed space to three current ISP facilities in Fort Wayne, Lowell and Evansville.

The Evansville location will receive an additional 40,000 s.f. housing a new state-of-the-art forensics lab and become a regional hub impacting the drug unit and increasing forensic laboratory services across the state. The ceremony was held Friday, June 23, at the current Evansville post, 9411 U.S. 41, just south of I-64.

Indiana Gov. Holcomb speaks to groundbreaking attendees in Evansville.

“This facility will touch every major crime in about 20 counties in the southwestern part of Indiana, so it’s so very important,” said State Superintendent Doug Carter.

This facility will also provide more jobs, giving ISP a 30-percent growth. Indiana State Police expects the new laboratory to be finished by late next year. Pepper Construction is thrilled to participate in this transformative project that will impact those that work hard to protect us every day.
