

GHARABLY INTEGRATED
ENGINEERING COMPANY

You
ImaGine,
We Build.

Who we are

The roots originated in 1912 and Since 1948, The company has begun the activities in the field of general contracting/construction contractor and has great experience in Turn-Key Projects, serving the Engineering, Procurement, and Construction fields where we have been working hard and deliberately for more than 70 years.

GIECO has been a leader through the years in the fabrication, welding, testing, and erection of metal plate structures and related systems.

Mr Ibrahim El Gharably

Today in both the private and public sector, Gharably Group (GG) plays a massive role in the national economy.

GG is the holding company for:

- Gharably Integrated Engineering Company (GIECO)
- Gharably Engineering Company (GECO)
- Gharably for Trade and Marketing Company (GTMCO)
- Gharably for Livestock&Agriculture Development Company (GLADCO)

Both GIECO and GECO, as EPC Contractors, have their construction projects all around Egypt with a massive turn-over in 2018 of about one billion US dollars, and all the thanks go to God and our esteemed clients.

Our expertise ranges from engineering to architecture and from design to planning and project management.

Having great experience in turn-key projects, we serve in the procurement, engineering, and construction fields, where we have been working hard and carefully for more than 70 years.

Moreover, we have our steel workshops in Alexandria for a monthly product that exceeds 1000 Ton per month and more depending on the type of steel.

Eng. Moatasem El Gharably

I would like to thank all our team of directors and employees, who work hard to uphold the reputation of our esteemed company, which is positively reflected in the achievement of our goals in spite of the confronted challenges, in the past years, and succeeded to win the execution of mega projects. Due to the faithful efforts and persistence of our team, GIECO has succeeded to gain the appreciation of our clients, and won several projects bids in addition to Work Authorizations.

The commitment with the international standards of quality, environment, health and safety is on the top of our priorities.

GIECO reinforces its efforts to communicate with Foreign Investors and Egyptian Clients to strengthen mutual cooperation through taking part in executing engineering and construction projects.

GIECO team are the main factor of boosting GIECO's business and are responsible for upgrading the work performance of the company up to the international levels.

This target is fulfilled through permanent training of manpower on the local and international levels.

I extend my thanks, appreciation and gratitude to our clients /suppliers inside/and aboard Egypt for their trust, which will remain an incentive to exercise more efforts to maintain their trust and their continuous support.

Sectors

Marine, Coastal, & Port Construction Work

GIECO's recent challenge and success is the marine ports, where we work hard and carefully, taking into consideration weather and sea movements.

consideration of Every minor change in experience allows us to gain a reputation. GIECO has many years of experience in the marine port construction field. GIECO executes many types of quays, such as combi-wall, gravity block wall, and diaphragm wall.

GIECO is committed to the highest standards of quality.

GIECO places the highest priority on the safety of our workers and the protection of the environment, and we minimize the impact of our operations on the eco-systems surrounding our activities.

GIECO is able to supply more than 15,000 tons of quarries per day. GIECO constructed a -2200metre breakwater within 12 months with a depth(14.50-m)

Marine, Coastal, and port construction work

3rd of July Marine Base

Al Najila Port Project

The purpose of the project is to construct a military quay wall platform and a commercial port in Al Najila Port .

The project consists of the main breakwater with 3750m length, an eastern breakwater with 2775m length, a military quay wall platform with 1000m length, and a commercial quay wall platform with 2200m length.
