QUICK FACTS:

- Labor force in excess of 100;
- Equipment includes skid loaders, 9.5' plows on heavy duty pick-ups, Ventrac tractors, Toro Multi-Force sidewalk machines with power angle plows and Kage system snow pusher/plows;
- Access to additional large scale snow removal equipment such as agricultural tractors with 14' plows;
- Professional, commercial equipment means snow removal takes less time, costs less money, and leaves Residents more satisfied during the inconvenience of winter weather events;
- On call 24/7 with onsite arrival as the snow is ending;
- Crews are always made available the day after an event to touch up any areas that need addressed and quality inspections are performed by management for all events.

STATE OF THE ART EQUIPMENT

We have invested heavily in state of the art equipment that allows us to remove snow more efficiently. This means snow removal gets done faster and for less money than competitors who rely more heavily on labor.

A DEDICATED CREW

The crew assigned to your Community reports immediately to your Community and is only responsible for snow removal at your Community. This means your Residents "see" our crews just as the snow is ending. This provides piece of mind and better service!

COMMUNICATION

We work with the Board/ Manager to communicate a detailed forecast in advance, a recommended plan to address the winter weather event, and keep everyone apprised of our progress throughout the storm. Ensuring Residents remain informed makes all the difference!
