

Landscape Architecture Internship Opportunity!

We are currently seeking candidates for an internship at Studio W! Interns typically get to participate in design, drafting production, presentation development and construction planning. In addition, you will have the opportunity and exposure to project management.

Your experience at Studio W will give you hands on exposure in the design and construction industry. As a design-build firm, exposure to the field includes site visits, exposure to survey equipment, working with functional plans, estimating project budgets, product research and construction administration & construction observation.

Optional opportunity this year at Studio W will be "hands in the soil" at our new office space!

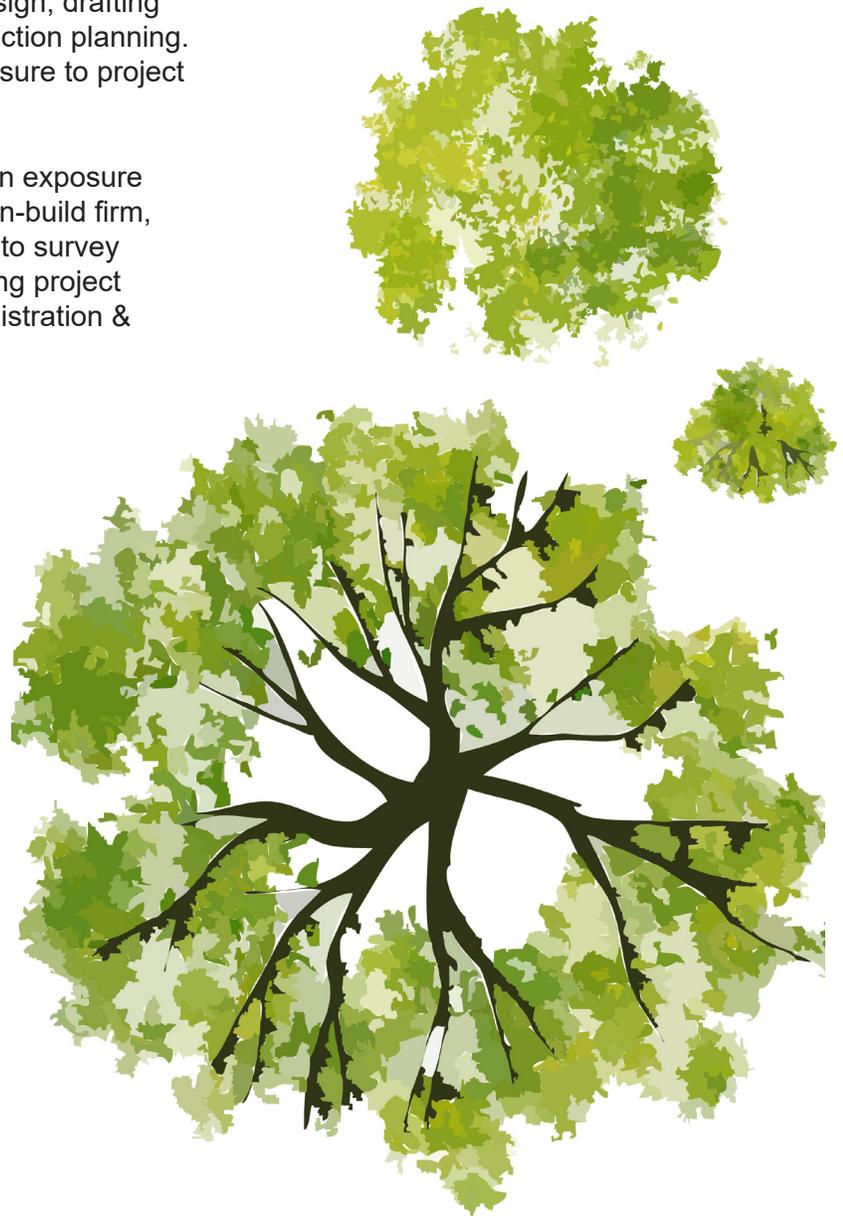

This will include developing gardens and landscape to our outdoor creative space.

Qualifications:

- Landscape Architecture graduate students or undergraduate students with at least two years of schooling.
- Proficiency in Sketchup & Photoshop
True proficiency in Autocad is required.
- Self-motivated and willing both to work independently and to collaborate.
