

The Smart Way to Stay Active and Independent

More than a modern-day alternative to traditional medical alert systems, the stylish Smartwatch PERS is designed to support healthy and active lifestyles. In addition to providing fast and easy access to assistance with the simple press of a button, the Smartwatch PERS offers step tracking and heart rate measurement to empower individuals to live their best lives while staying safe and connected.

24/7/365 access to assistance.

Activating the Smartwatch PERS alarm is done with a simple 3-second press of the help button. Users will be connected to our response center and communicating with a trained care specialist through the integrated microphone and speaker. Embedded GPS and Wi-Fi location technology enables us to send help wherever the user is located.

The Smartwatch PERS is the medical alert device you'll want to wear.

- The Smartwatch touchscreen displays the time in a large, stacked format—making it easy to read.
- Automated voice prompts and vibration provide confirmation when the help button is pressed.
- Optional fall detection technology¹ detects falls and connects to our response center, even if the user is unable to press the help button.
- No smartphone pairing required.
- 4G LTE technology keeps users connected without the need of a cellular phone or contract.
- The waterproof Smartwatch can be safely worn while showering or bathing.²
- The lightweight, hypoallergenic silicone watchband is flexible and gentle on the skin.

Easy navigation at your fingertips.
