

Choosing the best fit college is both an exciting and overwhelming time for students and their parents. Determining which colleges to apply to, as well as optimizing your chances for acceptance, can seem like a daunting task. The Collegiate Advisory Group helps students navigate the process of exploring, applying to, and selecting the best fit school.

Your Pathway to Success

Providing
Comprehensive
Guidance for High
School and College
Success

OUR SERVICES

High School Selection/Application Process - GPA Modeling

We help students choose the best courses that fit their academic capabilities, resulting in a positive impact to their GPA and ability to meet the requirements for gaining admission to a targeted college. We use analytics to optimize their course selection. We provide a 4-year course schedule with an estimated GPA to define the "right courses" for their high school career. We model changes to the courses and potential grades in those classes. We set a plan to maximize a student's AP/IB classes. Typically Three - 1 hour sessions

Standardize Test Planning

We create a customized test plan: a study plan with recommend test prep strategies, formal test preparation support (if applicable), and a test schedule which includes multiple testing options. As test results become available, we modify the study plan and test schedule. Typically Two - 1 hour sessions

College Scholarship Research

Based upon a student's accomplishments, affiliations, and extracurricular activities, we assist students with identifying and applying for relevant scholarships at the local and national level. Typically One - 1 hour session

OUR SERVICES

Essay Preparation

We help students select an essay topic and then find their voice when composing the essay. We brainstorm ideas, discuss essay structure, review drafts, and provide feedback on grammar, flow, and content. Typically Three - 1 hour sessions

Development of the College List

We help students narrow down their college list to a set of best fit colleges based upon their individual criteria. We provide insights into colleges and contact the admissions departments on a student's behalf. We categorize the college list into Safety, Target, and Reach schools to ensure students are applying to schools that will be a good fit. Typically Three -1 hour sessions

Interview Preparation

We prepare students for the interview by practicing potential interview questions and responses, reviewing interview etiquette, and creating a list of questions to ask the interviewer to show intellect and engagement. Students will work with an advisor in preparation for the interview and then will conduct a mock interview with a second advisor. The interview is critiqued and feedback is provided to the student. Typically Two - 1 hour sessions

WE ARE INDEPENDENT EDUCATION CONSULTANTS

Why Choose Us?

For Students

- Course selection to maximize GPA
- Building your resume for college application
- Customized College List
- Personalized & Comprehensive Plan/timeline
- Essay Review
- Application Preparation and Submission
- Mock interview
- Selection of the best fit college

For Parents

- We will help your child navigate the college application and selection process
- Manage timelines, deadlines and provide status updates on student progress
- We will minimize stress on parent/child relationship
- We provide insights into the financial aid process and cost of attendance
