## THE BIG IDEA

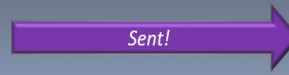

*This has the possibility of becoming as big as Tiktok*

**- POTENTIAL MAJORITY INVESTOR**

BlastMobileApplication.com

## BIOGRAPHY:

Blast came as an idea one evening when the creator was watching the family taking videos and sharing with each other and friends during holiday. They were racing to see who could get their videos out to as many people as possible first. After doing some research, it turns out most similar sites are focused on Business to Business and Business to Consumer market initiatives. It was found that only one application has the same concept but is only available on one platform (android) and takes several steps to achieve the same goal. The Blast app is simply for creating and sharing content as fast as possible on multiple platforms (iOS, android, etc...). Our end users are the focus. Blast is not for creating marketing campaigns or slogan sharing. Blast is being created with only one goal in mind, being the fastest and easiest content sharing application on the market.

### About the Creator:

Hi potential backers, a little something about myself, I have been in the technology workspace most of my life along with over 20 years of markets investing. I have experience in global technology distribution, money management, and a degree in business management from a private university. I am currently enrolled in graduate studies in Harvard University. I have also built and managed several web-based businesses dating back to 2003.

# PUT THAT ON BLAST!

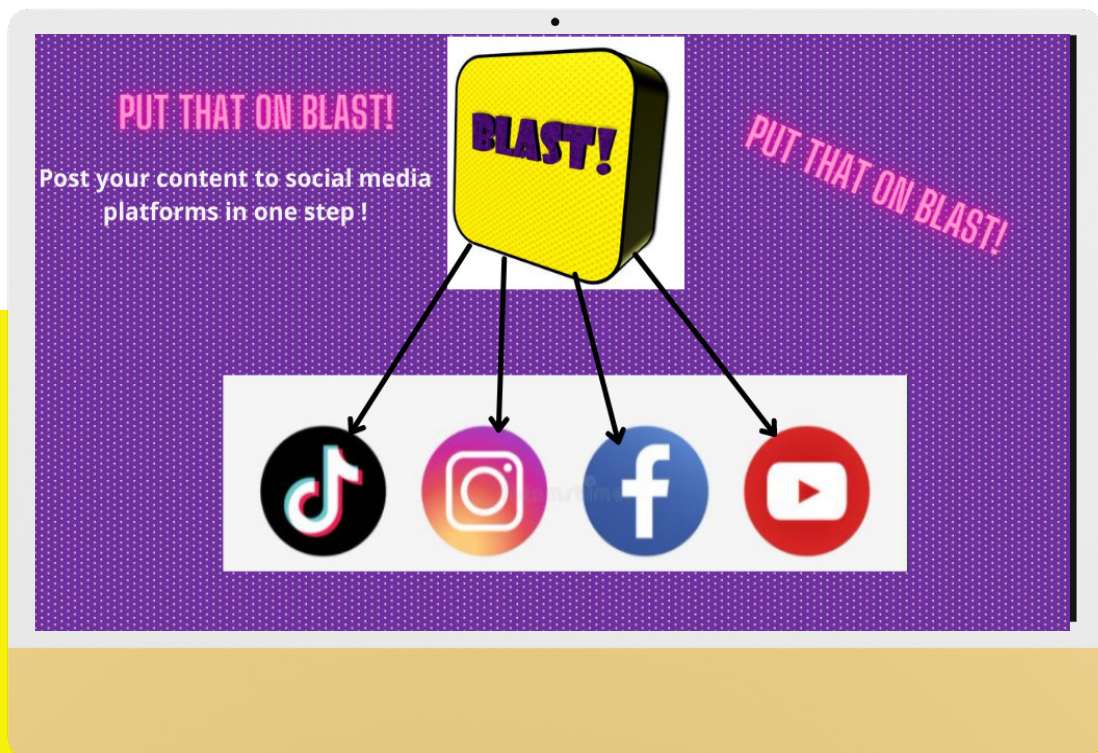

Share your social media content with one app and in one step. Instead of uploading your videos then sharing individually to your favorite platforms, you can upload once or create the content right in the Blast application on your mobile device then "Blast" to all of your favorite social media sites in one push of a button.

## WHAT IT DOES FOR YOU

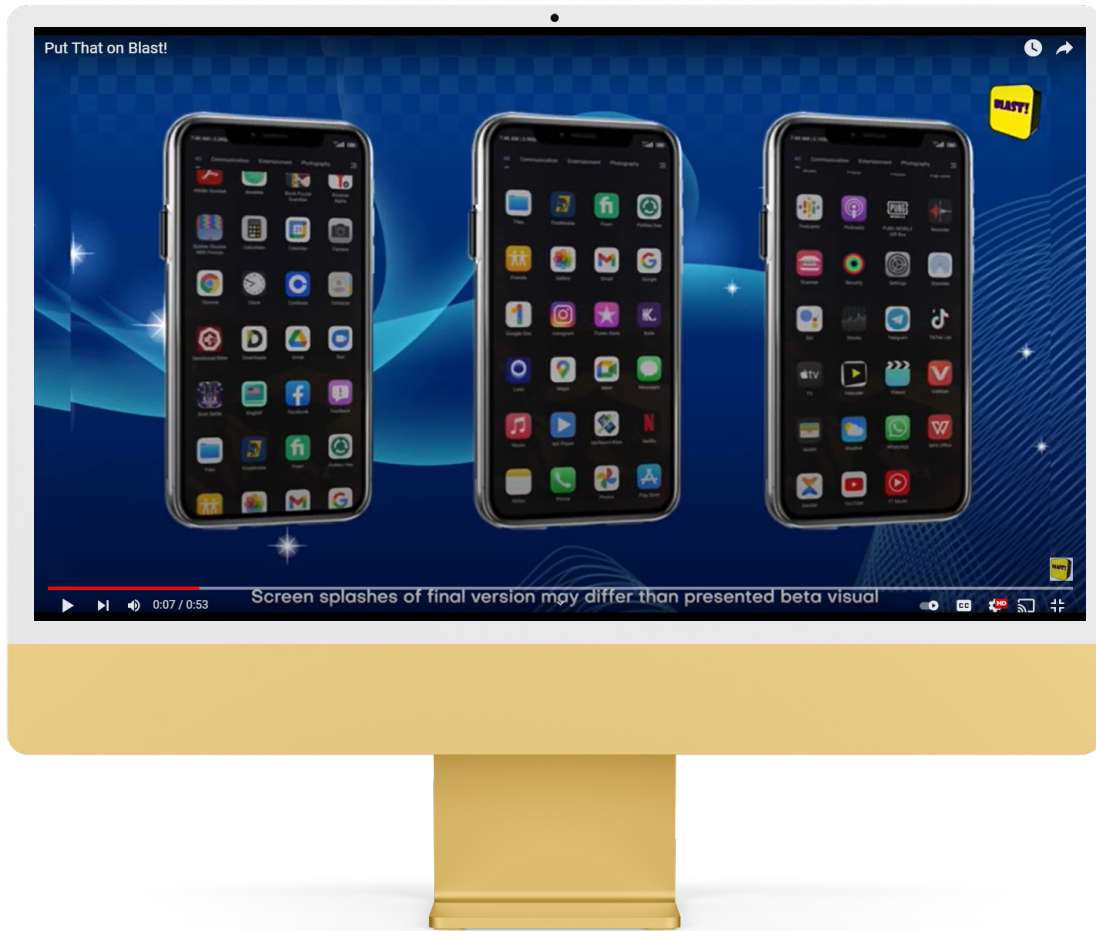

There are other sites and applications that offer a similar service but not as efficient. They will usually take you through several steps before the content is launched to your favorite site. Blast is like putting a turbo charger on a bicycle. We are focused on delivery of the content faster than the competition. Blast will be the MVP amongst its competitors.

## HOW IT DOES IT

1. Download Blast on any device
2. Complete the initial guided setup
3. Share Content
