

19 November 2025

University
of Glasgow

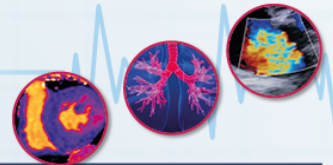

NHS
Golden Jubilee

Scottish Right Heart Symposium

Programme Highlights

A specialised meeting covering a wide range of topics relating to Right Heart and Pulmonary Circulation.

Now in its fourth year, confirmed highlights for 2025 include:

Novel techniques to monitor RV function through RV waveform assessment

Professor Andre Deanult, Professor, Institut de Cardiologie de Montréal, Canada

The future of Tricuspid Valve intervention

Dr Ee Ling Heng, Adult Congenital and Structural Interventional Cardiologist, Royal Brompton and Harefield Hospital, London

Oxygenation-sensitive and 4D-Flow CMR to assess the impact of anaesthesia and positive pressure ventilation

Dr Dominik Guensch, Associate Professor, University of Bern, Switzerland

The RVNet(Work): Current clinical practice and future developments in right heart echocardiography

Professor Harry Magunia, Head of Cardiothoracic and Vascular Anaesthesia, University of Tübingen, Germany
