

As you are well aware through media coverage, 2k Mules, AZ Audit, AZ Primary coverage, the arrest of numerous people in several states for voter fraud, and myriad other sources, there are a lot of ways our voting system can be used to control who wins and loses elections. Some of the things we can do to reduce the potential for vote fraud and help make everyone's vote count are listed below:

1. **Vote!!** Total votes cast cannot exceed total voters registered. Therefore, if you don't vote, it makes it easier for them to load in fraudulent votes, even using your name!
2. **Vote In Person on Election Day.** The evidence to date from those voting machines that have been examined, indicates that if fraud is being perpetrated it tends to follow certain steps. The "selected" candidate has a preload of ghost voters, usually around 35k. The later in the day you vote, the harder it is for the cheaters to know how many additional ghost voters they need to win. By voting in person, they cant find a reason to send you ballot to adjudication. In adjudication, 2 people look at the ballot and "decide" for whom you meant to vote.
3. **Do Not Request Main-In Ballots.** These requests give them a target number of total voters from each party. They have a better idea of how many ballots they need to harvest and counterfeit in order to win.
4. **Do Not Participate in ANY polls/surveys or random texts asking if you are going to vote or for whom!** This is a sneaky way of finding out how many fake votes they need.
5. **Until we can get rid of ballot boxes—Tailgate Party On!**
6. **On Election Day, DO NOT DROP OFF YOUR BALLOT CURBSIDE!** Ballots collected curbside are not counted unless the number will change the outcome. Then they have to go to Adjudication for signature matching. Votes for the candidate opposing the "selected" candidate can be "Adjudicated" to the "selected" candidate or disqualified for signature match or any other of a number of reasons. This can also be used as a stalling tactic to provide extra time to manufacture additional ballots for the "selected" candidate using the poll register to determine who did not vote and can be used as a ghost voter. If you cannot wait in line to vote, take your completed ballot inside the BOE and put it in ballot box.
7. **Ask for a paper ballot, use your own black or blue pen to mark it, take a picture of it with your phone.** In Ohio, you have the right to ask for a paper ballot. Take a picture of your ballot and after the election go to BOE website and make sure your vote was recorded.
8. **Share this list with every patriot you know and make it go viral on community fb pages everywhere.**
