THE SIMS FARMS

4

# ON JUNE 30, 1900...

Landy B Sims was born in South Carolina where he grew up and spent most of his life in Dorchester County. Landy maintained his livelihood by engaging in various occupations, including farming and pipelining. Landy purchased over 40 acres of land in Harleyville, SC where he began the cultivation of the Sims tobacco fields.

## In 1972, the legacy..

continues as Landy taught his grandsons how to help cultivate the farm land. The Sims brothers, John, Leland and Tyrone Sims, spent summers growing up with their cousins working in the tobacco fields and driving to North Carolina to sell the produce. Present day, the farm is run by the Sims brothers and fourth generation farmer, Johanthan Sims(Landy's Great Grandson).

BIODYNAMIC FARMING

PRODUCT CATALOG

# The Farm

The Sims Farms, LLC is a family owned and operated agricultural production business located in Dorchester, SC. The biodynamic farm owns and manages farm land, offers crop services and performs tasks to prepare organic crops for market, including shelling, fumigating, cleaning, grading, grinding, and packaging. In 2022, the farm plans to launch a on-site farm stand for locals only on weekends.

The Sims Farms **Crop Services** provides support services to farms such as:

- Consulting
- Crop Harvesting
- Labor Contracting
- Sourcing Organic Agricultural Products

THE  
**Benefits**

THE SIMS FARMS

BIODYNAMIC FARMING

# THE Benefits

Essentially **Organic Farming** is the practice of producing food without the use of pesticides, herbicides or genetically modified organisms (GMO's). **Biodynamic Farming** is a step above Organic Farming by working with the "life force" of Mother Nature to heal the earth and grow nutrient-dense foods without the use of chemicals.

## SOIL

Biodynamic farming focuses on naturally farming the soil because it is soil that is essential for the quality of the product and not the farming itself.

## PRINCIPLES

Crop rotation, plant diversity, homeopathic approach, composting, animal life, and force of nature are the main principles of biodynamic farming. Biodynamics heals the earth, believes in replenishing the soil and using healthy principles of mindful farming.

## COMPETITION

The conventional farming system just tempers the soil and ultimately its condition deteriorates and produces unhealthy products.
